- A.O. Atkin: 140, 181, 220
 F.V. Atkinson: 178, 179, 220
- E.W. Barnes: 72, 76
 E. Beltrami: 41, 95
 E. Bombieri: 142, 143, 220
 R.W. Bruggeman: 92, 220
 D. Bump: 140, 215, 220
- J.G. van der Corput: 151
 R. Courant: 40, 95, 220
- P. Deligne: 140
 J.-M. Deshouillers: 93, 180, 181, 220
 W. Duke: 140
- C. Epstein: 217, 220
- J.D. Fay: 94, 220
- P.X. Gallagher: 142
 J.C.F. Gauss: 41
 L. von Gegenbauer: 96
 D. Gintzberg: 140
 D.M. Goldfeld: 91, 220
 A. Good: 141, 220
 I.S. Gradshteyn: viii, 95, 220
- J.L. Hafner: 217
 G.H. Hardy: 220
 E. Hecke: 40, 93, 97, 139, 220
 D.A. Hejhal: 40, 220
 D. Hilbert: 40, 95, 220
 J. Hoffstein: 140
 A. Hurwitz: 139
- A. Ivic: viii, 178, 212, 213, 218, 221
 H. Iwaniec: 41, 42, 93, 94, 131, 140, 142, 143, 180, 181, 221
- M. Jutila: 141, 142, 143, 178, 183, 213, 221
- S. Katok: 142, 221
 N.V. Kuznetsov: 43, 90, 91, 92, 93, 94, 141, 142, 179, 221
- N.N. Lebedev: viii, 41, 95, 216, 221
 J. Lehner: 140, 181, 220
 Ju.V. Linnik: 91, 142, 143, 221
 J. Liouville: 41
 N.I. Lobachevsky: 41, 95
- H. Maass: 1, 40, 140, 221
 T. Meurman: 140, 222
 J. Milnor: 41, 222
 L.J. Mordell: 139
 Y. Motohashi: 91, 92, 95, 141, 142, 143, 178, 180, 181, 183, 212, 213, 214, 215, 221, 222
- D. Niebur: 94, 222
- H. Petersson: 40, 49, 140, 222
 E. Picard: 95
 N.V. Proskurin: 93, 222
- S. Ramanujan: 91, 139, 140, 155, 215
 R.A. Rankin: 43, 91, 93, 140, 222
 G.F.B. Riemann: 41
 F. Riesz: 40, 222
 W. Roelcke: 1, 40, 41, 222
 I.M. Ryzhik: viii, 95, 220
- P. Sarnak: 41, 42, 140, 142, 217, 222
 A. Selberg: 1, 40, 43, 91, 92, 94, 95, 179, 222, 223
 G. Shimura: 142
 C.F. Siegel: 40, 223
 N.J. Sonine: viii, 96, 223
 S.A. Stepanov: 91

H. Weyl: 151

E.T. Whittaker: viii, 41, 95, 223

E. Yoshida: 95, 223

Subject index

- additive large sieve inequality: 131
 approximate functional equation: 151
 Atkinson dissection: 151
 Atkinson formula: 150, 213
 automorphic L -function: 104–105, 110
 automorphic resolvent: 14
 automorphic resolvent kernel: 15
- Bianchi group: 95, 183
 binary additive divisor problem: 141, 153
- cancellation among Kloosterman sums: 91
 celestial sphere: 83
 compactification of automorphic resolvent:
 15, 28
 congruence subgroup: 101, 180–182
 continuous spectrum: 14
 convolution method: 141, 182
 cusp: 4, 40, 95
 cusp-form: 12, 49
- Dedekind zeta-function: 85, 180, 183
 Dirichlet L -function: 180, 182
 discontinuous motion: 3
 discrete spectrum: 12, 84
 dissection argument: 146, 215
- Eisenstein series: 5, 84, 109
 Euler product for automorphic
 L -functions: 105, 110
- Farey dissection: 91
 Fourier expansion of automorphic
 resolvent kernel: 94
 Fourier trace: 93–94
 free-space resolvent kernel: 14, 85
 Fricke identity: 101
 full modular group: 3
 functional equation: 6, 94, 105, 107, 110,
 115, 144
- fundamental domain: 3–4, 84, 101
 as a manifold: 4
- Gaussian number field: 83
- Hecke correspondence: 97, 141, 218
 Hecke eigenvalue: 101, 104
 Hecke L -function: 104–105, 110
 Hecke operator: 98, 103
 Hecke representatives: 98, 152
 Hilbert's modular group: 40
 horizon: 83
 hybrid large sieve inequality: 132
- imaginary quadratic number field: 95, 180,
 183
 involution: 84, 102
 iterated automorphic resolvent kernel: 16,
 22
- Kloosterman sum: 5, 85, 91, 93
 Kloosterman-sum zeta-function: 62, 94
 Kontorovitch–Lebedev inversion formula:
 72, 95
 Kuznetsov's trace formula: 59, 64, 69, 72
- Laplace–Beltrami operator: 2
 large values theorem: 205
 Lindelöf hypothesis: 219
- Maass–Fourier coefficient: 13
 Maass wave: 12, 40
 modular discriminant: 139
- non-Euclidean area element: 2
 non-Euclidean distance: 18
 non-Euclidean geometry: 41
 non-Euclidean Laplacian: 1, 83
 non-Euclidean metric: 2
