

Contents

<i>Preface</i>	page	vii
<i>Convention and assumed background</i>		viii
1 Non-Euclidean harmonics		1
1.1 Basic concepts		1
1.2 Resolvent kernel		17
1.3 Iterated kernel		22
1.4 Spectral resolution		32
1.5 Notes for Chapter 1		40
2 Trace formulas		43
2.1 Basic identities		43
2.2 Holomorphic forms		49
2.3 Spectral means of Maass–Fourier coefficients		54
2.4 Sums of Kloosterman sums		61
2.5 Opposite-sign case		67
2.6 Alternative argument		72
2.7 A flight		83
2.8 Notes for Chapter 2		90
3 Automorphic L-functions		97
3.1 Hecke operators		97
3.2 L -functions		104
3.3 Bilinear forms of L -functions		111
3.4 Spectral mean values		121
3.5 Spectral large sieve		131
3.6 Notes for Chapter 3		139

vi	<i>Contents</i>	
4	An explicit formula	144
4.1	A prototype	145
4.2	Non-diagonals	150
4.3	Reduction to Kloosterman sums	153
4.4	Spectral expansion	158
4.5	Crystallization	164
4.6	Analytic continuation	166
4.7	Explicit formula	171
4.8	Notes for Chapter 4	178
5	Asymptotics	185
5.1	Local explicit formula	185
5.2	Global bounds	199
5.3	Eigen-peaks	205
5.4	Notes for Chapter 5, and epilogue	212
	<i>References</i>	221
	<i>Author index</i>	225
	<i>Subject index</i>	227
