Cambridge University Press 0521447925 - Cost-Benefit Analysis of Environmental Change Per-Olov Johansson Table of Contents <u>More information</u>

## Contents

	List of figures	page x
	Preface	xiii
1	Introduction	1
	1.1 Scope of the study	1
	1.2 Plan of the study	3
2	Some basic concepts	7
	2.1 Households	7
	2.2 Firms	9
	2.3 Markets, general equilibrium and Pareto optimality	10
	2.4 Public goods	11
	2.5 The social welfare function	15
	2.6 Some illustrations of social welfare functions	17
	2.7 Concluding remarks	21
	Appendix	21
3	Consumer surplus measures	24
	3.1 Two money measures of utility change	24
	3.2 On the properties of money measures	27
	3.3 Environmental quality and market data	30
	3.4 Complex changes	33
	3.5 On path-dependency of money measures	38
	Appendix	42
4	Valuing public goods: practical methodologies	46
	4.1 The contingent valuation method	46
	4.2 Closed-ended techniques	52
	4.3 Utility functions and demand equations	55
	4.4 The travel cost method	57

Per-Olov Johansson	
Table of Contents	
Moreinformation	

	4.5 Hedonic prices	59
	4.6 A useful interpretation of WTP measures	62
	-	
5	General equilibrium cost-benefit rules	65
	5.1 Producer surplus measures	66
	5.2 General equilibrium cost-benefit rules	71
	5.3 Assessing large projects	74
	5.4 Some further interpretations	77
	5.5 The treatment of taxes	81
	5.6 Unemployed resources	84
	Appendix	86
6	Cost-benefit rules, national income accounts and sustainable	
	development	90
	6.1 An intertemporal model	90
	6.2 Intertemporal cost-benefit rules	95
	6.3 An illustration of a cost-benefit analysis	98
	6.4 Natural resources	101
	6.5 National accounts and sustainable development	104
	Appendix	110
7	Valuation and aggregation: intragenerational and	
7	intergenerational issues	113
7		<b>113</b> 114
7	intergenerational issues	
7	intergenerational issues 7.1 The social welfare function	114

Cambridge University Press 0521447925 - Cost-Benefit Analysis of Environmental Change Per-Olov Johansson Table of Contents <u>More information</u>

	Contents	ix
9	Valuing changes in access conditions, health risks and	
	information	156
	9.1 Access value	157
	9.2 Valuing changes in health risks	158
	9.3 Some further notes on the value of health changes	160
	9.4 Valuing health benefits from air pollution abatement	163
	9.5 The value of information and quasi-option values	167
	9.6 Policy choices, time inconsistency and credibility	171
	9.7 Irreversibility, uncertainty and the social profitability of	
	an investment	174
10	Empirical applications	178
	10.1 A cost-benefit analysis of land reclamation	178
	10.2 Preservation of fragile forests	180
	10.3 Preservation of endangered species	183
	10.4 Social cost of environmental quality regulations	189
	10.5 The Brown–Hammack model for allocation of prairie	
	wetlands	192
	10.6 Accounting for natural resource depletion	197
11	Policy instruments and international environmental problems	200
	11.1 Policy instruments	200
	11.2 International pollution	206
	11.3 The acid rain game	209
	Notes	214
