Pages with definitions are typed in **bold**.

- angle between subspaces, **18–19**, **22–3**, **25**, **31**, **62**, **78**
- Bari theorem, **27**, **30**
- \mathcal{L} -basis, *see* Riesz basis in the closure of its linear span
- basis constants, **120**
- Blaschke condition (B), **43**, **55**, **64–7**
- Blaschke–Potapov product (BPP), **44**, **47**
- Blaschke product (BP), **43**
- BMO class, **104**
- Carleson condition (C), **52–4**, **56**, **67**
- Carleson constant, **52–4**, **56**, **223**
- Carleson–Newman condition (CN), **52**
- Carleson series, **73**
- Cartwright class, **60–1**, **90**
- controllability
- B controllability, **162–6**, **169–70**
 - E controllability, **162–6**, **169–70**
 - M controllability, **162–6**, **169–70**, **172**
 - UM controllability, **162–6**, **169–70**
 - W controllability, **162–6**, **169–70**
- generating function (GF)
- operator-valued, **80–1**, **83–8**, **90**, **93–4**, **238**
 - scalar, **101–4**
 - scalar with multiply zeros, **113**
- Gram matrix, **28–9**, **63**, **262–3**
- Hardy space
- in the unit disc, **39–41**
 - in the upper halfplane, **40–1**
- Helson–Szegő condition, **95**, **104**
- Hilbert operator, **42**, **93–8**
- boundedness of, *see* Helson–Szegő condition; Muchenhaupt condition
- Hilbert transform, **94–5**
- Hilbert Uniqueness Method, **166–7**, **170–1**
- inner function, **42–5**, **47**
- W -linear independence (W), **24**, **25–6**, **29–30**, **32**, **138–41**, **170**
- and controllability, **164**, **170**
- ω -linear independence, **24**, **26**, **28**, **141**
- minimality (M) (*see also* uniform minimality; *-uniform minimality)
- and controllability, **164–5**, **170**
 - elements of, **25–6**, **29**, **31–3**, **35–7**
 - exponentials of **55**, **59**, **63–5**, **67**, **78**, **81**, **83–4**, **99–101**
 - under perturbations, **105**, **124**
 - simple fractions of, *see* exponentials of subspaces of, **30–3**, **59**, **63–5**, **67**
- Muckenhoupt condition (A_2), **95–7**, **104**
- Nagy–Foias model operator, **49**, **50–2**
- orthogonalizer, **26–7**, **30–1**, **120**
- outer function
- operator-valued, **46–7**
 - scalar, **45–6**
- Paley–Wiener theorem, **42**, **48**
- problem of moments, **34**, **34–8**
- projector
- general form, **20–1**
 - onto K_S subspaces, **48**
 - skew, **20–3**
