978-0-521-45271-7 - Screening for Down's Syndrome

Edited by J. G. Grudzinskas, T. Chard, M. Chapman and H. Cuckle

Frontmatter

[More information](#)

This important new publication summarises the recent exciting advances in screening for Down's syndrome. It addresses important clinical questions such as: risk assessment, whom to screen, when to screen, which techniques to use and the organisation of screening programmes nationally and internationally.

An international and authoritative team of authors has been invited to assess the latest developments in this rapidly advancing area. The volume provides a critical and much needed evaluation of the potential and limitations of new and established techniques for screening for Down's syndrome. It will serve as an essential source of information for all those involved in prenatal diagnosis and the provision of obstetric care.

Contents

	<i>page ix</i>
<i>List of contributors</i>	<i>page ix</i>
1 Down's syndrome epidemiology and biochemical screening <i>Ernest B. Hook</i>	1
2 Perception of risk <i>Mary C.M. Macintosh</i>	19
3 Risk estimation in Down's syndrome screening policy and practice <i>Howard S. Cuckle</i>	31
4 Screening by test combination: a statistical overview <i>T.M. Reynolds</i>	47
5 Measurement of human chorionic gonadotrophin (hCG) as a screening test for Down's syndrome <i>T. Chard and Ray Iles</i>	73
6 The measurement of hCG subunits in screening for Down's syndrome <i>Kevin Spencer</i>	85
7 The measurement of free β -hCG in screening for Down's syndrome <i>James N. Macri</i>	101
8 Multiple hCG-related molecules <i>Laurence A. Cole</i>	119
9 Is the measurement of unconjugated oestriol of value in screening for Down's syndrome <i>Kevin Spencer</i>	141
10 Inhibin and CA 125 in Down's syndrome screening <i>Jan M.M. van Lith</i>	163
11 Schwangerschafts protein 1 (SP1) and biochemical screening for Down's syndrome <i>Mary C.M. Macintosh</i>	171
12 Ultrasound and Down's syndrome <i>Moshe Bronshtein and Zeev Blumenfeld</i>	181
13 Prenatal diagnosis using fetal cells isolated from maternal blood <i>Sherman Elias and Joe Leigh Simpson</i>	193
