

Contents

Preface	xi
1 Introduction	1
2 Collection of specimens and data	19
3 General aspects of laryngeal morphology	30
4 Detailed morphology	48
4.1 Development of the larynx	48
4.2 Framework, cartilages, ligaments and related joints	56
4.3 Ventricle, sacculle and air sacs	87
4.4 Laryngeal mucous glands	106
4.5 Musculature	125
4.6 Nerve supply	141
4.7 Vascular supply	170
5 Laryngeal physiology	185
5.1 Respiration	185
5.2 Locomotion	198
5.3 Vocalization	227
6 Evolutionary concepts	258
Appendices	266
1 Breakdown by species and age for 1410 mammals examined	266
2 Comparative study by species of the cricothyroid area	276
3 Comparative data for the glottic area and tracheal ring broken down by age and sex	278
4 Measurements of cricoarytenoid joint facets	282
Index	283
