

## Index

- Acclimatization, 76, 221  
 Activity patterns, 180  
 Adaptability, 117, 214  
   human, 214  
 Adaptation  
   definition of, 217  
   environmental, 18  
   forms, 218  
   genetic, 213, 220  
   human, 146  
   levels of, 75, 218  
   migrant, 46  
   non-genetic, 213, 221  
   plastic, 229  
   problems of measurement of, 220  
 Admixture, 154  
 Allometry, 102  
 Aluminium, 205, 208  
 Alzheimer's Disease, 198  
 Amyotrophic lateral sclerosis (ALS), 198  
 Anencephaly, 20  
 Asians, 129  
  
 Basal Metabolic Rate (BMR), 93  
 Bioanthropology, *see* Biological anthropology  
 Biochemical efficiency, 105  
 Biochemical anthropology, 118, 231  
 Birthplace, 131  
 Blood groups, 147  
 Body composition, 57, 91  
 Body mass, 57  
 Body mass index, 7  
 Body pattern, 35  
 Body size, 51, 91  
  
 Cabbage, 197  
 Carbohydrate, 105  
 Case control studies, 154  
 Cellular equivalence, 22  
 Cephalic index, 3  
 Cercaria, 162  
 Chimeras, 22  
 China, 192  
  
 Chromosomes, X, 25  
 Cognitive consequences, 52  
 Community effect, 18  
 Competence, 23  
 Consanguineous marriages, 87  
 Convergent evolution, 34  
 Crow and Mange's method, 149  
 Cranial measures, 147  
  
 Dani, 195  
 Danish population, 78  
 Demographic transition, 117  
 Demography, 115  
 Development, modes of, 21  
*Drosophila*, 13  
 Dysplasia, 6  
  
 Ectodermal competence, 23  
 Embryology, 21  
   embryonic induction, 23  
 Endogamy, 5  
 Energy balance, 93  
 Energy expenditure, 91  
   components of, 92  
   economization of, 93  
   total (TEE), 95  
 Energy intake, low, 91  
 Epidemiology, 78  
 Epigenetic landscape, 20  
 Ethyl alcohol, 20  
 Exogamy, 5, 112  
 Expressivity, 34  
  
 Fat mass, 57  
 Fecundity, 116  
 Fertility, 115  
   low, 133  
   proximate determinants of, 116  
 Folic acid, 20  
 Forced vital capacity (FVC), 224  
  
 Genotype, 213  
 Genetic assimilation, 19, 32, 35  
 Genetic kinship, 151

- Genetic shortness, 46  
 Genome, 18  
 Goiter, 195  
 Growth, 194  
   determinants of, 65  
   faltering, 97  
   health and, 226  
   Japanese children, 49  
   Mexicans in Mexico, 49  
   patterns of, 84, 223  
   response of, 228  
   secular trend in, 4, 65, 75, 88  
   status, 59  
   theory of, 51  
 Guam, 198  
 Guatemala, 46
- Haemoglobin, 6, 146, 191  
 Han, 194  
 Hardy–Weinberg equilibrium, 118  
 Head circumference, 8  
 Height, *see* stature  
 Heritability, 77, 86  
 Heterogamy, 112  
 Heterosis, 48, 112  
 High altitude, 191  
 Homeostasis, 2, 51  
 HOX system, 37  
 Hui, 192  
 Human adaptability  
   funding to study, 230  
   paradigm, 213, 223  
 Human Adaptability Project, 113  
 Human biology, 1  
 Human biological adaptability, 32, 46, 190  
 Human population biology, 190  
 Hunter–gatherer, 28  
 Hybrid vigour, *see* heterosis  
 Hypoplasia, 21  
 Hypoxemia, 194  
 Hypoxia, 193, 224
- Imaginal discs, 36  
 Immigrants, 3  
   and labour, 134  
   Mexican, 4  
   population of, 119  
 Immune response, 113  
 Immune system, 25  
 Inactivated X, 25  
 Inbreeding, 31  
 Incomplete penetrance, 34  
 Inductive competence, 41  
 Insulin-like growth factor I (IGF-I), 92  
 International Biological Program, 113, 214  
 Iodine deficiency, 195, 197
- Isolation, 76  
 Isonymy, 149  
   parental, 155
- Keratin, 32
- Lamarck, 31  
 Lasker  
   levels of adaptation, 13, 31, 47  
   and Kaplan's repeated pairs method, 150  
 Leader Cell Hypothesis, 18, 40  
 Leukemia, 155  
 Lung cancer, 155
- Malaria, 146  
 Malnutrition, 52  
 Marian Islands, 198  
 Marriage  
   interethnic, 115, 130, 133  
   isonymous, 149  
 Mate selection, 79, 87  
 Maternal effect, 79  
 Maya, 46  
 Melanin pigment, 41  
 Mesomorphy, 8  
 Metamorphosis, 36  
 Migration, 87, 116  
 Migration studies, 110  
 Migrants, 4, 152  
   ethnic, 121  
   international, 120  
   Japanese, 4  
   and labour, 124  
 Miracidium, 162  
 Modernization, 7  
 Monozygotic twins, 22  
 Morphogenesis, 23  
 Mortality, 118  
   childhood, 83  
   and tropical disease, 160  
 Multiple Regression Analysis, 58  
 Muscles, 97  
 Muscular development, 97  
 Muscle strength, 8  
 Mutants, homeotic, 35  
 Mutations, 31
- Native American, 7  
 Natural selection, 13, 31, 48, 76, 147, 213  
 Naturalization, 123  
 Neo-Darwinism, 19, 31  
 Neuronal degradation, 203  
 Neutrality, 147  
 Neutral variation, 151  
 New Guinea, 195, 198  
 Nutritional status, 117

- Nutritional stress, 98, 195
- Occupation, 167
- Ontogeny, 20, 30, 76
- Osteoblasts, 9
- Osteoclasts, 9
- Outbreeding, 79
- Paedomorphosis, 26
- Panmixis, 76
- Parkinson's disease, 198
- Phenotype, 76
- Phocomelia, 10
- Physical activity, 91, 95
- Physical work capacity, 52
- Plasticity, 1, 47, 190  
 and adaptation, 69  
 adaptive role of, 10  
 of Basal Metabolic Rate, 99  
 biological, 191  
 of bony structures, 10  
 definition of, 1  
 embryonic, 30  
 energetics of, 106  
 ontogenetic, 213, 222  
 and phenotype, 2, 34  
 time and growth, 68
- pregoitrous populations, 197
- Proximate determinants, *see* Fertility
- Population size, 87
- Population structure, 76, 85, 134
- Poverty, 52
- Pulmonary function, 180, 191
- Pygmy, 50
- Quantitative genetics, 77
- Racism, 113
- Regeneration, 28
- Repeated pairs methods, 150, 153
- Rural men, 81
- Salamanders, 24
- Schistosomes, 162
- Schistosomula, 162
- Schistosomiasis, 159  
 and absenteeism, 176  
 control programmes for, 181  
 epidemiology of, 165  
 genetic variation in, 168  
 intensity of, 166  
 life cycle of, 161  
 and morbidity, 164  
 nutrition, growth and, 169  
 and physical fitness, 174  
 prevalence of, 166
- and school performance, 175  
 work capacity, productivity and, 174
- Secular trend, *see* Growth
- Sedentes, 152  
 Mexican, 4
- Simulation, 87
- Skeletal height, 80
- Skinfolds, 5
- 'Small but healthy', 46, 229
- Socio-economic status (SES), 57, 116
- Soldiers  
 British, 97  
 Gurkha, 97
- Somatotype, 6
- Samoans, 7
- Southern blotting, 24
- Spina bifida, 20
- Spouse selection, *see* Mate selection
- Starvation, 8, 93, 117
- Stature, 3, 46  
 archaeological evidence for, 66  
 of conscripts, 80  
 of Danes, 79  
 maternal effect on, 75  
 regression of, 81  
 skeletal, 80
- Superoxide dismutase, 200
- Surnames, 118, 146  
 in epidemiological analysis  
 methods of use of, 148
- Sweet potato, 197
- Teeth  
 milk, 30  
 permanent, 30
- Teratogens, 19, 20, 40
- Thalidomide, 20
- Thermic effect of food (TEF), 93
- Tibetan, 192
- Tokelau, 7
- Tomography, 11
- Total fertility rate, 124
- Toxic metals, 203
- Transdifferentiation, 19, 27
- Tricarboxylic acid, 27
- Triiodothyronine (T3), 92
- Vitamin A, 20, 39
- Vitamin D deficiency, 32
- Waddington's theory, 13, 32
- Workforce, 134
- Y-linked gene, 147
- Zootype, 35
