|                                               |           |
|-----------------------------------------------|-----------|
| <i>Preface</i>                                | xv        |
| <b>1 Getting Started With C</b>               | <b>1</b>  |
| 1.1 The first example                         | 3         |
| 1.1.1 Running the program                     | 4         |
| 1.1.2 A word on program layout                | 6         |
| 1.2 Comments                                  | 8         |
| 1.3 Data types                                | 9         |
| 1.4 Identifiers                               | 11        |
| 1.5 Expressions                               | 13        |
| 1.5.1 Arithmetic operators                    | 13        |
| 1.5.2 Assignment operators                    | 14        |
| 1.5.3 Relational operators                    | 15        |
| 1.5.4 Logical operators                       | 16        |
| 1.5.5 Increment and decrement operators       | 17        |
| 1.5.6 Mixing operands in an expression        | 17        |
| 1.6 Statements                                | 18        |
| 1.7 Standard input and output                 | 19        |
| 1.8 The <code>while</code> statement          | 23        |
| 1.9 The <code>if . . . else</code> statement  | 26        |
| Exercises 1                                   | 30        |
| <br>                                          |           |
| <b>2 More Control Structures and Arrays</b>   | <b>32</b> |
| 2.1 The <code>for</code> statement            | 32        |
| 2.2 The <code>do . . . while</code> statement | 36        |
| 2.3 The <code>switch</code> statement         | 40        |
| 2.4 The <code>continue</code> statement       | 42        |

| x        | <i>Contents</i>                  |            |
|----------|----------------------------------|------------|
| 2.5      | Arrays                           | 43         |
| 2.5.1    | Strings                          | 48         |
| 2.5.2    | Sequential and binary search     | 50         |
|          | Exercises 2                      | 52         |
| <b>3</b> | <b>Functions – the Basics</b>    | <b>55</b>  |
| 3.1      | An example – factorial           | 55         |
| 3.2      | Function definition              | 60         |
| 3.3      | Sequential search                | 61         |
| 3.4      | Binary search                    | 63         |
| 3.5      | The One-Zero game                | 64         |
|          | Exercises 3                      | 72         |
| <b>4</b> | <b>Character Handling</b>        | <b>76</b>  |
| 4.1      | Character sets                   | 77         |
| 4.2      | getchar and putchar              | 79         |
| 4.3      | Example – letter frequency count | 83         |
| 4.4      | Strings (arrays of characters)   | 86         |
| 4.5      | Example – word frequency count   | 93         |
| 4.5.1    | Hashing                          | 94         |
| 4.5.2    | Back to the problem              | 98         |
| 4.5.3    | Insertion sort                   | 106        |
| 4.5.4    | Sorting the words                | 110        |
| 4.5.5    | Printing the table               | 111        |
|          | Exercises 4                      | 118        |
| <b>5</b> | <b>Functions and Pointers</b>    | <b>120</b> |
| 5.1      | Parameter passing                | 120        |
| 5.2      | Pointer variables                | 125        |
| 5.3      | More on parameter passing        | 129        |
| 5.3.1    | A voting problem                 | 131        |
| 5.4      | Character pointers               | 139        |
| 5.5      | Pointer arithmetic               | 141        |
| 5.6      | Pointers to functions            | 145        |
| 5.7      | Near, far and huge pointers      | 149        |
| 5.8      | Recursion                        | 150        |
| 5.8.1    | An example – Towers of Hanoi     | 151        |
| 5.8.2    | An example – decimal to binary   | 153        |
| 5.8.3    | An example – quicksort           | 153        |
|          | Exercises 5                      | 157        |

| <i>Contents</i> |                                                     | xi         |
|-----------------|-----------------------------------------------------|------------|
| <b>6</b>        | <b>Data Types, Operators and Storage Classes</b>    | <b>160</b> |
| 6.1             | Data types                                          | 160        |
| 6.2             | Operators                                           | 164        |
| 6.3             | Bit operators                                       | 167        |
| 6.4             | Conditional expressions                             | 170        |
| 6.5             | Storage classes in C                                | 171        |
| 6.5.1           | automatic                                           | 172        |
| 6.5.2           | external                                            | 173        |
| 6.5.3           | static                                              | 177        |
| 6.5.4           | register                                            | 179        |
| 6.5.5           | Other scope rules                                   | 179        |
| 6.6             | Initialization                                      | 180        |
| 6.6.1           | Simple variables                                    | 180        |
| 6.6.2           | Array variables                                     | 181        |
| 6.6.3           | Two-dimensional arrays                              | 184        |
|                 | Exercises 6                                         | 185        |
| <b>7</b>        | <b>Basic Structures and Linked Lists</b>            | <b>187</b> |
| 7.1             | The voting problem revisited                        | 187        |
| 7.1.1           | typedef                                             | 189        |
| 7.1.2           | Passing structures to functions                     | 192        |
| 7.2             | Pointers to structures                              | 201        |
| 7.3             | Linked lists                                        | 202        |
| 7.3.1           | Dynamic storage allocation – malloc, calloc, sizeof | 204        |
| 7.3.2           | Building a linked list – version 1                  | 208        |
| 7.3.3           | Some characteristics of linked lists                | 210        |
| 7.3.4           | Building a linked list – version 2                  | 211        |
| 7.3.5           | Deletion from a linked list                         | 213        |
| 7.3.6           | Building a linked list – version 3                  | 214        |
|                 | Exercises 7                                         | 217        |
| <b>8</b>        | <b>Binary Trees and Other Structures</b>            | <b>221</b> |
| 8.1             | Binary trees                                        | 221        |
| 8.1.1           | Representing a binary tree                          | 228        |
| 8.1.2           | Binary search trees                                 | 228        |
| 8.2             | A cross-reference program                           | 233        |
| 8.3             | Initialization of an array of structures            | 243        |
| 8.4             | Nested structures                                   | 244        |
| 8.5             | Unions                                              | 245        |

| xii       | <i>Contents</i>                                                                                                                 |            |
