

Contents

Preface	ix
Part I	
Finite Abelian Groups	1
1 Congruences and the Quotient Ring of the Integers mod n	8
2 The Discrete Fourier Transform on the Finite Circle $\mathbb{Z}/n\mathbb{Z}$	30
3 Graphs of $\mathbb{Z}/n\mathbb{Z}$, Adjacency Operators, Eigenvalues	46
4 Four Questions about Cayley Graphs	70
5 Finite Euclidean Graphs and Three Questions about Their Spectra	83
6 Random Walks on Cayley Graphs	97
7 Applications in Geometry and Analysis. Connections between Continuous and Finite Problems. Dido's Problem for Polygons	114
8 The Quadratic Reciprocity Law	128
9 The Fast Fourier Transform or FFT	151
10 The DFT on Finite Abelian Groups – Finite Tori	161
11 Error-Correcting Codes	187
12 The Poisson Sum Formula on a Finite Abelian Group	197
13 Some Applications in Chemistry and Physics	212
14 The Uncertainty Principle	223
Part II	
Finite Nonabelian Groups	237
15 Fourier Transform and Representations of Finite Groups	240

Cambridge University Press

0521457181 - Fourier Analysis on Finite Groups and Applications

Audrey Terras

Table of Contents

[More information](#)

viii

Contents

16	Induced Representations	267
17	The Finite $ax + b$ Group	281
18	The Heisenberg Group	293
19	Finite Symmetric Spaces – Finite Upper Half Plane H_q	302
20	Special Functions on H_q – K-Bessel and Spherical	329
21	The General Linear Group $GL(2, \mathbb{F}_q)$	362
22	Selberg’s Trace Formula and Isospectral Non-isomorphic Graphs	385
23	The Trace Formula on Finite Upper Half Planes	394
24	Trace Formula For a Tree and Ihara’s Zeta Function	408
	References	421
	Index	437
