 Elamo-Dravidian 160
 English 47n, 48, 51, 59; aspect 368;

- dental–alveolar shift 79; derivational affixes 15–16; dialect-borrowing 158–9; diphthongization 181–2; front rounded vowels 299–300; loanwords 105n, 131, 185, 191–2; low vowels 299–300; plurals 13–14; northern 55, 181; North Midland 181–2, 226–7; ⟨oo⟩ words 53–7, 141–2; OV > VO 369; progressive 319, 368; pronouns, 2 sg vs. pl. 254–5, 317; relative clauses 369; rhotic vs. non-rhotic dialects 281–3; generic pronouns 368n; -s genitive vs. plural 249; strong verbs 348–9; South African 174, 205–7, 304; umlaut plurals 342–7; vowel-shortening and lengthening 63; /x/-loss 219–20
- epigenetic landscapes 111, 293–5
- equilibria 291
- Estonian 49, 105, 106, 183, 240, 241, 296
- etymology 133; set-theoretic definition 135–9; ‘Greenbergian’ vs. Neogrammarian 165–9
- etymologyless words 209–11
- Eurasianic 160
- exaptation 316–24
- Exeter Book 72
- explanation 325–70; deductive–nomological 328–32; functional 352–66
- exponential growth-curves 374, 379
- extraterritorial dialects 174–6
- Fibonacci sequence 374
- Finnish 7, 47n, 105, 106, 107; cases 23–4, 161, 296, 322–4; diphthongization 183; gradation 237–41; loanwords 48, 105, 194
- French 45, 47
- Frisian 150, 142; diphthongization 183; word order 199
- /ft/ > /xt/ 149
- functional explanation 352–65
- Gallehus horn 70
- German 46, 47n, 48, 56, 57, 58, 368; high vs. low 149; word order 199–200
- Germanic (*see also* North Germanic, Northwest Germanic, West Germanic) 7, 115, 273n; accent shift 245–6; aorist/perfect merger and split 255–7; aspiration 145n, 147; *a*-stems 247; ‘be’-verbs 171; case syncretism 311–13; class I weak verbs 259; class II weak verbs 259–63; consonant stem nouns 309–10; early vowel-merger 143; infinitive 262; *i*-stems 247–8; loans in Balto-Finnic 187–8, 194; perfect 319; progressive 319; Satzklammer 147, 150, 154; strong verbs 317; subgrouping 143–57; unique lexis 209–10; *u*-stems 247; verb-final 147, 198–200; verb morphology 251–3, 309; verb-second 146, 198; vowel-length 146; weak preterite 143–4; /x/-loss 153–4; /θ/ > /t, d/ 150, 154
- Gilyak 161
- Gothic 56n
- gradualism 221–4
- grammaticalization 256n, 258, 267–8, 295–7
- grammaticization 256
- Greek 45, 58, 59, 359; /s/-future 356–7, 360
- Grimm’s Law 7, 35, 116, 122–3, 143, 243–6
- /h/ as lenition output 218–21
- hermeneutics 327–8, 332–52, 385, 389–90; vs. natural science 338n
- High German sound shift 149
- historicity 109–11
- historiographic style 289–90
- Hittite 7
- homology 116, 163, 172–84
- homophony 355n
- homoplasia 118–23
- Humboldt’s Universal 342–5
- Hungarian 7, 49n, 107, 296
- hybridization 119, 158–9, 167
- hypertaxa 159–69
- hypervariability 375–6
- Icelandic 59, 60, 344
- illusionism 380–1
- immanent vs. configurational 26–7
- individualism 361–6
- Indo-European 7, 163; absolute constructions 266; aspect 255; ‘be’-verbs 170–1; cases 136, 311; dative of possession 266–7; dual 268–70; future 357; laryngeals 230; non-accusative objects 267; Northwest 183–4, 211; {p, f, zero} correspondence 127–9, 136–9
- Indo-Uralic 160
- Ingrian 105, 241
- Ingvaemonic 149–50, 153, 251
- initial conditions, sensitive dependence on 110–11
- innovation, lexical 307; morphological 307–8; relative vs. absolute 305–9
- integrity of the sign 313–16, 340
- internal reconstruction 232–41
- intralinguistic vs. social explanation 371–2
- invisible hand explanations 330, 338n, 363n, 369
- isoglosses 144–59; P- vs. M- 156–7
- Italic 7
- i*-umlaut 187n, 242n, 259, 299, 342–4, 347n
