CONTENTS

Preface	vii
PART I: SURVEY ARTICLES	
Pointwise ergodic theorems via harmonic analysis <i>Joseph M. Rosenblatt and Máté Wierdl</i>	3
Harmonic analysis in rigidity theory <i>R.J. Spatzier</i>	153
Some properties and applications of joinings in ergodic theory <i>J.-P. Thouvenot</i>	207
PART II: RESEARCH PAPERS	
Ergodic baker's transformations <i>C.J. Bose and P. Grezegorczyk</i>	239
Almost sure convergence of projections to self-adjoint operators in $L_2(0,1)$ <i>Lech Ciach, Ryszard Jajte, Adam Paskiewicz</i>	247
Quasi-uniform limits of uniformly recurrent points <i>Tomasz Downarowicz</i>	253
Strictly nonpointwise Markov operators and weak mixing <i>Tomasz Downarowicz</i>	259
Two techniques in multiple recurrence <i>A.H. Forrest</i>	273
For Bernoulli transformations the smallest natural family of factors consists of all factors <i>Eli Glasner</i>	291
Topological entropy of extensions <i>Eli Glasner, Benjamin Weiss</i>	299
Functional equations associated with the spectral properties of compact group extensions <i>Geoffrey Goodson</i>	309

vi

CONTENTS

Multiple recurrence for nilpotent groups of affine transformations of the 2-torus <i>Daniel A. Hendrick</i>	329
A remark on isometric extensions in relatively independent joinings <i>Emmanuel Lesigne</i>	343
Three results in recurrence <i>Randall McCutcheon</i>	349
Calculation of the limit in the return times theorem for Dunford-Schwartz operators <i>James H. Olsen</i>	359
Eigenfunctions of $T \times S$ and the Conze-Lesigne algebra <i>Daniel J. Rudolph</i>	369
Conference Program	433
List of Participants	435
