 - Group 125
 - Induction Theorem 31
- Bruhat decomposition 73
- Burnside ring 282
- canonical factorisation 339, 342, 344
- Cassou-Noguès–Fröhlich class 335
- cellular chain 196
- central extension 228
 - classification of 319
- central simple algebra 309
- centre 42, 142
- chain complex 196
- change of rings 183, 184
- character 5, 9
 - Dirichlet 389
 - even/odd 389
- Chinburg invariant
 - local 312, 313, 315, 332
 - global 332
- class-group
 - Hom-description of 115, 116, 147, 343
 - of maximal order 207, 361
- class field theory 262, 348
- class formation 300, 400
- class number 243, 386
- closed subhomomorphism 39
- closure 39
- coboundary 306, 310
- cocycle 308, 309, 317
 - normalised 397
- compact manifold 29
- compactly supported cohomology 52
- complexification 178
- composition factor 316
- conductor 247, 389
 - ideal 335
- cone point 198
- conjugacy class function 13
- contracting homotopy 301
- degree 194
- de Rham–Witt complex 258
- derived series 67
- determinant 114, 178
- determinantal congruence 121, 129, 130
- direct sum 3
- discriminant 248
- division algebra 309, 311, 315
 - maximal subfield of 309
- division ring 125, 309
- Double Coset Formula 19, 22, 194, 214
- Eisenstein polynomial 263
- Euler
 - characteristic 52, 197, 243
 - factor 363
 - Euler’s totient function 290

- exact functor 341
- exact sequence 156, 192, 204, 304, 306, 310, 342
 - based 365
 - cohomology 306, 341
- exponential 122, 332, 383
- exterior power 3, 21, 108
- factorisable functions 206
- field
 - algebraic number 110
 - complete discrete valuation 110, 246, 255, 260, 282, 283
 - cyclotomic 379
 - finite 74, 263
 - local 72, 111, 120, 246, 302
 - residue 126, 246
 - separable residue 246, 248, 277
 - splitting 112, 205
 - totally real 373
 - unramified extension of 120, 131, 152, 316
 - maximal 303
 - tame extension of 138, 319, 328, 331, 334
 - totally ramified extension 263
 - wild extension 331, 332, 336, 361
- fixed points 28, 105, 194, 196, 249, 397
- Fourier transform 78
- fractional ideal 205, 338
 - principal 206
- Frobenius
 - automorphism 74, 93, 120, 303
 - Reciprocity 18, 22
- Fröhlich–Chinburg
 - conjecture 336
 - Fröhlich’s conjecture 107, 336
 - Hom-description 115
- fundamental class 299
- Galois cohomology 258
- Gauss sum 389, 391
- group 1
 - abelian 15
 - absolute Galois 113, 205
 - Borel 73
 - cyclic 26, 56, 62, 118
