|--|----------------|
| <i>Preface</i> | <i>page</i> ix |
| <i>Preface to the second edition</i> | xi |
| 1 Elementary bounds for univalent functions | 1 |
| 1.0 Introduction | 1 |
| 1.1 Basic results | 1 |
| 1.2 Elementary growth and distortion theorems | 4 |
| 1.3 Means and coefficients | 9 |
| 1.4 Convex univalent functions | 11 |
| 1.5 Typically real functions | 13 |
| 1.6 Starlike univalent functions | 14 |
| 1.7 Asymptotic behaviour of the coefficients | 15 |
| 2 The growth of finitely mean valent functions | 28 |
| 2.0 Introduction | 28 |
| 2.1 A length-area principle | 29 |
| 2.2 The growth of multivalent functions | 32 |
| 2.3 Some averaging assumptions on $p(R)$ | 37 |
| 2.4 Simultaneous growth near different boundary points | 40 |
| 2.5 Applications | 42 |
| 2.6 Functions of maximal growth | 45 |
| 2.7 Behaviour near the radius of greatest growth | 48 |
| 3 Means and coefficients | 66 |
| 3.0 Introduction | 66 |
| 3.1 The Hardy–Stein–Spencer identities | 67 |
| 3.2 Estimates of the means $I_2(r)$ | 69 |
| 3.3 Estimates for the coefficients | 71 |
| 3.4 A counter-example | 76 |

| | | |
|----------|---|------------|
| vi | <i>Contents</i> | |
| 3.5 | Coefficients of general mean p -valent functions | 78 |
| 3.6 | Growth and omitted values | 94 |
| 3.7 | k -symmetric functions and Szegő's conjecture | 95 |
| 3.8 | Power series with gaps | 98 |
| 4 | Symmetrization | 103 |
| 4.0 | Introduction | 103 |
| 4.1 | Lipschitzian functions | 104 |
| 4.2 | The formulae of Gauss and Green | 105 |
| 4.3 | Harmonic functions and the problem of Dirichlet | 107 |
| 4.4 | The Dirichlet integral and capacity | 109 |
| 4.5 | Symmetrization | 112 |
| 4.6 | Symmetrization of functions | 116 |
| 4.7 | Symmetrization of condensers | 119 |
| 4.8 | Green's function and the inner radius | 122 |
| 4.9 | The principle of symmetrization | 127 |
| 4.10 | Applications of Steiner symmetrization | 128 |
| 4.11 | Applications of circular symmetrization | 130 |
| 4.12 | Bounds for $ f(z) $ and $ f'(z) $ | 133 |
| 4.13 | Bloch's Theorem | 136 |
| 4.14 | Some other results | 140 |
| 5 | Circumferentially mean p-valent functions | 144 |
| 5.0 | Introduction | 144 |
| 5.1 | Functions without zeros | 145 |
| 5.2 | Functions with a zero of order p at the origin | 148 |
| 5.3 | Regularity Theorems: the case $\alpha = 0$ | 150 |
| 5.4 | The case $\alpha > 0$: the minor arc | 152 |
| 5.5 | The major arc | 154 |
| 5.6 | Proof of Theorem 5.5 | 155 |
| 5.7 | Applications: the case $\lambda = 1$ | 158 |
| 5.8 | Functions with k -fold symmetry | 159 |
| 5.9 | Some further results | 162 |
| 6 | Differences of successive coefficients | 165 |
| 6.0 | Introduction | 165 |
| 6.1 | The basic formalism | 167 |
| 6.2 | An application of Green's formula | 169 |
| 6.3 | Estimates for the first term in (6.19) | 172 |
| 6.4 | A 2-point estimate | 176 |
| 6.5 | Statement of the basic theorem | 180 |

| <i>Contents</i> | | vii |
|-----------------|---|-----|
| 6.6 | Proof of Theorem 6.2 | 183 |
| 6.7 | Coefficient differences of k -symmetric functions | 185 |
| 6.8 | Asymptotic behaviour | 186 |
| 6.9 | Starlike functions | 188 |
| 6.10 | The theorems of Dawei Shen | 191 |
| 7 | The Löwner theory | 197 |
| 7.0 | Introduction | 197 |
| 7.1 | Boundary behaviour in conformal mapping | 198 |
| 7.2 | Transformations | 200 |
| 7.3 | Structure of infinitesimal transformations | 203 |
| 7.4 | The class \mathfrak{S}_1 | 204 |
| 7.5 | Continuity properties | 207 |
| 7.6 | The differential equation | 209 |
| 7.7 | Completion of proof of Theorem 7.1 | 211 |
| 7.8 | The third coefficient | 215 |
| 7.9 | Coefficients of the inverse functions | 222 |
| 7.10 | The argument of $f(z)/z$ | 224 |
| 7.11 | Radii of convexity and starshapedness | 226 |
| 7.12 | The argument of $f'(z)$ | 228 |
| 7.13 | Conclusion | 229 |
| 8 | De Branges' Theorem | 230 |
| 8.0 | Introduction | 230 |
| 8.1 | Legendre polynomials | 231 |
| 8.2 | Proof of Milin's conjecture: preliminary results | 236 |
| 8.3 | The Milin–Lebedev inequalities | 243 |
| 8.4 | Proof of de Branges' Theorem | 247 |
| 8.5 | Some further results | 248 |
| | <i>Bibliography</i> | 255 |
| | <i>Index</i> | 261 |
