<i>List of Contributors</i>	<i>page</i> xii
<i>Preface</i>	xiii
<i>Conventions</i>	xvii
<i>Disclaimer</i>	xix
PART I THE SERIAL INTERFACE	1
1 The RS-232 Standard	3
1.1 Introduction	3
1.2 Circuits	5
1.3 Voltages	9
1.4 Connectors	9
1.5 Problems with RS-232	10
2 Transmission of data	12
2.1 Introduction	12
2.2 Asynchronous transmission	13
2.3 Timing of data-line sampling	16
3 Flow control	18
3.1 Introduction	18
3.2 Hardware handshaking	18
3.3 Software handshaking	19
3.4 The checksum	21

Table of Contents

[More information](#)

viii	<i>Contents</i>	
4	The PC serial interface	25
4.1	Introduction	25
4.2	The UART	25
4.3	UART addresses	30
4.4	UART registers	32
4.5	Handling of serial I/O	41
5	Serial interface programming in QuickBASIC	44
5.1	Introduction	44
5.2	Opening a serial port	45
5.3	Outputting data to a peripheral device	50
5.4	Inputting data from the serial port	51
5.5	Opening a data-file	56
5.6	Reading hidden control characters	57
5.7	Accessing data using ON COM	60
5.8	Accessing a reply code	63
5.9	Emptying the Receive buffer	64
5.10	Reading a data-file	65
5.11	Use of the LTRIM\$ function	66
5.12	Time delays	67
5.13	Trapping errors	68
5.14	Trapping keys	70
5.15	The checksum	71
5.16	Controlling the output control lines	72
5.17	Monitoring the input control lines	78
PART II	MISCELLANEOUS TOPICS	81
6	Kermit	83
6.1	Introduction	83
6.2	Setting up Kermit	83
6.3	Running Kermit	85
6.4	Problems with Kermit	87
7	Electrical safety and the PC	88
7.1	Introduction	88
7.2	General aspects of electrical safety	90
7.3	Safety of Medical Electrical Equipment	91
7.4	General precautions when using PCs	95

<i>Contents</i>		ix
8	Data analysis	98
8.1	General aspects	98
8.2	Software tools	100
8.3	Analysis of pulse oximetry data	102
PART III THE EQUIPMENT		109
9	The Ohmeda 3700 and 3740 pulse oximeters	111
9.1	Introduction	111
9.2	Serial port	113
9.3	Auto-output mode	115
9.4	Control mode	117
9.5	Trend mode (manual operation)	118
9.6	Trend mode (initiated by computer)	121
9.7	Waveform mode	124
9.8	Slave mode	127
10	The Nellcor N-200E pulse oximeter	129
10.1	Introduction	129
10.2	Serial port	131
10.3	Beat-to-beat mode	134
10.4	Computer mode	136
10.5	Conversation mode	141
10.6	Accessing stored data	144
11	The Novametrix 515A pulse oximeter	154
11.1	Introduction	154
11.2	Serial port	156
11.3	Accessing real-time data	158
12	The Minolta Pulsox-7 pulse oximeter	160
12.1	Introduction	160
12.2	Serial port	161
12.3	Real-time data	162
12.4	Trend data	164
13	The Datex Cardiocap™ II and Capnomac Ultima™ series of monitors	176
13.1	Introduction	176
13.2	Serial/analog port	179
13.3	Data format	182

x	<i>Contents</i>	
	13.4 Status codes	197
	13.5 Example program	200
14	The Graseby 3400 syringe pump	211
	14.1 Introduction	211
	14.2 Serial port	214
	14.3 Commands and replies	216
	14.4 Example interactive program	221
	14.5 Programming a continuous infusion	224
15	The Ohmeda 9000 syringe pump	241
	15.1 Introduction	241
	15.2 Serial port	244
	15.3 Commands and replies	246
	15.4 The checksum	248
	15.5 Data-logging	251
	15.6 Local mode	256
	15.7 Remote mode	257
	15.8 Interactive program for Local/Remote mode	258
	15.9 Programming a continuous infusion	264
16	The Vitalograph Compact II spirometer	272
	16.1 Introduction	272
	16.2 Serial port	273
	16.3 Communication Modes	275
	16.4 Data format	276
	16.5 Serial Mode 1 (printout without graphs)	280
	16.6 Serial Modes 3, 4, 5 (results and flow data)	283
17	The Ohmeda 7800 ventilator	295
	17.1 Introduction	295
	17.2 Serial port	296
	17.3 Communication modes	297
	17.4 Commands and replies	298
	17.5 Data formats	300
	17.6 The checksum	304
	17.7 Example interactive program	306
18	The Dräger Evita intensive care ventilator	313
	18.1 Introduction	313
	18.2 Serial port	314
