Acknowledgment

I acknowledge with thanks the contribution of friends and colleagues from the Department of Obstetrics and Gynaecology at the Royal Devon and Exeter Hospital (Heavitree) who gave me the opportunity to write this book, and also that of Professor Ted Wragg of the University of Exeter for his encouragement. I would like to dedicate it to my undergraduate students, past and present, for their unfailing enthusiasm and interest in this subject.

Contents

1	Human reproductive strategies	5
1.1	An evolutionary perspective	6
1.2	Ethnic and religious factors	9
1.3	Human reproduction – an overview	9
2	Gamete production	10
2.1	Cell cycle	10
2.2	The significance of meiosis	12
2.3	Hormonal control of gamete production	13
2.4	Gametogenesis	14
2.5	Spermatogenesis	16
2.6	Oogenesis	17
2.7	Ovulation	20
2.8	Atresia	21
2.9	Formation of the corpus luteum	21
3	Fertilisation	22
3.1	Final preparation of the gametes	22
3.2	Cellular events of gamete interaction	28
3.3	Chromosomal events leading to the first cleavage	30
3.4	Sex determination	31
4	Implantation and pregnancy	33
4.1	Significance of viviparity	33
4.2	Development of embryo from fertilisation to implantation	34
4.3	Implantation	36
4.4	Functions of the placenta and extraembryonic membranes	38
4.5	Formation of twins	39
4.6	Outline of fetal development to birth	40
4.7	Development of the reproductive system	42
4.8	Preparation for extrauterine life	45
4.9	Physiological and psychological effects of pregnancy	46
4.10	Antenatal health care	47
4.11	Termination of pregnancy	53
4.12	Embryo research	53

5	Birth and lactation	55
5.1	The perinatal period	55
5.2	Stages of normal labour	55
5.3	Medical intervention	57
5.4	Physiological changes	60
5.5	Lactation	60
5.6	The puerperal period	62
6	Contraception	63
6.1	Worldwide issues of population growth	63
6.2	Mechanisms of available methods	64
6.3	Recent advances in contraception	68
7	Human infertility: background and causes	72
7.1	Problems of subfertility	73
7.2	Conditions needed for conception	74
7.3	Preliminary diagnosis of infertility and subfertility	75
7.4	Causes of infertility	76
7.5	Options for the infertile couple	80
8	Human subfertility: options and treatment	81
8.1	Problems of gamete production	81
8.2	Problems of gamete interaction	87
8.3	Problems of implantation	93
8.4	Sex selection	93
9	Ethical and moral considerations of fertility and infertility	94
9.1	Introduction	94
9.2	Abortion	95
9.3	Contraception	98
9.4	Assisted reproduction	99
9.5	Sex selection	105
9.6	Embryo research	106
9.7	Conclusion	109
	Index	110
