<i>Introduction</i>	<i>page</i> ix
<b>1 Asymptotic Efficiency of Statistical Tests and Mathematical Means for Its Computation</b>	<b>1</b>
1.1 General Approach to Computation of Asymptotic Efficiency	1
1.2 Bahadur Asymptotic Relative Efficiency	4
1.3 Hodges–Lehmann Asymptotic Relative Efficiency	13
1.4 Pitman Asymptotic Relative Efficiency	15
1.5 Different Approaches to the Definition of the ARE	18
1.6 Some Results on Probabilities of Large Deviations	21
1.7 On Large Deviations of Empirical Measures in the Case of Several Independent Samples	33
1.8 Some Results from the Theory of Extremal Problems and the Theory of Implicit Operators	36
<b>2 Asymptotic Efficiency of Nonparametric Goodness-of-Fit Tests</b>	<b>40</b>
2.1 Problem Statement and Tests under Consideration	40
2.2 Large Deviations of Kolmogorov–Smirnov-Type Statistics	42
2.3 Large Deviations of Integral Statistics. Euler–Lagrange Equations	50
2.4 Large Deviations of Integral Statistics. Constructing Solutions of the Euler–Lagrange Equations	57
2.5 Large Deviations of Integral Anderson–Darling, Watson, and Khmaladze–Aki Statistics	66

vi	<i>Contents</i>	
2.6	Bahadur Efficiency of Goodness-of-Fit Tests	73
2.7	Hodges–Lehmann ARE of Goodness-of-Fit Tests	81
2.8	Hodges–Lehmann and Chernoff Efficiencies of the Smirnov Statistic	89
<b>3</b>	<b>Asymptotic Efficiency of Nonparametric Homogeneity Tests</b>	<b>94</b>
3.1	Problem Statement and Tests under Consideration	94
3.2	Large Deviations of Integral Two-Sample Statistics	97
3.3	Bahadur Efficiency of Homogeneity Tests	101
3.4	Hodges–Lehmann Efficiency of Homogeneity Tests	105
3.5	Hodges–Lehmann and Chernoff Efficiencies of Linear Rank Tests	109
3.6	Asymptotic Comparison of Tests in Problems of Signal Detection in Noise of Unknown Level	120
<b>4</b>	<b>Asymptotic Efficiency of Nonparametric Symmetry Tests</b>	<b>127</b>
4.1	Problem Statement and Tests under Consideration	127
4.2	Large Deviations of Kolmogorov-Type and Signed Rank Statistics	130
4.3	Large Deviations of Integral Statistics for Testing Symmetry	136
4.4	Bahadur Efficiency of Symmetry Tests	143
4.5	Hodges–Lehmann Efficiency of Symmetry Tests	147
4.6	Hodges–Lehmann and Chernoff Efficiencies of the Sign and the Wilcoxon Statistics	151
4.7	Hodges–Lehmann and Chernoff Efficiencies of Linear Signed Rank Tests	155
4.8	Approximate Bahadur and Pitman Efficiencies of Symmetry Tests	164
<b>5</b>	<b>Asymptotic Efficiency of Nonparametric Independence Tests</b>	<b>169</b>
5.1	Problem Statement and Tests under Consideration	169
5.2	Large Deviations of Kolmogorov-Type Statistics	171
5.3	Large Deviations of Integral Statistics for Independence Testing	181
5.4	Bahadur Efficiency of Independence Tests	190
5.5	Large Deviations of Statistics for Testing Uniformity on a Square	196

<i>Contents</i>		vii
5.6	Local Exact Slopes	202
5.7	Hodges–Lehmann Efficiency of Independence Tests	205
<b>6</b>	<b>Local Asymptotic Optimality of Nonparametric Tests and the Characterization of Distributions</b>	<b>208</b>
6.1	Introduction and Statement of the Problem	208
6.2	Domains of the Bahadur Local Asymptotic Optimality (LAO) of Goodness-of-Fit Tests	211
6.3	Characterization of Distributions by the LAO Property of Goodness-of-Fit Tests under Concrete Alternatives	222
6.4	The LAO Domains for Homogeneity Tests	231
6.5	The LAO Domains for Symmetry Tests	238
6.6	The LAO Domains for Independence Tests	241
	<i>Bibliography</i>	249
