- acyclicity lemma, 75
- affine scheme, 142
- annihilator ideal, 4
- Artin approximation theorem, 137
- Artin-Rees lemma, 27
- associated graded ring, 26
- associated prime, 4–6
- Auslander-Buchsbaum theorem, 78
- Auslander-Buchsbaum-Serre theorem, 80
  
- basic open set, 148
- Bass numbers, 85
- Betti numbers, 76
- Bézout's theorem, 174
  
- canonical element conjecture, 113, 123
- canonical sheaves of the Grassmannian, 210, 215, 219
  - Chern classes of, 180, 182, 220
  - homological computation of, 220, 223
  - global definition, 212
- catenary ring, 72
- Chern character, 196
  - additive property, 198
  - of an  $m$ -primary matrix, 249
  - multiplicative property, 198
- Chern class, 180, 182
  - commutativity of, 192
  - composition of, 190
  - definition of, 186
  - functorial properties of, 187
  - independence modulo rational equivalence, 190
  - of an  $m$ -primary matrix, 232, 234, 235
  - of a rank one sheaf, 181
- Chow group, 9
  - of Proj of a symmetric algebra, 183
  - rational, 196
- Cohen-Macaulay module, 66
  - ring, 66, 70, 87, 250, 295, 229
- coherent sheaf, 200
- commutativity of intersection with divisors, 171, 172, 251
- complete intersection, 70
  - Todd class of, 274
- complex
  - bounded, 43
  - double, 52
  - dualizing, 86, 99
  - elementary, 262
  - exact sequence of, 43
  - homology of, 43
  - Koszul, 57, 78, 171, 201, 265, 269
  - minimal, 76
  - of modules, 42
  - total, of a double complex, 52
- condition on generators of a graded ring, 146
- cycle
  - defined by a module, 9
  - defined by a complex, 237, 239, 240, 243
  - group of cycles, 8
  
- degree
  - of an element, 19
  - of a graded module, 115, 175
- depth, 64
- determinantal ideals, 221
- dimension, 8, 28, 29, 31, 72
  - of a graded module, 144
  - of a  $\mathbb{Z}^n$ -graded module, 154
- divisor, 189
  - effective, 167
  - intersection with, 94, 167, 169
  - sum of divisors, 170
- divisor class group, 12
- divisorial ideal, 10
- dualizing complex, 86, 99
- Dutta multiplicity, 121, 132, 258, 284, 294–96

- essential extension, 82  
 Euler characteristic, 95, 104, 235, 280, 295  
   partial, 109  
   of a dual complex, 295  
 exterior powers of locally free sheaves, 212
- flat map, 12, 144, 190  
 flat pull-back, 13, 145  
 finite projective dimension, 75  
 fractional ideal, 10  
 free resolution, 43, 77  
   of a complex, 49  
   minimal, 76  
 Frobenius map, 121
- Gorenstein ring, 70, 89  
   Todd class of, 274  
 grade of a module, 110  
 graded  
   ring, 18, 146  
     condition on generators, 146  
   module, 18  
   submodule, 19  
 graph construction, 236  
 Grassmannian, 207, 232  
   algebraic description of, 208  
   canonical sheaves of, 210, 215, 219  
   direct sum map on, 217, 218  
   global definition, 212  
   graded ring of, 208  
   functorial properties of, 216  
   local description of, 208  
   sections of, 209, 215, 216, 219
- height of a prime ideal, 8  
 Hilbert function, 146, 147  
   of a  $\mathbb{Z}^n$ -graded module, 152  
 Hilbert polynomial, 23, 114, 115, 146, 153, 154  
   degree of, 155  
   of a polynomial ring, 21  
   leading polynomial of, 153  
 Hilbert-Kunz multiplicity, 121, 132, 134, 135  
 Hilbert-Samuel polynomial, 27  
 homogeneous element, 19  
 homological conjectures, 107  
 homotopic maps, 44  
 homotopy category, 45  
 hyperplane section, 164, 165, 183, 189  
   functorial properties of, 166
- improved new intersection conjecture, 113  
 index group, 19  
 injective hull, 82  
 injective module, 82  
 integral  
   element, 35  
   extension of ideals, 35  
 integrally closed domain, 10  
 intersection multiplicity, 286, 291  
   Serre, 105, 107, 108, 287  
   conjectures on, 108  
   negative, 288, 291, 293  
 intersection product, 286  
 intersection theorem  
 intersection with divisors, 94, 167, 169  
   commutativity of, 171, 172, 251  
 irrelevant ideal, 19, 142, 148
- Koszul complex, 57, 58, 171, 201, 265, 269  
   inductive construction of, 59  
 Krull dimension, 7  
 Krull principal ideal theorem, 32
- Lech's lemma, 101  
 local Chern character of a complex, 236, 241, 243, 253  
   additivity of, 258, 260  
   commutativity of, 254, 256  
   functorial properties of, 243  
   multiplicativity of, 266  
   of a dual complex, 266  
   of an exact complex, 242  
 local Riemann-Roch formula, 258, 262, 280, 284, 293  
 local ring, 7, 28  
   regular, 33, 64, 66, 80  
 localization  
   exact sequence of, 14  
 locally free sheaf, 178
- $\mathfrak{m}$ -primary ideal, 231, 235  
 mapping cone, 49  
 minimal  
   free complex, 76  
   injective complex, 85  
   injective resolution, 85  
   free resolution, 76  
 module  
   Cohen-Macaulay, 66  
   graded, 18  
   graded free, 114  
   grade of, 110  
   Noetherian, 3  
   of finite length, 89  
 monomial conjecture, 113  
 multigraded ring, 146  
 multiplicity  
   Buchsbaum-Rim, 40  
   Dutta, 121, 132, 284, 294–296  
   Hilbert-Kunz, 121, 132, 134, 135  
   mixed, 38  
   of regular local ring, 34  
   Samuel, 32, 104, 134, 262

- new intersection theorem, 123, 296  
   proof in mixed characteristic, 296  
 Noetherian, 3  
  
 Peskine-Szpiro intersection theorem, 111, 295  
 Plücker embedding, 207, 208  
 positive cone, 146, 147  
   with vertex at zero, 147  
 prime ideal, 3  
 prime avoidance, 149  
 product of projective schemes, 163  
 projective map, 144, 156, 157, 160  
 projective scheme, 142, 148  
   of a  $\mathbb{Z}^n$ -graded ring, 147  
   of a symmetric algebra, 182  
 proper map, 156, 157  
 proper push-forward of cycles, 157  
   of rationally equivalent cycles, 161  
 pullback of a sheaf, 178  
 push-forward of complexes of sheaves, 200,  
   201  
   on a free graded ring, 203  
   additivity of, 204  
   coherence of, 204  
  
 quasi-isomorphism, 45  
 quasi-projective map, 156  
  
 rational equivalence, 9, 143  
 rational Chow group, 196  
 reduction of ideals, 35  
 reduction to the diagonal, 108  
 regular local ring, 33, 64, 66, 80  
 regular sequence, 60  
 Rees ring  
   of an ideal, 26  
   of a set of ideals, 36  
   of a module, 36  
 rigidity of Tor, 110  
 Riemann-Roch theorem, 274, 278  
  
 Samuel multiplicity, 32, 104, 134, 262  
 scheme  
   Segre class, 187  
   Serre's conjectures, 108  
 sheaf, 178  
   coherent, 200  
   locally free, 178  
   pull-back of, 178  
   functorial properties of, 179  
 Spec, 4  
 spectral sequence, 55  
 splitting map, 265, 281  
 splitting principle, 195, 196, 198  
   for complexes, 262, 263, 267  
 support  
   of a module, 4–6  
   of a Cohen-Macaulay ring, 68  
   of a complex, 236  
   of a matrix, 232  
 symmetric algebra, 145, 157, 181  
 system of parameters, 32, 104  
  
 tight closure, 121, 134  
 Todd class, 269, 271  
   component of highest dimension, 274  
   independence of embedding  
   of a local ring, 274, 295  
   of a complete intersection, 274  
   of a Gorenstein ring, 274  
 trivial cycle, 237, 242  
 type of a module, 70  
  
 Unmixedness theorem, 70  
  
 Whitney sum formula, 192, 194, 196  
  
 $\mathbb{Z}$ -graded ring, 142  
 $\mathbb{Z}^n$ -graded ring, 147  
 Zariski topology, 15, 142  
 zero-divisor, 4
