The Western Medical Tradition

The Western Medical Tradition, 1800–2000 gives an account of the last two centuries of the development of 'Western' medicine, a tradition now important worldwide. It is a new account, written by leading experts who not only describe the most important people, events, and transformations, but give explanations for why medicine developed as it did, becoming as important as it has in the modern world. It contains one of the first historical summaries of the development of medicine after the Second World War. It is an authoritative source of new information as well as a synthesis of the current state of knowledge on this fascinating subject.

The Western Medical Tradition, 1800–2000 is a companion volume to *The Western Medical Tradition, 800 BC to AD 1800*.

W. F. Bynum is Professor Emeritus of the History of Medicine at University College London. He is the co-editor (with Roy Porter) of *Medicine and the Five Senses* (Cambridge, 1993), and *William Hunter and the 18th Century Medical World* (Cambridge, 1985), and author of *Science and the Practice of Medicine* (Cambridge, 1994).

Anne Hardy is Reader in the History of Medicine at the Wellcome Trust Centre for the History of Medicine at University College London. She is the author of *The Epidemic Streets: Infectious Disease and the Rise of Preventive Medicine, 1856–1900* (1993), and *Health and Medicine in Britain since 1860* (2001). She is the co-editor of *Women and Modern Medicine* (2001) and *The Road to Medical Statistics* (2002).

Stephen Jacyna is Senior Lecturer at the Wellcome Trust Centre for the History of Medicine at University College London. He is the co-author (with Edwin Clarke) of *Nineteenth-Century Origins of Neuroscientific Concepts* (1987), *Philosophic Whigs: Science, Medicine and Citizenship in Edinburgh, 1789–1848* (1994), and *Lost Words: Narratives of Language and the Brain, 1825–1926* (2000).

Christopher Lawrence is Professor of the History of Medicine at the Wellcome Trust Centre for the History of Medicine at University College London. He is the author of *Medicine in the Making of Modern Britain* (1994), and *Rockefeller Money, the Laboratory and Medicine in Edinburgh, 1919–1930: New Science in an Old Country* (2005).

E. M. (Tilli) Tansey is Reader in the History of Modern Medical Sciences at the Wellcome Trust Centre at University College London, and convenor of the Wellcome Trust's History of Twentieth Century Medicine Group, which organises and publishes the highly successful *Wellcome Witnesses to Twentieth Century Medicine* series (1997–present). She has published widely in scientific, medical, and historical journals and is the co-editor of *Women Physiologists* (1993), *Ashes to Ashes: The History of Smoking and Health* (1998), and *Biographies of Remedies* (2002).

List of Illustrations

- | | | |
|------|---|---------|
| 1.1. | Sections of lung showing the cavities and lesions of tuberculosis. | page 43 |
| 1.2. | Monaural stethoscope made of cedar wood with a 2 cm hollow core, designed by Laennec. | 44 |
| 1.3. | The Parisian surgeon and anatomist, Alfred Velpeau (1795–1867), performing an anatomical dissection, 1864. | 62 |
| 1.4. | Chest microscope made by ‘Dolland, London’, c. 1800. In 1758, John Dolland had corrected chromatic aberration by using a combination of crown glass (containing no lead or iron) and flint glass in lenses. | 70 |
| 1.5. | Drawing of a histological section from Virchow’s <i>Die Cellularpathologie</i> (1859), showing the cells of a cancerous epithelial tumour of the lip. | 76 |
| 1.6. | Distributing tickets for food during the Lancashire cotton famine (1861–2) resulting from the American Civil War; 250,000 people were supported by the rates and as many others helped by private charity. | 83 |
| 1.7. | ‘A Court for King Cholera’. Cartoon characterizing the sanitarian preoccupation with filth and muck in overcrowded city slums, to which the poor were often held to be indifferent. | 94 |
| 2.1. | Rabies vaccination in Pasteur’s clinic in Paris. Pasteur stands in the foreground reading from a paper, 1887. | 127 |
| 2.2. | The Johns Hopkins Hospital in 1905. | 149 |
| 2.3. | Mark Ward, a pavilion ward at St. Bartholomew’s Hospital, London, c. 1908. Adult males and young boys are nursed together. | 153 |
| 2.4. | Lincoln Hospital, Washington, DC. Archetypal pavilion hospital, having twenty-one ward blocks arranged in a ‘V’ with central administrative and service buildings. | 154 |
| 2.5. | Stanley Boyd, senior surgeon at Charing Cross Hospital, London, prepares to operate, 1900. Theatre staff wear rubber gloves and gowns over outdoor clothes, but no face masks or hats. | 160 |

List of Illustrations

- | | | |
|-------|---|-----|
| 2.6. | Helmholtz's ophthalmoscope was devised to show that light entering the eye reflected back to its source and could form an optical (virtual) image of the retina. | 168 |
| 2.7. | Patients suffering from cholera in the Jura during the 1854 epidemic, attended by Dr. Paul-Ferdinand Gachet (1828–1909). | 189 |
| 2.8. | A pavilion-type ward in Hampstead Smallpox Hospital, London, 1871. | 193 |
| 2.9. | Emily Gosse on her deathbed, 1857. | 208 |
| 2.10. | David Livingstone's medicine chest. After losing a similar chest on his last expedition, he wrote: 'I had a fit of insensibility, which shows the power of fever without medicine.' | 234 |
| 2.11. | Constructing the Pedro Miguel locks, Panama Canal, 1907. Mosquito control and the use of nets and screens helped keep workers nearly free from malaria and yellow fever. | 237 |
| 2.12. | Researchers outside the British experimental hut near Ostia, Italy, to verify the mosquito-malaria theory, June–October 1900. | 238 |
| 3.1. | British army stretcher bearers, World War I. | 255 |
| 3.2. | Finsen lamp treatment, Guy's Hospital, London, 1925. In order for the UV rays sufficiently to penetrate the skin, a section of rock crystal was held in place by a nurse and water circulated to prevent burns. | 275 |
| 3.3. | Nurses and medical staff carry out tests and attend patients at the bedside in a ward at Long Hospital, Indianapolis, Indiana, c. 1920–5. | 276 |
| 3.4. | Franzenbad Spa, Czechoslovakia. Visitors promenaded the two paths leading to a C-shaped building that houses the Natalie Spring, 1930s. | 288 |
| 3.5. | Ernst Bumm (1858–1925), Professor of Gynaecology at the Charité Hospital, Berlin, operating on a patient while an anaesthetist administers ether dropped onto a gauze mask from a bottle, 1920. | 294 |
| 3.6. | Poster published by the Eugenics Society promoting 'wise' marriage for the sake of producing sound children, 1930s. | 328 |
| 3.7. | In a typical day at Highgate New Town Clinic, north London, a nurse syringes a child's ear while others wait their turn. Another nurse bandages a patient's head, c. 1925. | 337 |
| 3.8. | Leaflet issued by the Medical Women's Federation to promote BCG among schoolchildren, 1930s. | 339 |

List of Illustrations

- | | | |
|-------|---|-----|
| 3.9. | Soviet poster warns that after the defeat of the White 'parasites', a new calamity threatens in the form of the typhus louse, against which the Red Army must fight by washing themselves and their clothes vigorously, 1921. | 356 |
| 3.10. | Members of the Malaria Commission of the League of Nations collecting mosquito larvae on the Danube delta, 1929. | 366 |
| 3.11. | British RAMC poster issued during the anti-VD campaign among Allied troops in Italy, 1943–4. | 386 |
| 4.1. | Photomicrograph of a fibroblast-like cell, and nerve fibres cultured from chick embryo tissue. | 411 |
| 4.2. | MRC research establishments: the creation and lifespan of MRC Research Units 1913–1960. | 418 |
| 4.3. | Death rate for TB, England and Wales, 1841–1970. | 425 |
| 4.4. | Death rate for TB, United States, 1900–90. | 426 |
| 4.5. | British antismoking poster prepared for the Ministry of Health, 1960. | 429 |
| 4.6. | Changes in death rates from CHD, men and women aged 35–74, between 1986 and 1996, selected countries. | 430 |
| 4.7. | Death rates from CHD, men and women aged 35–74, 1996, selected countries. | 431 |
| 4.8. | Reported AIDS cases in Europe: cumulative rates per million population to December 1993. | 434 |
| 4.9. | Total number of GPs per 100,000 population, various countries, 1960–92. | 440 |
| 4.10. | 'Founding' specialist hospice/palliative care services in seven European countries. | 446 |
| 4.11. | A theatre nurse monitoring a patient in the recovery room after surgery, Chelsea and Westminster Hospital, London, 1995. | 448 |
| 4.12. | General practitioners as a percentage of all physicians, various countries, 1960–90. | 453 |
| 4.13. | Total number of physicians (i.e., total medically qualified personnel) per 100,000 population, various countries, 1960–90. | 460 |
| 4.14. | Smallpox: graph showing decline since 1950. | 465 |
| 4.15. | WHO poster offering \$1,000 reward to 'the first person reporting an active smallpox case resulting from human to human transmission and confirmed by laboratory tests.' The reward was valid until global eradication was confirmed in 1980. | 466 |

Acknowledgements

The authors would like to thank their editor at Cambridge University Press, Frank Smith, for his patience with this project. In early 2000, Roy Porter reinvigorated the plans for this volume; from the autumn of 2000, Harold J. Cook coordinated the efforts of the authors and subsequently wrote the introduction. Caroline Overy provided crucial research assistance, especially in the compilation of the tables and charts, timelines, and illustrations. Carole Reeves read the final versions of all the chapters and edited them for voice and consistency. The authors owe a special thanks to the Wellcome Trust, whose continuing support for the history of medicine has made this and many other projects possible.
