## INDEX

- attractor, strange 9, 138
- attractor, Hénon-like 141, 143
- Axiom A 3, 6
  
- basic set 3, 7, 92, 169
- basic sets and negative eigenvalues 347
- bifurcation set 338
- bounded distortion property 58
- bridge 61
  
- Cantor set, affine 57
- Cantor set, dynamically defined 56, 58, 75, 80, 85
- Cantor set, generalized affine 57
- Cantor set, mid- $\alpha$  57
- chaos 8
- chaos, apparent 34
- conjugacy 2
- connection 342
- curve of tangencies 98
- cycle 5
- cycle, heteroclinic 92
  
- denseness 62, 79, 85
- denseness, local 85
- diffeomorphism, Anosov 4
- diffeomorphism, Morse-Smale 4
- difference 62
- dissipative 29, 34, 101
  
- entropy, topological 144
- expanding structure 54
- expansive 4
  
- filtration 92
- first bifurcation 99, 102
- foliation, stable, unstable 26, 27, 52, 98, 162, 166, 338
  
- gap 61, 63
- generic unfolding (of a homoclinic tangency) 35
- graph transform 154
  
- Hausdorff  $\alpha$ -measure 60
- Hausdorff dimension 53, 60, 64, 67, 77, 79, 85, 111
- Hausdorff dimension, stable or unstable 92, 99, 101
- homoclinic 11, 18
- homoclinic bifurcation or homoclinically bifurcating 15, 134
- homoclinic point 337
- homoclinic, primary 18
- homoclinic (heteroclinic) tangency 7, 341
- homoclinic  $\Omega$ -explosion 339
- horseshoe 14
- hyperbolic(ity) 1, 92, 102, 339
- hyperbolic set 156, 157, 338
  
- infinitely many circles 346
  
- lemma,  $\lambda$ - 155
- limit capacity 61, 62, 67, 85, 339, 358
- limit capacity, stable or unstable 92, 99, 101, 109, 110, 111, 339
- limit set, positive, negative 2, 107
- limit set, hyperbolic 93
- linearizing coordinates 163
- Lyapunov exponent 145
  
- manifold, (generalized) (local) (un)stable 154, 155, 158, 181
- manifold, centre-((un)stable) 160
- Markov partitions 55, 171
- maximal invariant set 92
- measure of bifurcation set 111
- mixing, topologically 169
  
- nonhyperbolic diffeomorphisms 137
- nonwandering 2, 337
- normally hyperbolic invariant manifold 160
