

## INDEX

- apparent momentum, 74, 88  
 Arnold's variational principle, 276
- barotropic fluid, 1  
 Beltrami flows, 19  
 Bernoulli constant, 19  
 Bernoulli equation extension, 19  
 Biot–Savart law, 34
  - singular behaviour, 36
  - with surfaces, 40
 Birkhoff–Rott equation, 142, 146–8
  - finite thickness modification, 160
 Bragg–Hawthorne equation, 72, 289  
 Burgers vortices
  - non axisymmetric, 266
  - stability, 267
- complex lamellar, 19  
 co-operative instability
  - effect of axial flow, 249
  - Fredholm alternative, 245
  - physical explanation, 238
  - staggered double row, 239
 Crow instability, 235
- D'Alembert's paradox, 82
- elliptical patches
  - Kida unsteady vortex, 167
  - Kirchhoff rotating vortex, 167
  - Moore–Saffman equilibrium vortex, 168
  - in simple shear, 175
  - stability, 173–4
 elliptical vortex approximation, 170, 189  
 energy dissipation, 69
- Föppl vortices, 43, 121  
 Frenet–Serret formulae, 34
- gyroscopic analogue, 7
- helical vortex, 213, 240  
 Hill's spherical vortex, 23, 25, 72, 195, 199
  - stability, 25
  - with swirl, 72
- image vorticity, 41, 47, 74, 88, 119
  - for a cylinder, 42
  - for a plane, 41
  - for a sphere, 43
 impulsive forces, 51, 57  
 impulsive pressure, 52, 60
  - boundary condition, 58
 induced drag, 107, 113, 260, 273
  - elliptical loading, 272
  - light-loading approximation, 271
  - Prandtl's lifting-line theory, 272
  - Trefftz plane, 272
- Karman street wake model, 136  
 Kasper wing, 122, 160  
 Kirchhoff–Routh function, 124, 138  
 Klein's Kaffeelöffel experiment, 95, 105  
 Kutta condition, 109, 111, 121  
 Kutta lift, 8, 48, 80, 106, 205, 218–19
- Lamb surfaces, 19  
 Lamb–Oseen vortex, 253–4  
 line vortex, 34, 43–4, 70, 119
  - curved, 36–7

310 *Index*

- (line vortex, *continued*)  
 rectilinear, 35, 38–9, 41–2, 48, 64, 254  
 Lundgren's transformation, 268–70
- mixing layer model, 170
- point vortices, 64  
 point vortex array instability  
 double row, 134–5  
 finite amplitude pairing instability, 132, 135  
 single row, 131–3  
 Poisson brackets for patch moments, 279  
 Prandtl–Batchelor flows, 160
- Rankine vortex, 22, 167  
 rate of strain tensor, 6, 13  
 rectilinear vortex filament, *see* Rankine vortex
- Sadovskii vortices, 160, 179  
 Schrödinger equation, 210  
 solid angle, 35  
 Stuart vortices, 189  
 stability, 190  
 symplectic integration, 285
- thin cored vortex rings, 192  
 compressible, 205  
 with elliptical cross-section, 205  
 energy, 104  
 hollow or stagnant, 195  
 speed, 104  
 viscous, 204
- torque on moving body, 6, 82–4, 90  
 trailing vortices, 215, 257, 293  
 axial flow, 259  
 Batchelor's far field flow, 259–60  
 effects of viscosity, 259  
 Moore–Saffman profiles, 261–3  
 spiral structure, 263  
 turbulent line vortex, 255–6
- vector potential, 3–5, 63, 68  
 of a dipole, 49  
 of a line vortex, 34  
 virtual mass tensor, 81, 83–4  
 viscous effects, 67, 259, 261  
 vortex  
 definition, 10, 63  
 knottedness, 70  
 lines, 8  
 null, 9  
 pair approaching a slit, 127  
 pair in a channel, 119  
 sheet lines, 25, 33  
 tube strength, 9, 13, 22  
 tubes, 10, 13, 15, 40, 285
- vortex breakdown  
 quasi parallel approximation, 289  
 regular solutions, 286  
 Rossby number, 286
- vortex columns  
 bending modes, 232  
 fluted modes, 233  
 hollow cored, 234  
 sausaging modes, 231  
 stagnant cored, 234
- vortex filaments, 10, 45  
 cut-off parameter, 21  
 helicity, 70  
 with internal structure, 223  
 reconnection, 25  
 Rosenhead's modification of cut-off, 213  
 tension in curved, 205
- vortex patches, 160  
 co-rotating pair, 179, 181  
 counter-rotating pair, 179–80  
 corners, 173, 176  
 evolution, 165  
 existence, 166  
 Hamiltonian, 178  
 hidden symmetries, 275  
 Lamb's touching pair, 182  
 non-uniform, 171  
 pairing instability, 185, 187–9  
 in simple shear, 175  
 stability of Karman vortex street, 187–90  
 stability of Kirchhoff rotating vortices, 173  
 stability of Moore–Saffman strained vortices, 174  
 stability of single row, 184–7  
 tearing mode instability, 184  
 touching, 179, 182  
 in uniform strain, 168  
 waterbag model, 164
- vortex rings, 84–5  
 approaching a hole in a wall, 130  
 creation, 104–5  
 existence, 194  
 leap frogging, 208

*Index*

311

- (vortex rings, *continued*)
  - uniform finite cored, 194–5
- vortex sheet roll-up, 100–3, 257
  - Betz model, 150, 159
  - Prandtl model, 103
  - viscous core structure, 255
- vortex sheets
  - dynamics, 29
  - equivalent dipole distribution, 28, 35
  - instability of expanding, 144
  - Moore singularity, 146–7
  - in rotational flow, 26
  - with singular forces, 33
  - in steady motion, 32
  - velocity produced by, 28
- vorticity
  - definition of, 1
  - extension, 39
  - free, 47
  - Fridman's evolution equation, 11
  - partial extension, 40
  - tensor, 6
  - two-dimensional centroid, 66, 126
- Wagner effect, 115
- weak solution, 38
- Weis-Fogh lift mechanism, 106
