

Index

- absorption, 60.
- adjointable map, 8.
- bounded transform, 107.
- C^* -bialgebra, 82, 121.
- Cauchy–Schwarz inequality, 3.
- Cayley transform, 112.
- “compact operator”, 10.
- complemented submodule, 21.
- completely positive map, 39, 45–47, 78.
- completion, 4.
- comultiplication, 82.
- conditional expectation, 7.
- core, 97.
- corepresentation
 - unbounded, 104–106.
 - unitary, 87.
- densely defined operator
 - non-regular, 103.
 - regular, 96, 109–111.
 - selfadjoint, 101.
 - symmetric, 101, 113.
- direct sum, 5–6.
- essential ideal, 14.
- exterior tensor product, 34–38, 62, 116.
- “finite-rank” operator, 9.
- fully complemented submodule, 61.
- function C^* -bialgebra, 83, 122.
- functional calculus for selfadjoint regular operators, 118–120.
- Hilbert C^* -module, 4.
 - countably generated, 60, 66.
 - full, 69.
- idealiser, 17.
- inner-product C^* -module, 2.
- interior tensor product, 38–44, 105.
- isometry, 26.
- KSGNS construction, 50–52.
- leg notation, 80.
- localisation, 7, 57.
- Morita equivalence, 74.
- morphism
 - of C^* -algebras, 18.
 - of C^* -bialgebras, 82.
- multiplier algebra, 14–18.
- nondegenerate
 - $*$ -homomorphism, 15, 19.
 - completely positive map, 48–49, 53.
- partial isometry, 29–30, 112–115.
- polar decomposition, 29.
- product of sets, 15.
- quantum group, iv, 121–122.

- reduced convolution C*-bialgebra,
83–86, 90–93, 122.
- regular operator, 96.
- retraction, 55.
- Riesz–Fréchet theorem, 13.
- self-dual Hilbert C*-module, 13.
- semi-inner-product C*-module, 3.
- σ -unital C*-algebra, 60, 66.
- slice map, 79.
- stabilisation, 60.
- stable
 - algebra, 63, 69.
 - multiplier algebra, 63.
 - isomorphism, 69, 74.
- Stone–Čech compactification, 15.
- strict
 - completely positive map, 49.
 - topology, 11, 18, 76–77.
- strictly positive, 59.
 - mod A , 108.
- tensor product
 - exterior, 34–38, 62, 116.
 - interior, 38–44, 105.
 - of C*-algebras, 31.
 - of Hilbert spaces, 31.
- Tietze theorem for C*-algebras, 66.
- unbounded multiplier, 117.
 - functional calculus, 118.
- unitary
 - adjointable operator, 24.
 - corepresentation, 87–88.
 - equivalence, 24.
