Editors' Preface	xi
A. FLEMING	
Chemotherapy: yesterday, today and tomorrow	1
P. A. HUNTER	
New developments in non-azole antifungals for human disease	19
G. N. ROLINSON	
Discovery and development of beta lactam antibiotics	53
H. ZÄHNER AND H.-P. FIEDLER	
The need for new antibiotics: possible ways forward	67
P. E. RUSSELL, R. J. MILLING AND K. WRIGHT	
Control of fungi pathogenic to plants	85
D. T. W. CHU AND L. L. SHEN	
Quinolones: synthetic antibacterial agents	111
G. COHEN AND Y. AHARONOWITZ	
Molecular genetics of antimicrobials: a case study of β -lactam antibiotics	139
J. F. RYLEY	
Who needs new antimicrobials?	165
K. G. KERR AND R. W. LACEY	
Why do we still get epidemics?	179
A. L. DEMAINE	
Why do microorganisms produce antimicrobials?	205
M. PUDNEY	
Antimalarials: from quinine to atovaquone	229
D. H. L. BISHOP, M. L. HIRST, R. D. POSSEE AND J. S. CORY	
Genetic engineering of microbes: virus insecticides – a case study	249
G. K. DARBY	
Only 35 years of antiviral nucleoside analogues!	279
S. L. CROFT	
Antiprotozoal drugs: some echoes, some shadows	299
A. D. RUSSELL AND N. J. RUSSELL	
Biocides: activity, action and resistance	327
Index	367
