## Index

- admissible rational numbers, 219  
 affine group, 84  
 algebraic group, 84  
   operating on varieties, 85  
   properties of action, 85  
   unipotent, 93  
 algebraic vector bundle, 7  
 algebraic vector  $G$ -bundle, 139  
 Artinian category, 78  
 associated bundle, 8  
 associated exceptional bundle, 237
- Beilinson monad, 184  
 Beilinson spectral sequence, 185  
 Bogomolov's Theorem, 178  
 bounded family, 73, 80, 81, 183, 185  
 bounded set, 112  
 branched cover, 161
- canonical sheaf, 28  
 categorical quotient, 86  
 centre of map of graded algebras, 99  
 characteristic number, 218  
 Chern class, 50  
 closed group action, 85  
 coarse moduli space, 110, 116, 189  
 complete family, 202  
 complex of sheaves, 18  
   cohomology, 19  
   differentials, 18  
   exact sequences, 20  
   homotopies, 19  
   homotopy equivalence, 19  
   hypercohomology, 20  
   morphism, 18  
   quasi-isomorphisms, 19  
 cone on a variety at a point, 124  
 connection, 49  
 crossed morphism, 242  
   principal, 243
- curvature form of a connection, 49
- de Rham cohomology, 22  
 de Rham complex, 21  
 deformation map, 145, 202  
 degree  
   of a projective curve, 61  
   of divisors, 31  
 determinant bundle, 33  
 determinantal variety, 224  
 direct image, 55  
 discriminant, 177, 218
- equivariant map, 85  
 Euler-Poincaré characteristic, 25  
 exact sequence, 18  
 $\text{Ext}_{\pm}$ , 203  
 extension group, 118  
 extensions of sheaves, 118
- fat point, 125  
 filtered sheaves, 204  
 filtration length, 167  
 flat module, 53  
 frame bundle, 14  
 free group action, 85
- $G$ -bundle, 139  
 $G$ -sheaf, 235  
 Galois cover, 161  
 Galois group, 161  
 geometric quotient, 89, 190  
 good quotient, 88, 94, 100  
 Grothendieck duality, 28  
 Grothendieck group, 32  
 Grothendieck's criterion, 196
- Haar measure, 92  
 Harder-Narasimhan filtration, 79, 159,  
 170

- Harder-Narasimhan sequence, 79, 159  
 higher direct image, 55, 57  
 Hilbert-Mumford criterion, 104  
 Hilbert polynomial, 61, 156  
 Hilbert scheme, 65, 111, 195  
   tangent space, 127  
 homotopy group, 38  
 Hopf bundle, 10  
 hypercohomology, 20  
   coboundary map, 21  
   induced long exact sequences, 20  
   induced maps, 20
- infinitesimal neighbourhood, 125  
 injective resolution, 19  
 injective sheaf, 18  
 irreducible representation, 90  
 isotypical factor, 91
- Jacobian variety, 141  
 Jordan-Hölder filtration, 78, 160  
   associated grading, 78  
   length, 78  
 Jordan-Hölder grading, 160
- $K$  group, 32  
 Kempf's Lemma, 140  
 Kodaira-Spencer map, 145, 202
- linear equivalence of divisors, 31  
 linear fibration, 7  
 linearly reductive group action, 90, 93, 96  
 locally finite  $G$ -modules, 94  
 locally-free sheaf, 13  
 locally isotrivial, 135
- map  
   of bundles, 9  
   of complexes, 18  
 maximal sub-sheaf, 158  
 moduli morphism, 189  
 moduli space  
   bundles over elliptic curves, 148  
   dimension, 133  
   irreducibility, 141, 223  
   Picard group, 233  
   rationality, 231  
   smoothness, 133, 196  
   tangent space, 133  
 monad, 184, 199  
 Mumford's criterion, 192
- Narasimhan and Seshadri, theorem of, 163
- one parameter sub-group, 102
- Petri differential, 224  
 Poincaré bundle, 139  
 polystable bundle, 121  
 polystable sheaf, 196  
 prioritary sheaves, 209  
 Proj of a graded algebra, 99  
 proper group action, 85
- quasi-isomorphism, 19
- reduced Hilbert polynomial, 156  
 relative Hilbert scheme, 202  
 representation  
   irreducible, 90  
   semi-simple, 90  
   simple, 90  
   totally reducible, 90  
 restriction to curves, 167, 171  
 Reynold's operator, 91, 95
- $S$ -equivalence, 107  
 semi-stability criterion, 104  
 semi-stable points, 191  
   of  $G$  action, 100  
 semi-stable vector, 102  
 Serre duality, 28  
 Serre fibration, 38  
 Serre's Theorem B, 57  
 Shatz stratification, 170  
 sheaf  
   acyclic, 21  
   algebraic, 23  
   associated analytic, 26  
   canonical, 28  
   coherent, 23  
   cohomology, 20  
   complex, 18  
   degree, 30, 156  
   direct image, 55  
   discriminant, 177  
   exceptional, 214  
   extensions, 118  
   finite type, 23  
   flasque, 21  
   injective, 18  
    $\mu$ -semi-stable, 157  
    $\mu$ -stable, 157  
   rank, 29  
   rigid, 213  
    $S$ -flat, 54, 61, 62  
   semi-exceptional, 214  
   semi-stable, 155, 156, 162  
   singular point, 158  
   slope, 75, 156  
   stable, 155, 156  
   torsion, 29  
   torsion-free, 74

- slope, 75
- stable homotopy group, 40
- stable points, 191
  - of  $G$  action, 101
- stable vector, 102
  
- tangent bundle, 12
- tangent space, 12
- torsion sub-sheaf, 74
- total space, 7
- trivial fibration, 7
  
- unipotent group, 93
- universal bundle, 139
- universal extension, 120, 142
- universal sheaf, 197–199
- unstable points of  $G$  action, 100
  
- vector bundle, 7
  - associated sheaf, 13
  - associated to a representation, 14
  - degree, 45
  - direct sum, 9
  - dual, 10
  - exceptional, 237
  - existence of semi-stable, 143
  - exterior power, 10, 163
  - gluing, 41
  - local chart, 8
  - local degree, 45
  - local trivialization, 7
  - maps, 9
  - quasi-rigid, 208
  - quotient bundle, 10
  - regular section, 12
  - rigid, 208
  - $S$ -equivalence, 107
  - semi-stable, 75
  - slope, 163
  - stable, 76
  - sub-bundle, 10
  - symmetric power, 10, 163
  - tensor, 10
  - tensor product, 163
  - transition functions, 8
  
- Weyl's unitary trick, 93
