

Index rerum et personarum

- basis elements (for jacobian) 6, 8
 blowing down 6, 12
 blowing up 6, 12
 Brecht, B. 44
 canonical class xii
 canonical form 1
 Castelnuovo's theorem 6, 12
 complex multiplication 163
 conjugate 2
 defined (over k) xiii
 degree (of a divisor) xi
 desingularized Kummer 165 *et seq.*,
 181, 184
 diagonal 7
 differential (on curve) xii
 differential form 67
 divisor xi
 effective (divisor) xii
 endomorphism ring 160 *et seq.*
 even (basis element) 26
 first kind (differentials of the) 4 *fn*
 focus (of pencil of lines) 179
 formal exponential map 68
 formal group 10, 63 *et seq.*
 formal logarithm 68
 ftp 204
 Galois module xiii
 genus xii
 Göpel tetrahedron 91
 Grassmann coordinates 176
 Grassmannian 175, 179
 height 133 *et seq.*
 Hilbert 90 xiii
 homogeneous space 109
 Hudson, R.W.H.T 17 *fn*
 invariant differential 67
 isogeny 88 *et seq.*, 101 *et seq.*
 jacobian 2, 6 *et seq.*
 Jacobian 41 *et seq.*
 kernel (of homomorphism μ) 53
 kernel (of reduction) 69
 Kummer (= Kummer surface) 17 *et seq.*
 Littlewood's Principle 96
 local parameters (for jacobian) 10, 28, 66
 local uniformizer (on curve) xi
 localized coordinates 63
 Mordell-Weil group 47 *et seq.*
 node 20
 norm space 109
 odd (basis element) 26
 pencil (of lines) 175, 179
 pencil (of quadratic forms) 177
 Picard group xi
 plane (of pencil of lines) 179
 principal divisor xi
 projective locus 8 *fn*
 proper (automorph) 32 *fn*
 quadric line complex 180
 rational xiii
 real multiplication 164
 reducible (jacobian) 154 *et seq.*
 reduction (map) 69
 Richelot, F.J. 88 *fn*
 Richelot isogeny 88 *et seq.*, 101 *et seq.*
 Riemann-Roch theorem xii
 singular line (of quadric line complex) 180
 support (of a divisor) xi
 symmetroid 42
 tetrahedroid 156
 trope 25
 twiddles 16
 twist 109
 wave surface 156
 Weddle, T. 40 *fn*
 Weddle's surface 40 *et seq.*
 Weierstrass point xii
