Author index

The Author Index lists the names of all authors of publications included in the reference lists. The index does not include the names of editors if the reference is a chapter in an edited book. Page numbers refer to author names spelled out in the text. In the case of multiple author publications, the names of all authors are listed when the reference is mentioned for the first time. For subsequent "et al." citations, only the first author's name is listed in the index.

- Aamodt, A., 373, 389
 Abakoumkin, G., 4, 31, 300, 314
