

## Index

- antipodal map, 10
- backscattering, 27, 62
- Besov spaces, 6
- bicharacteristics, 32
- bound states, 25, 53
- boundary condition, 53
- boundary pairing, 19, 87
- characteristic values, 49
- cohomology
  - absolute, 67, 88
  - DeRham, 68
  - Hodge, 88
    - b-metric, 87
    - conformally compact metric, 102
    - scattering metric, 68
  - relative, 68, 88
  - singular, 67
- compact operator, 17
- compactification
  - radial, 13, 16
  - stereographic, 13, 66, 69, 72, 88
- cotangent bundle
  - manifold with boundary, 66
  - of sphere, 60
  - scattering, 72
- counting function
  - eigenvalues, 42, 83, 92
  - poles, 48, 51, 63
- cylindrical end, 80
- density of products, 39
- Dirichlet-to-Neumann map, 38
- embedded eigenvalues
  - absence of, 19, 53
- enveloping algebra
  - 0-, 98
  - b-, 82
  - cusp, 104
  - exponential solutions, 40
  - finite energy space, 32
  - forcing problem, 35
  - formal null space, 21
  - formal solution, 19, 21
  - Fourier transform, 2
    - inverse, 2
  - Fredholm determinant, 43, 49
  - Fredholm property, 40, 74, 89, 90
  - Fredholm theory
    - analytic, 16, 17
  - frequency, 3
  - generalized eigenfunctions, 18
    - b-metric, 85
    - conformally compact metric, 101
  - geodesics
    - boundary, 77
    - conformally compact metric, 102
    - Euclidean, 56
    - hyperbolic metric, 105
    - reflected, 56, 62
      - non-uniqueness of, 58
    - scattering metric, 78
  - Gevrey regularity, 61
  - Green's formula, 19
  - half-bound states, 26
  - heat invariants, 45
  - high-frequency asymptotics, 27, 36
  - Hodge theorem, *see* cohomology, Hodge
  - hyperbolic space, 96
  - indicial family, 89
  - indicial operator, 89
  - inverse
    - two-sided, 17
  - inverse problem

- backscattering, 40
- fixed energy, 38
- high energy, 37
- obstacle, 55
- joint symbol map, 73
- Lagrangian distribution, 60
- Lagrangian submanifold, 60
- Laplacian
  - analyst's, 1
  - b-metric, 82
  - conformally compact metric, 100
  - flat, 1
  - geometer's, 1
  - Hodge, 1
  - of a Riemann metric, 42
  - scattering theorist's, 1, 30
- Lax-Phillips conjecture, 62
  - modified, 63
- Lax-Phillips semigroup, 45, 47
  - infinitesimal generator of, 47
- Lax-Phillips transform, 33, 47
- Lidskii's theorem, 48
- Lie algebra of vector fields
  - 0-, 98
  - b-, 71, 81
  - cusped, 104
  - scattering, 71
- limiting absorption principle, 9, 76, 85
- Lipmann-Schwinger
  - equation, 16, 26
  - operator, 49
- Livshits example, 60
- Møller wave operators, 33
- metric
  - 0-, 95, 97
  - b-, 80
    - manifolds with corners, 92
  - conformally compact, 95, 98
  - cusped, 96
  - cylindrical end, 95
  - hyperbolic cusped, 95, 103
  - product type, 80
  - scattering, 66
- non-trapping obstacle, 62
- normal map, 99
- obstacle, 53
- parametrization of eigenspace, 5
  - continuous, 4
  - functional, 4, 76
- physical domain, 7
- plane wave, 3, 34
  - perturbed, 22, 24, 35, 53
- Poisson formula, 42, 63, 91
- Poisson operator, 6, 24
- pole
  - double, 25
- pole free region, 51, 62, 64
- poles of the resolvent, 18, 19, 25, 48
- poles of the scattering matrix, 26
- potential, 15
- pseudodifferential operators, 69
  - 0-, 100
  - b-, 90
  - cusped, 104
  - scattering, 74
    - index of, 74
- Radon transform, 28
  - conjugation identity, 33
  - generalized, 28
  - inversion of, 29
  - modified, 41
  - Plancherel's formula for, 29
  - range of, 28
- ray relation, 59
- recovery procedure, 37, 60
- resolvent family, 6, 7, 16
  - analytic continuation of, 10
  - b-metric, 84
  - conformally compact metric, 101
  - hyperbolic cusped metrics, 104
  - of a scattering metric, 71
  - poles of, 42
- scattering
  - by an obstacle, 52
  - forward peak, 36
- scattering kernel
  - absolute, 55
  - relative, 55
  - singularities of, 55, 60
- scattering matrix, 77
  - absolute, 5, 23, 54
  - meromorphic continuation of, 26
  - of b-metric, 85
  - of conformally compact metric, 101
  - of hyperbolic cusped metric, 105
  - relative, 23, 54
- scattering operator
  - abstract, 33
- scattering phase, 42, 44, 92
  - asymptotic expansion of, 45, 63
- scattering poles
  - existence of, 46
- Schrödinger's equation, 30
- Schwartz kernel, 70
  - explicit, 7
  - naming convention, 3

- Schwartz' space, 1
- singularities
  - propagation of, 60
- smoothing operator, 16
- sojourn time, 59
- Sommerfeld radiation condition, 12, 14
- spectral decomposition, 3
- spectral resolution, 2
- spectrum, 6, 19, 53, 75, 83, 93, 101, 104
- star-shaped obstacle, 62
- stationary phase
  - principle of, 4
- Stone's theorem, 9
- symbol map, 99
- symbol sequence, 73, 91
  
- tangent bundle
  - 0-, 98
  - b-, 81
  - cuspidal, 104
  - manifold with boundary, 66
  - scattering, 72
- thresholds, 83
- trace class, 43
- trapped rays, 62
- travelling wave, 35
  - perturbed, 35
  
- unique continuation, 21
  
- warped products, 94
- wave equation, 30
- wave group, 30
  - infinitesimal generator of, 31
  - regularized trace of, 42
  - singularities of, 44
  - support estimate for, 31
- wavefront set, 31
- Weyl calculus, 69
- Weyl's estimates, 49
- Weyl's law, 48, 92
  
- X-ray transform, 37
  
- zero energy states, 25
