<i>List of figures</i>	<i>page</i> xii
<i>List of tables</i>	xiv
<i>Preface</i>	xv
1 Preliminaries	1
1.1 Competition law in the EC	1
1.2 Related topics	4
1.3 Some basic game-theoretic concepts	4
1.4 EC competition policy: ‘normal’ or ‘active’ competition	8
1.5 The logic of the book	16
<b>I Explicit collusion</b>	
2 <i>Four are few and six are many</i>	23
2.1 The model	24
2.2 Stage 3: the supply decision subgame	26
2.3 Stage 2: the cartel bargaining subgame	30
2.4 Stage 1: the participation decision subgame	33
3 <i>Cartel laws are good for business</i>	39
3.1 The model	39
3.2 Stage 3: the (non-collusive) supply subgame	42
3.3 Stage 2: the cartel bargaining subgame	43
3.4 Stage 1: the entry subgames	43
4 <i>Cartel enforcement</i>	47
4.1 Cartel enforcement with imperfect information	49
4.2 Cartel enforcement with incomplete information	56
4.3 Cartels in public procurement markets	66

**II    Tacit collusion**

5	<i>Information sharing among oligopolists</i>	81
5.1	Cournot–Nash equilibrium with uncertain demand and homogeneous goods	83
5.2	Acquisition and transmission of information	85
5.3	Differentiated goods	87
5.4	Uncertainty about costs	88
5.5	Facilitating practices	89
6	<i>Repeated games with collusive outcomes</i>	94
6.1	Friedman’s balanced temptation equilibrium	94
6.2	The ‘Folk Theorem’	99
6.3	The great salt duopoly	101
7	<i>Price leadership and conscious parallelism</i>	106
7.1	Static games without uncertainty	107
7.2	Static games with uncertainty	111
7.3	A repeated game	115
7.4	Price parallelism and collusive practices	117
7.5	The basing point system in the ECSC	119
8	<i>Collusion detection</i>	124
8.1	Information requirements of collusion detection	124
8.2	A simple Cournot model with seasonal adjustments	126
8.3	The wood pulp case	131
8.4	The ICI–Solvay case	136

**III   Semicollusion**

9	<i>Excess capacity and collusion</i>	151
9.1	The concept of semicollusion	151
9.2	Excess capacity and cartels in an historical perspective	152
9.3	A non-cooperative price-setting game with given capacities	154
9.4	Cartel negotiation with given capacities	159
9.5	Non-cooperative capacity choices with explicit collusion	161
9.6	Collusion detection	164
9.7	Non-cooperative capacity choices with tacit collusion	168
10	<i>Collusion in R&amp;D</i>	173
10.1	The basic model	174
10.2	The results	175
10.3	Overinvestment in R&D and collusion	180

Contents	xi
<b>IV Predatory pricing</b>	
11 <i>Predation in theory</i>	185
11.1 Why predatory pricing is rare and unimportant	186
11.2 The chain store paradox or the impossibility of predation	189
11.3 The lack of common knowledge can generate predation	192
11.4 Reputation and predation	194
11.5 Nash equilibria and predation	198
11.6 Geographical price discrimination and predation	202
11.7 Necessary conditions for predatory pricing	204
12 <i>Evidence on predation</i>	206
12.1 Experimental evidence	206
12.2 Antitrust litigation	215
12.3 The historical record	216
12.4 The bus war: a modelling approach	221
13 <i>Antitrust implications</i>	230
13.1 Rules	230
13.2 Informational requirements	240
13.3 The AKZO decision	247
<i>References</i>	256
<i>Index</i>	268
