

Index

- C^n -function, 83
- K -binomial coefficients, 154
- \mathbb{F}_q -linear function, 4
- π -ordering, 94

- Additive Carlitz polynomials, 13
- Admissible parameters, 138
- Almost normalizing extension, 168

- Bargmann–Fock representation, 41, 42, 43
- Basic sequence, 62
- Bessel–Carlitz functions, 143

- Carlitz derivative, 39
- Carlitz factorials, 2
- Carlitz module function, 39
- Coherent states, 41, 42
- Completion, 32
- Contiguous relations, 141
- Cyclic orbit, 171

- Degenerate module, 197
- Degenerate orbit, 172
- Delta operator, 62
- Difference quotient, 83
- Digit principle, 23
- Dimension of a filtered module, 187
- Dwork exponential, 160
- Dwork–Carlitz exponential, 160

- Entire function, 91
- Euler function, 179
- Extended hyperdifferentiations, 31

- Filtered module, 168
- Filtered ring, 167
- Filtration in a module, 168
- Filtration in a ring, 167

- Finite place, 33
- Formal divided power series, 101
- Fractional derivative, 58

- General Carlitz polynomials, 24
- Generalized binomial polynomial, 94
- Generalized factorial, 94
- Generalized Taylor formula, 64
- Generalized Weyl algebra, 171
- Global fields, 32
- Good filtration, 170
- Graded module, 169
- Graded ring, 167
- Grading, 167
- Grading of a module, 169

- Hilbert polynomial, 187
- Hyperdifferentiations, 17
- hypergeometric equation, 139
- hypergeometric function, 138

- Induced filtrations, 170
- Infinite place, 32
- Interpolation polynomials, 75
- Invariant operator, 61

- Linear orbit, 171
- Locally analytic function, 76
- Locally constant function, 99

- Möbius function, 179
- Multiplicity of a filtered module, 187

- Non-Archimedean Banach space, 9
- Non-Archimedean property, 2
- Nonsparse function, 197
- Normalized basic sequence, 68
- Normalized Carlitz polynomials, 14

210

Numerical polynomial, 185
Order of an entire function, 91
Orthonormal basis, 9

Place, 32
Pochhammer-type symbol, 138
Prime ideal, 9

Quasiholonomic function, 196
Quasiholonomic module, 193

Reduction, 9
Regular compact set, 75
Residual space, 9
Residue field, 9

Index

Schrödinger representation, 40, 41
Sequence of K -binomial type, 63
Standard filtration, 169
Strongly singular function, 16

Thakur's hypergeometric function, 140
Topological tensor product, 10
Type of an entire function, 91

Ultra-metric inequality, 2

Very well distributed sequence, 76
Volkenborn-type integral, 55

Weight module, 171
Well distributed sequence, 76
