## Subject index

---

- abscissa of absolute convergence, 268  
 abscissa of convergence, 268  
 adjoint multiplier, 8  
 algebraic vector, 82  
 almost periodic function, 272  
 Angle Criterion, 218  
 Angle Criterion (converse), 222  
 Ansari's theorem, 60, 61  
 antiperiodic, 261  
  
 back and forth method, 41  
 backward shift, 6  
 Banach lattice, 175  
 Basic Criterion for common  
   hypercyclicity, 172  
 basic sequence, 196, 314  
 basis constant, 196, 314  
 Bergman space, 267  
 Bernstein's inequality, 123  
 Bès–Peris theorem, 75, 199  
 bilateral weighted shift, 18  
 Birkhoff's ergodic theorem, 96  
 Birkhoff's transitivity theorem, 2  
 boundary value, 7, 312  
 bounded sequence, 38  
 bounded set, 82  
 Bourdon–Feldman theorem, 69, 71  
  
 $C_0$ -semigroup, 62  
 Calkin algebra, 195  
 Cantor set, 154  
 Cayley map, 24, 313  
 Cesàro operator, 28, 229  
 chaoticity, 137  
 Chaoticity Criterion, 138  
 character, 64  
 clopen set, 11  
 common hypercyclic vector, 164  
 complex Gaussian distribution, 97  
  
 composition operator, 22  
 continuous measure, 114, 254  
 control sequence, 87  
 Costakis–Peris theorem, 72  
 Costakis–Sambarino Criterion, 173  
 cotype, 105, 316  
 covariance operator, 99  
 cyclic operator, 1  
 cylinder set, 109, 131  
  
 $(\Delta_I)$ -Sidon sequence, 244  
 density, 142  
 density-1 set, 110  
 derivative operator, 6  
 diagonally hypercyclic operator, 92  
 difference set, 78  
 Dirichlet series, 268  
 disjoint dynamical systems, 92  
 disjoint vectors, 175  
 dual hypercyclic operators, 57  
 Dudley's theorem, 180  
 Dvoretzky's theorem, 238  
 Dvoretzky–Rogers theorem, 138, 230  
  
 Effros Borel structure, 114  
 entropy function, 181  
 entropy integral, 181  
 equivalent basic sequences, 197  
 ergodicity, 95  
 essential spectrum, 195, 317  
 Euler product, 265  
 exponential type, 21, 281, 311  
 exponential type 0, 152  
 exposing functional, 220  
 extreme point, 221  
  
 $F$ -space, 1  
 Fatou's theorem, 312  
 Fernique's integrability theorem, 99, 131

- finite-order function, 272  
 finitely representable Banach space, 237  
 forward shift, 6, 83  
 Fourier transform, 99  
 Fréchet space, 2  
 Fredholm index, 318  
 Fredholm operator, 318  
 frequently hypercyclic operator, 142  
 full support (measure with), 96  
  
 gamma function, 273  
 $\gamma$ -radonifying operator, 101  
 Gaussian covariance operator, 101  
 Gaussian measure, 98  
 generalized backward shift, 32  
 generalized kernel, 28, 32, 193  
 Godefroy–Shapiro Criterion, 6  
 greedy algorithm, 262  
  
 Haar basis, 119  
 Hardy space, 7, 312  
 hereditarily hypercyclic operator, 76  
 hereditarily indecomposable Banach space, 150  
 Hölderian map, 118  
 homotopic spaces, 62  
 Hurwitz’s theorem, 213  
 hyperbolic map, 23  
 hypercyclic algebra, 213  
 hypercyclic comparison principle, 10  
 hypercyclic manifold, 15  
 hypercyclic operator, ix, 1  
 hypercyclic subspace, 195  
 hypercyclic vector, 61  
 Hypercyclicity Criterion, 4  
 hyponormal operator, 29  
  
 indecomposable Banach space, 150  
 independent set, 254, 285  
 infinitesimal generator, 126  
 intertwining equation, 116  
 invariant measure, 95  
 invariant subset problem, ix  
 invariant subspace problem, ix  
 iterated kernels, 32  
  
 $J$ -set, 29  
 Jamison sequence, 163  
  
 $\mathcal{K}$ -null, 205  
 Kahane’s inequalities, 182, 316  
 Khinchine’s inequalities, 315  
 Kitai’s Criterion, 4, 57  
 Kronecker flow, 287  
 Kronecker set, 254  
  
 Kronecker’s theorem, 254, 285, 290  
  
 Laplace transform, 280  
 left-Fredholm operator, 319  
 Legendre polynomials, 223  
 Liapounov convexity theorem, 255  
 linear fractional map, 23  
 locally equicontinuous semigroup, 62  
 locally uniformly convex norm, 228  
 lower density, 142, 264  
  
 Markov’s inequality, 282  
 Maurey–Pisier theorem, 238  
 Mazur’s construction, 197, 315  
 measure-preserving transformation, 95  
 mixing (measure sense), 108  
 mixing (topological sense), 31  
 mixing operator, 31  
 multiplication operator, 8  
  
 $\mathbb{N}$ -hypercyclic, 200  
 $\mathbb{N}$ -mixing, 80, 200  
 non-atomic measure space, 255  
 non-tangential limit, 312  
 non-trivial character, 64  
 non-trivial type, 235  
 normalized sequence, 83, 197  
 norming set, 221  
 $N$ -triangular, 52  
  
 orbit, viii, 1  
 orbital, 26  
 Orlicz space, 180  
  
 $p$ -convex Banach lattice, 175  
 $p$ -summing operator, 105  
 Paley–Wiener theorem, 225, 281, 314  
 parabolic map, 23  
 path of operators, 185  
 perfect set, 152  
 perfectly spanning set, 115  
 periodic point, 137, 162  
 Pettis’ lemma, 57, 59  
 Poincaré recurrence theorem, 95, 130  
 point spectrum, 11, 317  
 Polish space, 113, 168  
 positive supercyclicity theorem, 61  
 projective orbit, 1  
  
 $\mathbb{Q}$ -linearly independent, 285  
 $q$ -sequence, 236  
 quasi-factor, 10  
  
 Rademacher sequence, 315  
 Rajchman measure, 114, 256

- recurrent point, 95, 130
- reproducing kernel, 8, 313
- Riemann zeta function, 264
- Riesz decomposition theorem, 11, 317
- Runge's approximation theorem, 310
  
- Schauder basis, 314
- Schur property, 260
- semi-normalized sequence, 197
- sensitive dependence on initial conditions, 137
- Sidon sequence, 244
- $\sigma$ -spanning set of  $\mathbb{T}$ -eigenvectors, 115
- similarity orbit, 44
- spectral radius, 317
- spectral radius formula, 317
- spectrum, 316
- square root of symmetric positive operator, 101
- standard Gaussian variable, 98
- Stirling's formula, 273
- Stolz angle, 312
- strictly convex norm, 228
- strictly singular operator, 151
- strong operator topology (SOT), 44
- strongly continuous semigroup, 62
- strongly exposed point, 220
- supercyclic operator, 1
- supercyclicity circle, 12
- Supercyclicity Criterion, 9
- syndetic sequence, 80
- syndetically hypercyclic map, 80
  
- $\mathcal{T}$ -recurrent point, 70
- $\mathbb{T}$ -eigenvector, 111
- $\mathbb{T}$ -eigenvector field, 113, 154
- thick set, 77
  
- three open sets condition, 27, 81
- topologically conjugate maps, 10, 49
- topologically mixing operator, 31
- topologically transitive operator, 2
- translation operator, 3
- triangular operator, 52
- type, 105, 179, 316
  
- unconditional basis, 83
- unconditionally convergent series, 138
- uniformly convex norm, 228
- unilateral weighted shift, 20
- universal family, ix, 5, 27
- Universality Criterion, 27
- universally measurable map, 113
- upper density, 142
  
- Volterra operator, 93, 222
  
- Weak Angle Criterion, 240
- weak closure exponent, 233
- weak density exponent, 233
- weak mixing (measure sense), 108
- weak mixing (topological sense), 75
- weak sequential closure, 259
- weakly hypercyclic operator, 230
- weakly mixing operator, 75
- weakly sequentially hypercyclic operator, 260
- weakly sequentially supercyclic operator, 260
- weight sequence, 18, 241
- weighted shift, 9, 18
- Wiener's theorem, 114, 133
  
- Z-set, 17
