Contemporary Capitalism and Its Crises

This volume analyses contemporary capitalism and its crises based on a theory of capitalist evolution known as social structure of accumulation (SSA) theory. It applies this theory to explain the severe financial and economic crisis that broke out in 2008 and why new institutions are required to resolve it. The editors and contributors make available new work within this school of thought on such issues as the rise and persistence of the “neoliberal,” or “free-market,” form of capitalism since 1980 and the growing globalization and financialization of the world economy. The collection includes analyses of the U.S. economy as well as that of several parts of the developing world.

Terrence McDonough is Professor of Economics in the School of Business and Economics at the National University of Ireland, Galway. He is the author, coauthor, or coeditor of *Was Ireland a Colony? Economics, Politics, Ideology and Culture in the Irish Nineteenth Century* (2005), *Mind Your Own Business: Economics at Work* (with David Jacobson and Keith Warnock, 2001), *Uninhabited Ireland: Tara, the M3, and Public Spaces in Galway* (with Lionel Pilkington and Aine Ni Leime, 2009), and *Social Structures of Accumulation: The Political Economy of Growth and Crisis* (with Michael Reich and David M. Kotz, Cambridge University Press, 1994). His current research interests include globalization, American and Irish economic history, and political economy.

David M. Kotz is Professor of Economics at the University of Massachusetts Amherst. His previous books include *Russia’s Path from Gorbachev to Putin* (with Fred Weir, 2007), *Revolution from Above: The Demise of the Soviet System* (with Fred Weir, 1997), *Bank Control of Large Corporations in the United States* (1978), and the aforementioned *Social Structures of Accumulation* (1994). His research interests include economic growth and crisis, institutional change in capitalist economies, socialist economics, and the economies of Russia and China.
