Cambridge University Press has no responsibility for the persistence
or accuracy of URLs for external or third-party Internet websites
referred to in this publication, and does not guarantee that any content
on such websites is, or will remain, accurate or appropriate.

Every effort has been made in preparing this publication to provide
accurate and up-to-date information which is in accord with accepted
standards and practice at the time of publication. Although case
histories are drawn from actual cases, every effort has been made to
disguise the identities of the individuals involved. Nevertheless, the
authors, editors, and publishers can make no warranties that the
information contained herein is totally free from error, not least
because clinical standards are constantly changing through research
and regulation. The authors, editors, and publishers therefore disclaim
all liability for direct or consequential damages resulting from the use
of material contained in this publication. Readers are strongly advised
to pay careful attention to information provided by the manufacturer
of any drugs or equipment that they plan to use.
