The Cambridge Encyclopedia of Language is organized in 11 parts, comprising 65 thematic sections. Each section is a self-contained presentation of a major theme in language study, with cross-references included to related sections and topics.

Preface to the first edition vi
Preface to the second edition vii

I Popular ideas about language 1
Widely held linguistic beliefs and attitudes, and the basic functions of language.

1 The prescriptive tradition 2
Popular notions of linguistic authority and correctness; purism and language change; the role of linguistic description.

2 The equality of languages 6
Myths about primitive languages and language superiority.

3 The magic of language 8
Linguistic superstitions and verbal taboos; the mystical power of proper names.

4 The functions of language 10
The many cultural, social, and personal roles which language performs.

5 Language and thought 14
The complex relationship between language and thinking; the notion of language relativity.

II Language and identity 17
The many ways in which language expresses a person’s individuality or social identity.

6 Physical identity 18
The relationship between language and age, sex, physical type, and physical condition; voiceprints; male vs female speech.

7 Psychological identity 22
The relationship between language and personality, intelligence, and other psychological factors.

8 Geographical identity 24
The regional background of a speaker; accents, dialects, linguistic areas, and the study of dialectology.

9 Ethnic and national identity 34
Language, ethnicity, and nationalism; the problem of minority languages and dialects.

10 Social identity 38
Language and social stratification, class, status, role, solidarity, and distance; the problem of sexism; borrowings.

11 Contextual identity 50
Situationally determined varieties of speech and writing; restricted and secret language; verbal play and art; word games.

12 Stylistic identity and literature 68
The concept of style; authorship identity and forensic linguistics; literary language in poetry, drama, and prose.

III The structure of language 83
The dimensions of language analysis that underlie all forms of language, whether spoken, written, or signed.

13 Linguistic levels 84
The relationship between the main components of language analysis; models of linguistic structure.

14 Typology and universals 86
Analysing the structural similarities and differences among the languages of the world.

15 The statistical structure of language 90
The study of the statistical regularities found in language; the frequency of sounds, letters, and words.

16 Grammar 92
Syntax and morphology; the structure of words, phrases, clauses, and sentences.

17 Semantics 104
The study of meaning in language; the semantic analysis of words and sentences.

18 Dictionaries 112
The use and evaluation of dictionaries; the past, present, and future of lexicography.

19 Names 116
Patterns and trends in the use of personal names; place names and their history.

20 Discourse and text 120
The study of stretches of spoken and written language above the sentence; the nature of conversation; analysing textual structure.

21 Pragmatics 124
The factors that govern our choice of language in social interaction; speech acts and their analysis; effect of the Internet.

IV The medium of language: speaking and listening 129
The study of the auditory-vocal channel of communication; the production, transmission, and reception of speech.

22 The anatomy and physiology of speech 130
The vocal tract and vocal organs; the nature of articulation.

23 The acoustics of speech 138
The nature of sound waves and the way they transmit speech; the sound spectrograph and its use in speech sound analysis.

24 The instrumental analysis of speech 144
Some of the techniques used in the analysis of speech acoustics and physiology.

25 Speech reception 148
The ear, and the process of hearing; speech perception and its investigation.

26 Speech interaction with machines 155
The principles and practice of automatic speech recognition and speech synthesis.

27 The sounds of speech 160
Phonetics; the description of vowels and consonants; kinds of phonetic transcription.

28 The linguistic use of sound 168
Phonology; phonemes, distinctive features, and other models; comparing the sound systems of languages.

29 Suprasegmentals 177
The prosody of speech; the structure of intonation; tone languages; the relationship between speech and music.

30 Sound symbolism 182
The relationship between sounds and meaning; the role of onomatopoeia.

V The medium of language: writing and reading 185
The study of the development and functions of written language, in all its forms.

31 Written and spoken language 186
The relationship between speech and writing; how sound is portrayed in written language.

32 Graphic expression 190
The physical substance of written language; types of graphic expression; handwriting, print, typing, and electronic forms.

33 Graphology 204
The writing system of a language; the history of writing; the alphabet; spelling, punctuation, and other contrasts; systems of shorthand.

34 The process of reading and writing 218
Psychological accounts of the process of reading, writing, and spelling; spelling regularity and spelling reform.

VI The medium of language: signing and seeing 229
The development and use of deaf sign languages.
35 Sign language  
Popular fallacies about sign language; the development and use of signs by the deaf.

36 Sign language structure  
The way signs are used to convey grammatical contrasts; American Sign Language.

37 Types of sign language  
The range of contrived signs languages; finger spelling, cued speech, and other systems.

VII Child language acquisition  
The study of the way children learn to understand and speak their mother tongue – methods, theories, and findings; later language learning in school.

38 Investigating children’s language  
Techniques for finding out about child language; speech production and comprehension; theories of language acquisition.

39 The first year  
The development of infant vocalization; early speech perception and interaction.

40 Phonological development  
The acquisition of the sound system; the learning of vowels, consonants, and intonation.

41 Grammatical development  
The acquisition of grammar; growth in sentence length and complexity.

42 Semantic development  
The acquisition of vocabulary; first words and their content; distinguishing the meanings of words.

43 Pragmatic development  
The acquisition of conversational skills; the language of twins.

44 Language development in school  
The study of language in school; later oral development; learning to read and write.

VIII Language, brain, and disability  
The neurological basis of language, and the range of physical or psychological problems that can give rise to disabilities in spoken, written, or signed language.

45 Language and the brain  
Brain structure and function; hemispheric dominance and localization; slips of the tongue and critical periods.

46 Language disability  
Incidence, causation, and classification; deafness, aphasia, dyslexia, dysgraphia; disorders of voice, articulation, and fluency; language delay; alternative communication systems and aids.

IX The languages of the world  
The range of languages in past or present use – numbers, speakers, sources; identifying and explaining linguistic change.

47 How many languages?  
Identifying, counting, and classifying the languages of the world

48 How many speakers?  
Determining how many people speak a language; the world’s most widely used languages and families.

49 The origins of language  
Myths and experiments about the origins of language; wolf children; humans and primates; the evidence of paleoanthropology.

50 Families of languages  
Discovering the history of languages; comparative philology; the language families of the world.

51 The Indo-European family  
The history of Indo-European languages, where they are spoken, and how they are classified.

52 Other families  
The distribution, family grouping, and use of the world’s languages (other than Indo-European).

53 Language isolates  
Languages which cannot be related to any of the major families.

54 Language change  
The identification of change in sounds, grammar, and vocabulary; glottochronology; explanations for language change.

55 Pidgins and creoles  
The origins, distribution, and present-day use of the world’s pidgins and creoles.

X Language in the world  
The problems of communication posed by the diversity of the world’s languages and varieties, and the search for solutions.

56 The language barrier  
The problems caused by foreign languages in the field of international communication; language and the business world.

57 Translating and interpreting  
The principles and practice of translating and interpreting; the role of machine translation.

58 Artificial languages  
The history of artificial languages, and the present-day position; Esperanto, Basic English, and other systems.

59 World languages  
The international use of languages; official languages; World English and its varieties.

60 Multilingualism  
Causes and extent of bilingual attitudes and practice; language maintenance and shift; language switching.

61 Language planning  
Government policies about language selection and use; bilingual educational programmes; endangered languages.

62 Foreign language learning and teaching  
The role and status of foreign languages in school and society; theories of language learning, and methods of language teaching; language materials and laboratories.

63 Language for special purposes  
The development of special varieties of language in science, medicine, religion, the law, the press, advertising, broadcasting, and the Internet; the related problems of intelligibility and change.

XI Language and communication  
The relationship between language and other systems of human and non-human communication, and the scientific study of language.

64 Language and other communication systems  
Language defined; chimpanzee communication; the history of artificial languages, and the present-day position; Esperanto, Basic English, and other systems.

65 Linguistics  
The history of ideas in language study; domains and personalities in 20th-century linguistics; linguistic methods; natural language processing.
