|--|-----------------|
| <i>Preface</i> | <i>page</i> vii |
| <i>Acknowledgments</i> | ix |
| 1 Introduction | 1 |
| 1.1 Beyond Shock Compression: Tunable Thermodynamics | 4 |
| 1.2 Cold, Warm and Hot Matter | 6 |
| 1.3 Experimental Timescales | 8 |
| 1.4 Thermal Equilibrium | 9 |
| 1.5 Recent Accomplishments | 10 |
| 1.6 Bibliography | 16 |
| 2 Basics of Dynamic Compression | 17 |
| 2.1 Shock Compression | 19 |
| 2.2 Quasi-Isentropic Multiple-Shock Compression | 47 |
| 3 Generation of Dynamic Pressures | 53 |
| 3.1 Two-Stage Light-Gas Gun | 55 |
| 3.2 Mass Acceleration by Pulsed Power: Z Accelerator | 57 |
| 3.3 Giant Pulsed Lasers | 58 |
| 3.4 Quasi-Isentropic Cylindrical and Spherical Compressions | 59 |
| 3.5 Static Compression: Diamond Anvil Cell | 59 |
| 4 Brief History of High-Pressure Research: 1643 to 1968 | 63 |
| 4.1 Evangelista Torricelli: 1643 | 64 |
| 4.2 Blaise Pascal: Experimental Verification | 66 |
| 4.3 Ideal-Gas Equation of State: 1660 to 1848 | 66 |
| 4.4 Theoretical Concept of a Shock Wave: 1848 to 1910 | 68 |
| 4.5 In the Beginning: Early 1940s | 70 |
| 4.6 Experimental Development of Supersonic Hydrodynamics: 1940s to 1956 | 71 |

| | | |
|----|--|-----|
| vi | <i>Contents</i> | |
| | 4.7 P. W. Bridgman's Contributions to Dynamic Compression: 1956 to 1961 | 72 |
| | 4.8 Altshuler: The 1960s | 76 |
| | 4.9 A New Beginning | 76 |
| 5 | Rare Gas Fluids | 79 |
| | 5.1 Single-Shock Compression | 80 |
| | 5.2 Quasi-Isentropic Compression in Converging Cylindrical Geometry | 83 |
| | 5.3 Multiple-Shock Compression | 83 |
| 6 | Metallization of Fluid Hydrogen at 140 GPa | 84 |
| | 6.1 A Little History | 86 |
| | 6.2 What to Try? | 87 |
| | 6.3 Dynamic Compression of Liquid Hydrogen | 88 |
| | 6.4 Metallic Fluid H in a Diamond Anvil Cell | 101 |
| | 6.5 Metallic Solid H in a Diamond Anvil Cell | 104 |
| | 6.6 Dynamic Compression of Hydrogen: Z Accelerator | 104 |
| 7 | Unusual Magnetic Fields of Uranus and Neptune: Metallic Fluid H | 106 |
| | 7.1 Chemical Compositions and Properties of Uranus and Neptune | 108 |
| | 7.2 Voyager 2's Uranus and Neptune | 109 |
| | 7.3 Dynamic Compression Experiments on Planetary Fluids | 110 |
| | 7.4 Interiors of Uranus and Neptune | 115 |
| | 7.5 Earth's Magnetic Field | 117 |
| | 7.6 Magnetic Fields of Uranus and Neptune | 118 |
| | 7.7 Conclusions | 119 |
| 8 | Shock-Induced Opacity in Transparent Crystals | 121 |
| 9 | Metastable Solid Metallic Hydrogen (MSMH) | 125 |
| 10 | Warm Dense Matter at Shock Pressures up to 20 TPa (200 Mbar) | 130 |
| | 10.1 Analysis of Published Hugoniot Data from 0.3 to 20 TPa | 132 |
| | 10.2 Measured and Calculated Optical Reflectivities of GGG above 0.4 TPa | 135 |
| | 10.3 Universal State of Ultracondensed Matter and WDM: Atomic Fluids with MMC | 136 |
| | 10.4 Warm Dense Matter Analogue of Asymptotic Freedom of High Energy Physics | 137 |
| | <i>References</i> | 139 |
| | <i>Index</i> | 157 |
