Subject Index

- Abel's integral equation, 288, 289
- Adjoint representation, 150, 159, 160
- Admissible domains, 138
- Affine groups, 179–182
 - homogeneous, 181
 - special, 180, 187
 - special homogeneous, 183
 - special nonhomogeneous, 182, 187
- Affinity, 179
- Agglomerations of convex sets, 279
- Aggregates
 - of ellipsoids, 291
 - of points, 102
 - of spheres, 290
- Algebraic manifolds, 343
- Almost bundle, 280
- Ambarcumjan inequality, 37, 231
- Angle formula, 238
- Angle in n.e. geometry, 302
- Annihilator, 146
- Area of convex set, 3, 60
- Asymmetry, 38
- Averages,
 - for curves, 111
 - for polygons, 55
 - for polyhedrons, 296
- Axial vectors, 360

- Bezout theorem, 343
- Blaschke's fundamental formula, 113–116
- Blichfeldt's theorem, 137
 - generalized, 176
- Bonnesen's inequality, 120
- Breadth, 6
 - of strip, 68
- Buffon's needle problem, 71, 107, 135
 - generalized, 77, 250, 281
 - with broken line, 77

- Cartan's lemma, 357
- Cartesian space R^n , 179
- Cauchy's formula, 217
- Chain rule, 177
- Class C^n , 3
- Class of curve, 344
- Closed differential forms, 359
- Closed geodesics, 351
- Closed subgroups, 165
- Close packing of segments, 126
- Clumps of convex sets, 101
- Clusters, 102, 213
- Coefficient of inefficiency, 67
- Commutative groups, 156
- Compact groups, 159
- Completely integrable, 146
- Complete set of inequalities, 10
- Complex analytic mappings, 343
- Complex spaces, 338
- Concurrent cross sections, 209
- Congruences, of lines, 211, 254
 - of geodesics, 334, 335
- Conjugate points, 300
- Constant breadth, 8
- Convex billiard, 40
- Convex body, 215
 - in elliptic space, 322
 - of various shapes, 229
- Convex curves, 1
- Convex hull, 32
 - of n random points, 22
- Convex ring, 350
- Convex sets, 1, 215
 - at random in E_3 , 283
 - contained in another, 94, 95
 - in E_n , 215
 - intersecting another, 93, 94
- Convex surface, 215
- Cotangent space, 82, 144
- Coverage problems,
 - on circle, 25
 - on line, 24, 25
 - on plane, 98
 - on sphere, 325–327
- Covectors in R^n , 354
- Crofton's formulas,
 - in E_n , 237–239
 - in n.e. spaces, 316
 - in plane, 47, 51
- Crystallographic groups, 128
- Cube, 229
- Cubic particles, 293
- Curvature of Chern-Lashof, 254

- Curvature of space, 300
- Cylinders,
 in E_3 , 280
 in E_n , 270
 intersecting convex sets, 273
 intersecting ball, 279
- Darboux's theorem, 362
- Density
 for cylinders, 270, 280
 for horocycles, 314
 for hyperplanes, 184, 185
 for linear spaces in E_n , 199
 for linear spaces in $P_n(C)$, 340
 for lines, 27, 28
 for m -tuples of linear spaces, **186, 193**
 for normal chains, 341
 for pairs of lines, 49, 194
 for pairs of linear spaces, 205
 for pairs of points, 45
 for parallel hyperplanes, 188
 for parallel subspaces, 190
 for parallelograms, 194
 for planes and lines in E_3 , 210
 for points, 13, 173
 for points and lines, 195
 for r -planes, 183, 187, 204, 305
 for r -planes about a q -plane, 202
 for strips, 68
 for triples of points, 16
- Density function,
 for area, 18
 for orthogonal projection, 218
 for perimeter, 17
 for radii of circumdisk, 19
- Diameter, 6
- Difference set, 125
- Differential forms, 82, **353**
 closed, 359
 decomposable, 356
 exact, 359
 over manifolds, 361
 over the group of motions, 82
- Differential of a mapping, 148
 dual, 148
- Direct product of groups, 161
- Distances
 in n -ball, 212
 non-euclidean, 301
 of two curves, 38
 in the space of graphs, 42

- Isoperimetric inequality, 36, 37, 104, 119, 123
 of Banchoff and Pohl, 252
 of Chakerian, 232
 in n.e. plane, 324
- Isotropic random simplexes, 201
- Isotropy group, 170, 173
- Jacobian matrix, 149
- Kinematic density
 for projective group, 192
 in E_2 , 85, 109–110
 in E_n , 256
 in n.e. spaces, 304
 other expressions, 88
- Kinematic fundamental formula
 for convex sets, 267, 282
 for cylinders, 270, 277, 283
 for strips, 118, 283
 in E_2 , 113–116
 in E_n , 262
 in n.e. spaces, 320
 of Chern-Federer, 276
- Kubota's formula, 217
- Lattice points, covered by a region, 137, 138
- Lattices in E_2 , 128

- Lattices in E_n , 274
 Lattices,
 of balls, 274
 of cubes, 274
 of convex sets, 140, 275
 of curves, 134
 of domains, 131
 of equilateral triangles, 140
 of figures, 128
 of fundamental regions, 128
 of points, 135
 of regular hexagons, 133, 139
 of squares, 133
 Leaves, 331
 Left-invariant differential forms, 83, 150
 Left translations, 81, 149
 Length of continuum of points, 112
 Length of curve, 31, 142
 Length of order m , 38
 Lie group, 149
 Lie transformation group, 173
 Linear graphs, 42
 Linear isotropy group, 170
 Linear search, 103
 Linear subspaces
 in E_n , 199
 intersecting a manifold, 243–247
 through origin, 185, 186
 Line density, in E_2 , 28–30
 in E_3 , 211
 invariance by reflection, 39
 invariance by refraction, 39
 Lines intersecting a convex set, 30, 65
 Lines intersecting curve, 30
 Lines that cut two convex sets, 32–34
 Lines that separate two convex sets, 32–34
 Linking numbers, 251, 252

 Mappings of differentiable manifolds, 148
 Maurer-Cartan equations, 152
 Maurer-Cartan forms, 151
 for affinities, 180
 for matrix groups, 153–154
 Mean breadth, 217
 Mean cross-sectional measures, 217
 Mean density in E_n , 210
 Mean distances
 in circle, 49
 in equilateral triangle, 49
 in n -ball, 212
 in rectangle, 49
 Mean free path, 42
 Mean length of chords, 30, 60–63
 Mean number
 of faces, 295
 of regions, 295
 of vertices, 295
 Mean values and curvatures, 252
 Mean values for convex polyhedrons, 250
 Mean values for integrals of mean curvature, 267–269
 Mean values of domains covered r times, 101
 Mean values of projected volumes, 216
 Measurable groups, 177
 Measure of continuum of points, 260
 Minkowski and Hlawka theorem, 190
 Minkowski's inequality, 124–125
 Minkowski's theorem, 176
 Mixed convex set, 4
 Mixed area of Minkowski, 4
 Moments of sizes of particles, 291
 Moments of gamma function, 18
 Motions in E_n , 196
 Motions in plane, 80–82
 Moving frames, 180

 n -dimensional euclidean space, 196
 n -dimensional noneuclidean space, 299
 n -dimensional projective space, 192, 299
 Nearly spherical particles, 288, 292
 Noneuclidean elliptic geometry, 300
 Noneuclidean hyperbolic geometry, 175, 300
 Noneuclidean integral geometry, 299
 Noneuclidean motions, 300
 Nonseparable convex sets, 39
 Normal chains, 340
 Normal congruence, 335, 336

 Octahedron, 229
 Orthogonal group, 149, 197
 Orthonormal frame, 196
 Osculating linear spaces, 343
 Packing of segments, 126
 Pairs of linear spaces, 205
 Pairs of lines, 49
 Pairs of points, 44, 237
 Parallel convex sets, 7, 220
 Parallel hyperplanes, 188
 Parking problem, 25
 Particles inside ball, 284
 Partition of unity, 362
 Pattern analysis, 294
 Perimeter, 2
 Pfaffian differential systems, 145
 completely integrable, 146, 147
 Plane linear graphs, 42
 Plücker formulas, 344
 Poincaré's formula, 109, 111
 generalized, 277
 Poincaré's lemma, 359, 361

- Poisson field of planes, 296
 Poisson line system, 56
 Poisson point processes, 17
 nearest neighbors in, 23
 Polar reciprocal convex sets, 10, 185
 Polygons formed by random lines, 55
 Power of the chords, 46, 238
 Probabilities on lattices, 138
 Probability of acute angled triangle, 17
 Probability of obtuse angled triangle, 21
 Projections of convex sets, 221
 Proper cone, 329

q-dimensional measure, 260
 Quermassintegrals, 217
 of ball, 224
 of convex cylinder, 225
 of ellipsoid of revolution, 226
 of line segment, 225
 of right parallelepiped, 224
 Quermassintegrals and integrals of mean curvature, 224
 Quotient group, 169

 Radius of curvature, 3
 Radon transform, 346, 348
 Random clusters, 213
 Random chords, 60–63
 Random division of space, 297
 Random elements, 13
 Random figures, 104
 Random great circles, 329
 Random lines, 289
 Random planes, 294, 286
 Random points,
 inside of convex set, 280
 in unit ball, 23, 65, 212
 on unit sphere, 326
 Random polygons, 66
 Random polyhedral cones, 328
 Random rectangles, 276
 Random regions on sphere, 329
 Random sets, 275
 Random spheres, 293
 Random spherical figures, 313
 Random strips, 68
 Random tessellations, 19, 298
 Random triangles, 21
 Rank of a differential form, 362
 Real projective group, 192
 Reflection of lines, 39
 Refraction of lines, 39
 of geodesics, 336
 Region, 128
 Relation between densities, 240
 Relative invariant density, 177, 360

 Relative vectors, 360
 Reproductive property, 252
 Reuleaux polygons, 8
 Right invariant differential forms, 84, 155
 Right translations, 81, 149, 183
 Rodrigues' formulas, 264, 302, 320
 Rods of fixed length, 290
 Rotations
 about a point, 197
 about a *q*-plane, 198
r-planes,
 intersecting a convex set, 233
 intersecting a manifold, 243
 in n.e. spaces, 309
 that support a convex body, 248
*r*th total absolute curvature, 253

 Second order moments, 313
 Sections,
 by random lines, 289
 by random planes, 286
 by random spheres, 293
 Self intersections, 104
 Self-linking number, 252
 Sets,
 of circles, 161
 of congruent figures, 86
 of constant breadth, 9
 of ellipses, 191
 of geodesics, 331
 2*n*-dimensional, 334, 349
 (2*n* – 2)-dimensional, 336
 of geodesic segments, 338
 of hyperbolas, 191
 of hyperquadrics, 194
 of intervals on the line, 24
 of lattices, 189
 of lines, 27
 of *n*-tuples of points, 13
 of pairs of spaces, 205
 of parabolas, 191
 of parallel hyperplanes, 188
 of parallel subspaces, 190
 of points, 12
 of points, lines and strips, 72–75
 of *r*-planes, 233, 309
 of segments
 on plane, 89
 interior to a polygon, 92
 intersecting an angle, 92
 of strips, 68, 249
 that are met by a strip, 71
 with positive reach, 303
 Several moving manifolds, 259
 Similitudes in the plane, 160
 Skew symmetric covariant tensor, 355
