Index

In mention of figures and tables, the page where the figure or table is to be found follows within brackets, as: 'fig. 2.13 (59)'.

The index is largely of proper names, especially sites and places, and of more specific subjects.

Authors are indexed where there is discussion of their work beyond simple references.

Broad subjects of the book, such as 'landscape' are not indexed; they are better traced through the detailed Contents (pages vii–x).
