Introduction: the self and neuroscience Tilo Kircher and Anthony S. David	1

Part I Conceptual background

1	The self and psychiatry: a conceptual history German E. Berrios and Ivana S. Marková	9
2	The self in philosophy, neuroscience and psychiatry: an epistemic approach Georg Northoff and Alexander Heinzl	40
3	Phenomenology of self Dan Zahavi	56
4	Language and self-consciousness: modes of self-presentation in language structure Maxim I. Stamenov	76

Part II Cognitive and neurosciences

5	The multiplicity of consciousness and the emergence of the self Gerard O'Brien and Jonathan Opie	107
6	Asynchrony, implicational meaning and the experience of self in schizophrenia Philip J. Barnard	121
7	Self-awareness, social intelligence and schizophrenia Gordon G. Gallup, Jr, James R. Anderson and Steven M. Platek	147

vi	Contents	
8	The neural correlates of self-awareness and self-recognition Julian Paul Keenan, Mark A. Wheeler and Michael Ewers	166
9	Autonoetic consciousness Hans J. Markowitsch	180
10	The neural nature of the core SELF: implications for understanding schizophrenia Jaak Panksepp	197
Part III Disturbances of the self: the case of schizophrenia		
(i) Phenomenology		
11	Self and schizophrenia: a phenomenological perspective Josef Parnas	217
12	Self-disturbance in schizophrenia: hyperreflexivity and diminished self-affection Louis A. Sass	242
13	The self-experience of schizophrenics Christian Scharfetter	272
(ii) Social psychology		
14	The paranoid self Richard Bentall	293
15	Schizophrenia and the narrative self James Phillips	319
16	Self-narrative in schizophrenia Shaun Gallagher	336
(iii) Clinical neuroscience		
17	Schizophrenia as disturbance of the self-construct Kai Vogeley	361
18	Action recognition in normal and schizophrenic subjects Marc Jeannerod, Chloe Farrer, Nicolas Franck, Pierre Fourneret, Andres Posada, Elena Daprati and Nicolas Georgieff	380
19	Disorders of self-monitoring and the symptoms of schizophrenia Sarah-Jayne Blakemore and Chris Frith	407
