

## Index

Bold numbers indicate that the entry is the subject of a chapter beginning on that page, italic numbers indicate that the entry is the subject of a section starting on that page.

- air resistance, 52, 73
- Airy equation, 181
  - and Bessel functions, 189
  - solutions as power series, 183
- Albert Bridge, 144
- amplitude, 82
- analytic functions, 178
- anti-derivative, 22
- Argand diagram, 381
- attracting
  - fixed point, 225
  - set, 238
  - stationary point, 48
- autonomous, 13
- auxiliary equation
  - complex roots (difference case), 218
  - complex roots (ODE case), 115
  - distinct real roots (difference case), 215
  - distinct real roots (ODE case), 112
  - for difference equations, 215
  - for  $n$ th order ODE, 151
  - for 2nd order ODE, 112
  - repeated real root (ODE case), 113
  - second solution by reduction of order, 160
  - repeated root (difference case), 217, 222
- backwards Euler method, 210, 214
- bead on a wire, 344
- beating phenomenon, 148
- Bernoulli equations, 96
- Bessel's equation, 187
  - arising in circular drum problem, 198
  - general recurrence relation, 188
  - of order zero
    - first solution, 191
    - log solution, 192
  - of order  $1/3$ , 188
  - of order  $1/2$ , 190
  - of order one
    - first solution, 196
    - log solution, 196
    - of order  $n$ , 197
    - of order  $\nu$ , 187
- bifurcation
  - definition, 50
  - diagram
    - for logistic map, 238
    - for pitchfork bifurcation, 56
  - pitchfork, 54
  - saddle node, 57
  - transcritical, 57
- binary decimal, 243
- blow up in finite time, 42, 74
- body temperature, 80
- boundary value problems, 373
  - eigenvalues and eigenfunctions, 376
- Broughton suspension bridge, 144
- buoyancy, 127
- butterfly effect, 370
- Cauchy–Euler equation, 170, 184
- Cayley–Hamilton Theorem, 296, 300
- centre, 290, 301, 317, 322, 337
- chain rule
  - functions of one variable, 388
  - functions of two variables, 390
- chaos, 56, 374
  - in the logistic map, 240
- characteristic equation, 261
- Clay Mathematics Institute, 43
- cobweb diagrams, 225
- complementary function, 132
  - for difference equations, 215
  - for  $n$ th order equations, 151
  - for second order ODEs, 131
- complex numbers, 379
  - complex conjugate, 380
  - imaginary part, 379

complex numbers (cont.)  
   modulus and argument form, 380  
   real part, 379  
 conservative systems, 341  
 convergence of power series, 176  
   absolute, 177  
 coordinate transformation  
   complex eigenvalues, 287  
   distinct real eigenvalues, 271  
   repeated real eigenvalue, 295  
   representation of vectors, 302  
 coordinate transformations  
   representation of linear maps, 303  
 critical point  
   for functions of one variable, 389  
   for functions of two variables, 391  
 cubic equation, 151  
  
 damping, 347  
   critical, 125, 130  
   over-, 125  
   under-, 125  
 dashpot, 127  
 death  
   time of, 80, 87, 88  
 derivatives, 387  
   definition, 387  
   partial, 390  
 determinant, 155, 383  
 difference equations, 213  
   homogeneous, linear, 215  
   nonlinear, 224  
   order of, 213  
 differential  
   equation  
     autonomous, 13  
     order of, 13  
     ordinary, 11  
     partial, 11  
     separable, 59  
     trivial, 22, 59  
   inequality, 88  
   operator, 103  
 direction fields, 311  
 dissipative systems, 347  
 divergence theorem, 360  
 double angle formula, 83, 148  
 Dulac's criterion, 360, 362  
 dummy variable, 9  
 dynamical systems, 56, 374  
  
 ecological models, 310, 323  
 eigenfunctions  
   for boundary value problems,  
   376  
 eigenvalues, 259  
   and eigenvectors, 384  
   complex, 265  
   eigenvalue equation, 260  
   for boundary value problems, 376  
   of diagonal matrix, 264

  of matrix with zero in off-diagonal, 264  
   with MATLAB, 266  
 eigenvectors, 259  
   complex, 265  
   linear independence, 384  
   of diagonal matrix, 264  
   of matrix with zero in off-diagonal, 264  
 errata, 2  
 error estimate, 209  
 Euler  $\theta$ -method, 210  
 Euler–Mascheroni constant, 195  
 Euler's formula, 380  
 Euler's method, 201  
   as a nonlinear difference equation, 227  
   backwards version, 210, 214  
   convergence, 206  
   implemented in MATLAB, 204  
   trapezoidal, 210, 231  
 exact equations, 89  
   integrating factors, 91  
 existence  
   and uniqueness  
     second order equations, 251  
     second order linear ODEs, 101  
     theorem for scalar ODEs, 40  
     theorem for vector IVP, 250  
   example of ODE with non-existence, 38  
   of solutions of second order linear equations,  
   119  
   sketch proof for scalar ODEs, 44  
  
 Fibonacci numbers, 215, 223  
 fixed point, 224  
   analytic conditions for (in)stability, 225  
   rigorous argument, 231  
   stability properties (definitions), 225  
 Fourier series, 373, 377  
 frequency, 82  
 fundamental theorem of calculus, 22, 27, 37  
  
 gamma function, 190, 197  
 Gaussian integral, 32  
 golden ratio, 222  
  
 half-life, 5  
   carbon-14, 7  
   plutonium-239, 8  
 harmonic series, 194, 197  
 Hartman–Grobman Theorem, 316, 322, 374  
 Hessian, 392  
 homogeneous equations, 94  
 homogeneous linear equation, 14  
 Hooke's law, 120  
  
 implicit function theorem, 58  
 improper node, 295, 301  
 independent variables, 11  
 indicial equation  
   complex roots (Cauchy–Euler equation), 173  
   for Cauchy–Euler equation, 171, 184  
   near a regular singular point, 185

- repeated real roots (Cauchy–Euler equation), 171
- two real roots (Cauchy–Euler equation), 171
- inhomogeneous linear equation, 14
- initial condition, 26, 38
- initial value problem (IVP), 38
- integrating factor, 73, 76
  - for exact equations, 91
- integration, 88
  - integration variables, 9
- invariance, 276
- invertible matrix, 383
  
- Jordan canonical form, 269, 301
  
- kernel (of linear operator), 108
  
- Legendre’s equation, 195
- Leibniz, 1
- L’Hôpital’s rule, 148
- linear algebra, 107
- linear equation, 14
  - first order, 73, 75
  - homogeneous, 14
  - inhomogeneous, 14
  - second order
    - constant coefficients, **111**
    - construction with specified solutions, 163
    - series solutions, **176**
    - solutions exist for all time, 119
  - third order and above, **150**
- linear independence, **104**
  - of eigenvectors, **384**
  - of  $n$  functions, 153
  - of 2 functions, 104
  - of 3 functions, 154
- linear matrix equation
  - complex eigenvalues, **285**
    - canonical form, 288
    - explicit solution, 285
    - phase diagram, 287, 291
    - possible phase diagrams, 301
  - distinct real eigenvalues, **269**
    - canonical form, 274
    - explicit solution, 270
    - possible phase diagrams, 301
  - repeated eigenvalue, **295**
    - canonical form, 297
    - explicit solution, 297
    - possible phase diagrams, 301
- linear operator, 103, 108, 152
  - kernel, 108
- linear transformations and matrices, **303**
- linearisation, **314**
  - validity for nonlinear systems, 316, 322
- linearity, **102**, 131, 139
- Lipschitz continuity, 40, 44, 208
- logistic map, **233**, 374
  - bifurcation diagram, **238**
  - chaos, **240**
  - fixed points, **234**
  - period-doubling cascade, **237**, **246**
  - periodic orbits, **234**
    - sensitive dependence on initial conditions, 241
- logistic population model (ODE), **51**, 66, 311
- Lorenz attractor, 368
- Lorenz equations, **364**, **374**
  - sensitive dependence on initial conditions, 370
- Lotka–Volterra systems, **323**
  
- manifold
  - stable, 281, 317, 326–327, 356
  - unstable, 281, 317
- MATLAB
  - airy (Airy function), 181
  - and Euler’s method, **204**
  - besselj (Bessel function of 1st kind), 181, 190
  - bessely (Bessel function of 2nd kind), 181, 194
  - contour (contour plot), 21
  - eig (find eigenvalues and eigenvectors), 266
  - M-files on the web, 2
    - backeuler.m, 212
    - besselseries.m, 197
    - bifurcation.m, 246
    - cauchyeuler.m, 174
    - cylinder.m, 358
    - euler.m, 204, 232
    - flies.m, 370
    - f2.m, 246
    - logistic.m, 246
    - lorenz37.m, 364
    - lorenzdraw.m, 368
    - lotkaplane.m, 339

    - rungekutta.m, 212
    - solvem.m, 370
    - xnvsn.m, 246
  - ode45 (ODE solver), 15, 18, 209
  - quad (integration), 19
  - quiver (direction field), 311
- matrices
  - and linear transformations, **303**
  - determinant, *see* determinant
  - eigenvalues, *see* eigenvalues
  - eigenvectors, *see* eigenvectors
  - similar, **304**
  - symmetric, 392
- matrix algebra, **382**
- maximal interval of existence, 42
- Millennium Bridge, 128
- modulus and argument form, 380
  
- Navier–Stokes equations, 12, 34, 42
- Newton, 1
  - law of cooling, 79, 87
  - second law of motion, 12, 29
- Newtonian systems, **341**

398

node  
 improper, 295, 301  
 stable, 277, 301  
 unstable, 278, 301  
 non-singular matrix, 383  
 non-uniqueness of solutions of ODEs, 39, 74  
 nonlinear pendulum, 352  
   with quadratic damping, 358  
 nulclines, 312, 340

ODE, *see* differential equation  
 orbit, 224  
   periodic, *see* periodic orbit(s)  
 order  
   of a difference equation, 213  
   of a differential equation, 13  
 ordinary point, 178  
 oscillation(s), 81, 117, **120**  
   combining two oscillations of the same  
     frequency, 83, 120  
   damped, 123

partial derivatives, 390  
 partial differential equations, 12, 373  
 particular integral (for ODE), 132  
   exponential right-hand side, 135  
   polynomial right-hand side, 133  
 resonance, *see* resonance  
 rule of thumb, 139  
 sine or cosine on right-hand side, 137, 143  
 via variation of constants formula, 164  
 particular solution (for difference equation), 219  
 $\lambda^n$  on the right-hand side, 221  
 polynomial on right-hand side, 219

pendulum  
 linear approximation, 122  
 nonlinear equation, 352  
   damped, 356

period, 82  
   of decaying oscillations, 126  
 period-doubling cascade, 237, 246  
 periodic orbit(s), 226, 230, 290, 301, **360**

phase cylinder, 358  
 phase diagram, 47  
   analytic method for coupled equations, 314  
   general comments, 309  
   linear matrix equation  
     complex eigenvalues, 287, 291  
     distinct real eigenvalues (coupled), 279  
     distinct real eigenvalues (uncoupled), 276  
   summary of possibilities, **301**

phase portrait, *see* phase diagram  
 phase space, 56  
 pitchfork bifurcation, 54  
   bifurcation diagram, 56  
 Poincaré–Bendixson Theorem, 361  
 Poiseuille flow, 35  
 polar coordinates, 289, 381  
 population model

*Index*

potential energy, 341  
   bead on a wire, 345  
 power series, 176, 388  
   convergence, 177  
   for  $\cos x$ , 389  
   for  $e^x$ , 389  
   for  $\sin x$ , 389  
 predator-prey models, 331, 334  
 primitive, 22  
 product rule, 387  
 pseudo-resonance, 145

quadratic damping  
   air resistance, 52, 73  
   nonlinear pendulum, 358  
 quotient rule, 387

radioactive decay, 5  
 radiocarbon dating, 6  
 radius of convergence, 177  
 ratio test, 177  
 real numbers, 379  
 recurrence relation, 179  
   for Airy equation, 182  
   for Bessel's equation, 188  
   near a regular singular point, 186  
 reduction of order, **159**, 168  
   for  $xe^{\lambda x}$  solution of 2nd order ODE, 160  
   for log solution of Cauchy–Euler equation,  
     172  
 regular singular points, 183  
   log solution, 186  
 resonance, **141**  
 response to periodic forcing, 147  
 Runge–Kutta scheme, 209, 212

saddle (point), 278, 301, 393  
 saddle node bifurcation, 57  
 second order equation  
   Cauchy–Euler equation, **170**  
   constant coefficient linear equation  
     homogeneous case, **111**  
     inhomogeneous case, **131**  
   existence and uniqueness, 251  
   general theory for linear equations, **101**  
   reduction of order technique, **159**  
   series solutions, **176**  
   variation of constants formula, **164**

semi-stable stationary point, 50  
 sensitive dependence on initial conditions  
   in the logistic map, 241  
   in the Lorenz equations, 370  
 separation of variables  
   for ODEs, 60  
   for radially symmetric wave equation,  
     198  
   for the vibrating string, 375  
 separatrix, 281, 326, 327, 356  
 series solutions, **176**  
 similar matrices, **304**  
 simple harmonic motion, 117, 121
