Preface page vii

Part I Hyperbolic 3-manifolds

Combinatorial and geometrical aspects of hyperbolic 3-manifolds <i>Yair N. Minsky</i>	3
Harmonic deformations of hyperbolic 3-manifolds <i>Craig D. Hodgson and Steven P. Kerckhoff</i>	41
Cone-manifolds and the density conjecture <i>Jeffrey F. Brock and Kenneth W. Bromberg</i>	75
Les géodésiques fermées d'une variété hyperbolique en tant que nœuds <i>Jean-Pierre Otal</i>	95
Ending laminations in the Masur domain <i>Gero Kleineidam and Juan Souto</i>	105
Quasi-arcs in the limit set of a singly degenerate group with bounded geometry <i>Hideki Miyachi</i>	131
On hyperbolic and spherical volumes for knot and link cone-manifolds <i>Alexander D. Mednykh</i>	145
Remarks on the curve complex: classification of surface homeomorphisms <i>W. J. Harvey</i>	165

Part II Once-punctured tori

On pairs of once-punctured tori <i>Troels Jørgensen</i>	183
Comparing two convex hull constructions for cusped hyperbolic manifolds <i>Hiroataka Akiyoshi and Makoto Sakuma</i>	209
Jørgensen's picture of punctured torus groups and its refinement <i>Hiroataka Akiyoshi, Makoto Sakuma, Masaaki Wada and Yasushi Yamashita</i>	247
Tetrahedral decomposition of punctured torus bundles <i>J. R. Parker</i>	275
On the boundary of the Earle slice for punctured torus groups <i>Yohei Komori</i>	293

Part III Related topics

Variations on a theme of Horowitz <i>James W. Anderson</i>	307
Complex angle scaling <i>D. B. A. Epstein, A. Marden and V. Markovic</i>	343
Schwarz's lemma and the Kobayashi and Carathéodory pseudometrics on complex Banach manifolds <i>Clifford J. Earle, Lawrence A. Harris, John H. Hubbard and Sudeb Mitra</i>	363
