

## *Index*

- Abel summability, 16
- Almost-periodic
  - functions, 191–204, 229
  - pseudomeasure, 201
- Analytic measure, 113
- Banach algebra, 231
  - homomorphism, 251
  - normal, 260
  - regular, 260
  - self-adjoint, 246
  - semisimple, 244
- Bernstein, 190
  - inequality, 18, 50
  - reverse inequality, 55
  - theorem, 34
- Besov spaces, 61
- Bessel's inequality, 30
- Beurling–Helson, 254
- Blaschke product, 109
- Bochner, 121, 170
- Bohr, 202
  - compactification, 229
  - group, 229
- Canonical
  - factorization, 109
  - $W$ -decomposition, 54
- Carleson, 80
- Cesàro means, 14
- Character, 225
- Characteristic function, 173
- Chebyshev's inequality, 129
- Complete
  - direct sum, 224
  - orthonormal system, 30
- Conjugate
  - Fourier series, 3
  - function, 83
  - Poisson kernel, 101
- Convolution, 4, 45, 154, 163
  - of almost-periodic functions, 198
  - of pseudomeasures, 186
- deLeeuw, 302
- de la Vallée Poussin kernel
  - for  $\mathbb{R}$ , 158
  - for  $\mathbb{T}$ , 16
  - for  $\mathbb{T}^d$ , 64
- Difference equation, 60
- Dini's test, 75
- Dirichlet kernel, 14
- Distribution
  - Gaussian, 173
  - of a random variable, 173
  - on  $\mathbb{T}$ , 48
  - tempered, 181, 183
- Distribution function, 86
- Ditkin–Shilov, 263
- Divergence
  - sets of, 76
- Dual group, 226
- Ergodic theorem, 43
- Euler's formula, 7

- Exponential Block Determined, 61
- Fatou, 22
- Fejér  
kernel  
for  $\mathbb{T}$ , 12  
for  $\mathbb{R}$ , 156  
for  $\mathbb{T}^d$ , 64  
means, 14
- Fejér's lemma, 17
- Fejér's theorem, 19
- Fourier coefficients  
of integrable functions, 2  
of linear functionals, 37
- Fourier series  
of a function, 3  
of almost-periodic functions, 200  
of linear functionals, 37
- Fourier transforms  
on  $\mathbb{R}$ , 151–221  
on LCA groups, 227
- Fourier–Carleman transform, 214
- Fourier–Gelfand transform, 244
- Fourier–Stieltjes  
coefficients, 40  
series, 40
- Function algebra, 240  
inverse-closed, 241  
normal, 258  
regular, 258  
self-adjoint, 241
- Gauss's kernel, 159
- Gaussian variable, 173
- Gelfand representation, 242
- Gelfand–Mazur, 237
- Haar measure, 224
- Hardy, 96, 115  
spaces, 105  
Tauberian theorem, 73
- Hardy–Littlewood series, 35
- Hausdorff–Young, 123, 151, 177, 228, 304
- Herglotz's theorem, 41
- Homogeneous Banach space, 14
- Hull-kernel topology, 260
- Hunt, 80
- Ideal  
maximal, 235  
primary, 262  
regular, 237
- Jackson  
kernel  
for  $\mathbb{T}$ , 17, 23  
for  $\mathbb{T}^d$ , 64  
theorem, 52
- Jensen's inequality, 106
- Kahane, 302
- Kaufman, 220, 299
- Kolmogorov, 80
- Krein, 61  
algebra, 61
- Kronecker set, 220
- Kronecker's theorem, 81, 217, 227
- Lacunary (Hadamard), 133
- LCA group, 223
- Lebesgue, 21
- Lebesgue decomposition, 40
- Littlewood, 96
- Littlewood–Paley, 51
- Localization  
principle of, 75

- Locally compact abelian group, 223
- Log-convex, 143
- Lusin, 80
- Malliavin, 268
- Marcinkiewicz, 172  
Interpolation theorem, 128
- Maximal  
conjugate function, 100  
function, 96  
non-tangential, 100
- Maximal-ideal space, 242
- Multiplicative linear functional, 235, 238
- Multipliers  
on Fourier coefficients, 59  
universal, 44
- Nevanlinna, 108
- Normal variable, 173
- Paley–Wiener, 208
- Paley–Zygmund, 304
- Parseval, 31, 37, 164, 177, 182
- Partition of unity, 259
- Plancherel, 176
- Poisson  
kernel  
for  $\mathbb{R}$ , 158  
for  $\mathbb{T}$ , 16  
summation formula, 161
- Poisson–Jensen, 106
- Pontryagin duality theorem, 226
- Positive definite  
on  $\mathbb{R}$ , 169  
sequences, 41
- Probability, 172, 299
- Pseudofunction, 190
- Pseudomeasure, 186
- Quasi-analytic, 144
- Rademacher functions, 300
- Radical, 244
- Random variable, 172
- Resolvent set, 236
- Riemann–Lebesgue lemma, 13, 155
- Riesz products, 136
- Riesz, F., 113
- Riesz, M., 93, 113
- Riesz–Thorin, 120
- Rudin–Shapiro polynomials, 36
- Sidon set, 139
- Sobolev spaces, 61
- Spectral analysis  
weak-star, 205
- Spectral measure, 43
- Spectral norm, 244
- Spectral synthesis  
in regular algebras, 267–273  
set of, 268  
weak-star, 205
- Spectral theorem, 42
- Spectrum, 244  
norm, 195  
weak-star, 205
- Strong type  $(p, q)$ , 129
- Subgaussian, 303
- Sublinear operator, 129
- Summability  
in norm, 9
- Summability kernel, **10**, 225  
on  $\mathbb{T}^d$ , 64  
positive, 10
- Support  
of a distribution, 49  
of a function, 18

- of a tempered distribution,  
184
- Symbolic calculus, 273
  - individual, 280
- Tensor products, 287
- Titchmarsh
  - convolution theorem, 213
- Trigonometric polynomial
  - degree of, 2
  - frequencies of, 2
  - on  $\mathbb{R}$ , 194
  - on  $\mathbb{T}$ , 2
- Uniqueness theorem, 38, 157
- Van der Corput's lemma, 257
- Varopoulos, 287
- Vitaly's lemma, 97
- Weak  $L^p$  type, 86, 129
- Weierstrass
  - approximation theorem, 16
  - function, 135
- Weyl, 50
- Wiener
  - continuous measures, 47
  - Tauberian theorem, 264
  - theorem, 239
- Wiener–Levy, 247
- Wiener–Pitt, 284
- Young's inequality, 122
- Zygmund, 35
  - class  $\Lambda_{*,*}$ , 52
  - class  $\lambda_{*,*}$ , 135
