

## Index of works cited

The following conventions apply to all three indices.

Page numbers are printed in roman, chapter numbers in bold, and note numbers in italic. Thus '109' means 'p. 109', and '8:53' means 'ch. 8 note 53'.

Death-dates are given subject to the caution mentioned in the Preface (see above, p. x). Early dates and ascriptions are given without prejudice to questions of historicity and authenticity.

In this index, titles are abbreviated to short forms or catchwords; bibliographical details will normally be found in the first note in which a work is cited. Expansions of the few bibliographical abbreviations used above are also entered in this index.
