

## Contents

<i>Preface</i>	<i>page</i> vii
<b>1 Operators and Hardy spaces</b>	1
1.1 Banach spaces and bounded operators	1
1.2 Hardy spaces on the disc and half-plane	4
1.3 Inner and outer functions	8
1.4 Vector-valued Hardy spaces	13
<b>2 Closed operators</b>	17
2.1 The graph of an operator	17
2.2 Semigroups	22
2.3 The gap metric	30
<b>3 Shift-invariance and causality</b>	37
3.1 Invariant subspaces	37
3.2 Invariant operators	44
3.4 Causality	49
3.4 The commutant lifting theorem	53
<b>4 Stability and stabilization</b>	63
4.1 Stability theory	63
4.2 Robustness	72
4.3 The chordal metric	81
<b>5 Spaces of persistent signals</b>	89
5.1 Almost-periodic functions	89
5.2 Power signal spaces	105
5.3 Spectral distribution functions	109

0521546192 - Linear Operators and Linear Systems: An Analytical Approach to Control Theory

Jonathan R. Partington

Table of Contents

[More information](#)

vi	<i>Contents</i>	
<b>6</b>	<b>Delay systems</b>	121
6.1	Background and classification	121
6.2	Stability	129
6.3	Rational approximation	134
6.4	Stabilization	144
	<i>Bibliography</i>	151
	<i>Index</i>	162
