New Studies in Economic and Social History

Edited for the Economic History Society by
Michael Sanderson
University of East Anglia, Norwich

This series, specially commissioned by the Economic History Society, provides a guide to the current interpretations of the key themes of economic and social history in which advances have recently been made or in which there has been significant debate.

In recent times economic and social history has been one of the most flourishing areas of historical study. This has mirrored the increasing relevance of the economic and social sciences both in a student's choice of career and in forming a society at large more aware of the importance of these issues in their everyday lives. Moreover specialist interests in business, agricultural and welfare history, for example, have themselves burgeoned and there has been an increased interest in the economic development of the wider world. Stimulating as these scholarly developments have been for the specialist, the rapid advance of the subject and the quantity of new publications make it difficult for the reader to gain an overview of particular topics, let alone the whole field.

New Studies in Economic and Social History is intended for students and their teachers. It is designed to introduce them to fresh topics and to enable them to keep abreast of recent writing and debates. All the books in the series are written by a recognised authority in the subject, and the arguments and issues are set out in a critical but unpartisan fashion. The aim of the series is to survey the current state of scholarship, rather than to provide a set of prepackaged conclusions.

The series has been edited since its inception in 1968 by Professors M. W. Flinn, T. C. Smout and L. A. Clarkson, and is currently edited by Dr Michael Sanderson. From 1968 it was published by Macmillan as *Studies in Economic History*, and after 1974 as *Studies in Economic and Social History*. From 1995 *New Studies in Economic and Social History* is being published on behalf of the Economic History Society by Cambridge University Press. This new series includes some of the titles previously published by Macmillan as well as new titles, and reflects the ongoing development throughout the world of this rich seam of history.

For a full list of titles in print, please see the end of the book.
