 non-constant (random variable), [71](#)
 non-trivial (distribution), [71](#)
 non-trivial (process), [71](#)
 non-trivial (random variable), [71](#)
 non-zero (process), [71](#)
 non-zero (random variable), [71](#)
 nondegenerate (Lévy process), [157](#)
 nondegenerate (measure), [156](#)
 nonnegative-definite (function), 8, 331
 norm, 205
 norm (of linear operator), 205
 nowhere differentiable, 26
 null array, 47, 67, 91
 occupation density, 327
 joint continuity of, 328
 one-sided (set), 446
 operator-selfdecomposable distribution, 118
 operator-semi-stable distribution, 118
 operator-stable distribution, 118
 strictly, 118
 operator-stable process, 118
 Ornstein–Uhlenbeck process, 108
 driven by Lévy process, 108
 generalized (driven by two-dimensional Lévy process), 456
 stationary distribution of generalized, 456
 Ornstein–Uhlenbeck type
 limit distribution of process of, 109
 process of, 108–114, 116, 272, 426, 435
 stationary process of, 436
 oscillating (Lévy process), [256](#), 257, 363
 overshoot, [369](#)
 packing dimension, 379
 packing measure, 379
 Pareto distribution, 46, 98, 452
 partial fraction expansion, 391
 Peres–Solomyak number, 184, 454
 piecewise constancy (of sample functions), 135
 piecewise monotone, 394
 Pisot–Vijayaraghavan number, 184, 454
 point masses, 174
 point recurrent, 263, 319
 Poisson distribution, [10](#), 31, 39, 119, 122
 Poisson point process, 144
 Poisson process, [14](#), 15–18, 342
 Poisson random measure, [119](#), 120, 122, 123, 144, 323
 intensity measure of, 119, 120, 122, 123
 Poisson transform, 426
 polar, [288](#), 329
 co-, 288
 one-point set, 313
 polar decomposition (of measure on \mathbb{R}^d), 437
 positivity (of operator), 207
 potential density, 242
 q -, 242
 potential kernel, 282
 potential measure, [203](#), 237
 continuous singular q -, 294
 q -, [203](#), 251, 283, 334
 potential operator
 in the sense of Yosida, 212, 236, 272
 q -, 283
 precompact, 66
 principle of reflection, 153, 166
 probability measure, 1
 probability space, 1
 pure, [174](#)
 purely non-Gaussian, [38](#), [65](#)
 quasi-left-continuity, [279](#), 280, 302, 370
 quasi-unimodal, 263, 272
 radial part, 437
 radially absolutely continuous, [178](#)
 Radon–Nikodým derivative, 218
 random variable, 1
 random walk, [5](#), 249, 250, 336
 law of the iterated logarithm for, 357
 recurrence/transience of, 237, 238
 range (of matrix), 156
 range (of operator), 206
 range (of path), 326, 379, 382
 range (of stochastic integral mapping), 438
 recurrence/transience criterion
 by potential measures, 239

SUBJECT INDEX

519

- of Chung–Fuchs type, 252
- of Spitzer type, 254
- recurrent, [237](#), 243, 270, 294
 - BG*-, 329
- recurrent potential operator, 254
- reflecting process, [333](#), 384
- reflection (of probability measure on the line), 8
- reflection principle, 280
- regular (point), [313](#), 353
- regular for itself, [313](#), 316, 327
- regularly varying (function), [164](#)
- renewal theorem, 271, 472
- resolvent equation, 207, 283
- resolvent operator, 207
- Riemann–Lebesgue theorem, 174, 183, 190, 293, 294, 466
- Riesz potential, 261
- rotation invariant, 85, 114, 116
- row sum, 47

- sample function, 3
- sample path, 3
- scaled Poisson process with drift, 444
- selection theorem, 42
- selfdecomposable distribution, [90](#), 93, 99, 116, 117, 404, 436, 452
 - absolute continuity of, 177, 181
 - as distribution of selfsimilar additive process, 99
 - as limit distribution, 91, 108
 - asymptotics of density of, 409
 - completely, 439
 - Lévy measure of, 95, 112
 - m*-times, 439
 - Q*-, 118
 - smoothness of, 190
- selfdecomposable process, [93](#), 292, 403–416
- selfsimilar process, [70](#), 71, 117, 435
 - broad-sense, [70](#), 71, 75
 - broad-sense *H*-, 74
 - H*-, 74
- semi-polar, 332
- semi-selfdecomposable distribution, [90](#), 93, 94, 102, 103, 181
- semi-selfdecomposable process, [93](#), 292
- semi-selfsimilar process, [70](#), 71
 - broad-sense, [70](#), 71, 73
 - broad-sense *H*-, 74
- H*-, 74
 - semi-stable distribution, [70](#), 115, 117, 158, 399, 456
 - α -, 76
 - characteristic function of, 83
 - density of, 190
 - index of, 76
 - Lévy measure of, 77
 - Lévy measure of strictly, 81
 - 1-, 76
 - strictly, [70](#)
- semi-stable process, [70](#), 71, 143, 193, 418
 - α -, 76
 - drifting/oscillating of, 366
 - exponent of, 75
 - hitting time of $(0, \infty)$ for, 356
 - index of, 76
 - moment of, 162
 - 1-, 76, 270, 316
 - point recurrence of, 319
 - polarity and Hausdorff dimension for, 313
 - q*-capacity for, 311
 - recurrence/transience of, 259, 260
 - regularity of 0 for itself for, 326
 - set Σ_0 for, 326
 - strictly, [70](#), 71, 311
 - support of, 447
 - variation function of, 143
- semigroup (closed additive), 446
- semigroup (of operators), 206
 - contraction, 206
 - property, 283
 - strongly continuous, 206
- semimartingale, 144, 236, 431
- set Σ_0 , [313](#)
- shift (of path), 327
- σ -algebra, 1
 - Kolmogorov, 4
- sign function, xiv
- simple function, 432
- singular, 146, [174](#), 186, 439
- slow point, 381
- slowly varying (function), [164](#), 410
- smallest closed extension (of operator), 206
- sojourn time, 238
 - mean, 238

- space $\mathbf{D} = D([0, \infty), \mathbb{R}^d)$, xiv, 121, 273
space $D([0, t], \mathbb{R}^d)$, 126, 249
span (of semi-selfdecomposable distribution), 90
span (of semi-selfsimilar process), [74](#)
span (of semi-stable distribution), [76](#)
spectral decomposition, 426
spherical part, 437
stable distribution, [69](#), 115, 116, 194, 195, 426
 α -, 76
as limit distribution, 94
characteristic function of, 83, 86
density of, 87, 190
duality between strictly —s, 90
estimate of density of multivariate, 449
index of, 76
Lévy measure of, 78
Lévy measure of strictly, 81
multivariate, 447
nondegenerate α -, 448
1-, 76, 84
one-sided strictly $\frac{1}{2}$ -, 12, 29, 45, 280, 399, 403
rotation invariant, 86, 115, 447
strictly, [69](#), 84, 87, 89
strictly 1-, 84
symmetric, 86
stable process, [70](#), 71, 115, 117, 193, 332, 384
 α -, 76
capacity of strictly, 304
drifting/oscillating of, 365
hitting time of $(0, \infty)$ for, 355
index of, 76
law of the iterated logarithm for, 358
mode behavior of, 415
1-, 76, 270, 316, 332, 362, 382
potential density of, 270
potential density of rotation invariant, 261
recurrence/transience of, 260
regularity of 0 for itself for, 325
rotation invariant, 202, 236, 304, 330, 381
set Σ_0 for, 325
strictly, [70](#), 71, 82, 115, 361, 367, 380
strictly $\frac{1}{2}$ -, 87
support of, 447
variation function of, 143
weak/strong transience of, 262
with parameters (α, β, τ, c) , 87
without positive jumps, 350
stationary increments property, 3
stationary process, 435
Stirling's formula, 171, 364
stochastic area, 98, 445
stochastic integral mapping, 438
stochastic process, 2, 3
stochastically continuous, 3
uniformly, 51
stopping time, [275](#), 275–280, 331
 σ -algebra \mathcal{F}'_T for, 275
 σ -algebra \mathcal{F}_T for, 275
strong Markov property, 278, 283, 373
strongly unimodal, 146, [395](#), 423, 424, 426
Student's t -distribution, 46, 98
subexponential (distribution), 146, [163](#), 450
locally, [451](#)
 $(0, c]$ -, [450](#)
subexponential density, [451](#)
submultiplicative (function), 159, 165, 167
subordinate, 198, 213
subordination (of Lévy process), [198](#), 198–205
iteration of, 201
subordination (of semigroup of operators), [213](#)
subordinator, [137](#), 138, 153, 185, 197, 212, 271, 330, 332, 383, 423
potential density of stable, 261
selfdecomposable, 234, 235, 415, 422
short time behavior of, 360
stable, 138, 153, 271
strictly $\frac{1}{2}$ -stable, 202, 280, 349
strictly stable, 202, 216, 233, 331
subexponentiality in, 164
subordination by, 198, 213
unimodality in, 417, 418
support (of function), 207
support (of Lévy process), [154](#), 243, 291, 306, 328, 446
support (of measure), [148](#)
support (of random variable), [148](#)
