

## INDEX

- approximate identities, 19–20, 28–9, 48–9
- Bochner's theorem, 74–7
- complex numbers (physical motivation), 42–5
- consistency theorems, 12–13, 16–17, 30, 64–5, 80, 97–8, 102, 111–13
- convergence of
- distributions, 17–18, 64–5, 99, 102, 108
  - open support test functions, 59–60, 94–5
  - standard test functions, 14, 59, 101
- convolution
- classical, 21–4, 48–50
  - distribution, viii–ix, 25–32, 120–31
- $D^\alpha$ , 89–90
- $\mathcal{D}$  (or  $\mathcal{D}'$ ), 15, 61, 81–5
- dipole, *see* poles
- Dirac Delta Function, vii, 9–11, 19, 67, 78–88, 100, 115–16
- distribution
- general distribution (definitions), 8, 15, 101
  - general distribution (motivation), 1–13
  - tempered distribution (definitions), 61–2, 95
  - tempered distribution (motivation), viii, 58–9, 66, 97
  - see also* periodic, positive, positive definite distribution
- distribution operations
- change of variable, 11–13, 15–16, 62, 96
  - convolution, 30, 120–4
  - differentiation, 9–13, 15–16, 62, 96
  - Fourier transform, 62, 96
  - multiplication, 11–13, 15–16, 62, 96, 120–4
- Dunford and Schwartz, 125, 128
- Edwards, 15, 137
- fairly good function, 47
- finite differences, 33–5
- Fourier Inversion Theorem, 54–7, 66, 94, 100
- Fourier series, 13, 20–1, 77–88
- Fourier transform
- classical (definitions), 45, 91–3, 106–7
  - classical (motivation), 45, 51–3
  - distribution, 62–7
  - examples, 67–74
- gamma function, 73–4
- Gelfand and Šilov, 15
- Halmos, 137
- Herstein, 42
- Hörmander, 55
- Horváth, 105
- identity theorems, 13, 18–19, 30, 65–6, 99–100, 102–3, 123–4
- König, 105
- Lighthill, vii, 47
- localization of distributions, 108, 111–20
- Loomis, 137
- measure theory, viii–ix, 2, 6, 77, 95, 125–9, 131–4, 137–40
- mesa function, 4, 61, 85
- multi-index, 89
- multiplication of distributions, ix, 120–31
- see also* distribution operations

Cambridge University Press

978-0-521-55890-7 - Theory of Distributions: A Non-technical Introduction

Ian Richards and Heekyung Youn

Index

[More information](#)

- odd/even distribution (or function), 39, 71, 87–8
- ordinary differential equations, 68–70
- partitions of unity, 135–6
- periodic distribution, 77–88
- Poisson summation formula, 86–7
- poles (multipoles)
- monopole, *see* Dirac Delta Function
  - dipole, ix, 35, 77
  - quadrupole, 35, 41
  - octopole, 36
  - $2^n$ -ipole, 36–7
- positive distribution, 39, 74–7
- positive-definite distribution, 75–7
- pseudofunction, 38–41, 71–4, 76–7
- $\mathcal{S}$  (or  $\mathcal{S}'$ ), 47, 53–4, 60–1, 63–4, 81–6
- Schwartz, Jacob, *see* Dunford and Schwartz
- Schwartz, Laurent, vii, 15, 66
- Shiraishi, 105
- Šilov, *see* Gelfand and Šilov
- structure theorem for distributions, 137–40
- $T_f$ , 8, 12–13, 15–17, 62–3, 67, 80, 95, 102
- tensor products, 108–34, 141–3
- test function
- compact support test function (*same as* standard test function)
  - open support test function, 46–8, 53–4, 59–61, 91, 94–5
  - standard test function, 2–4, 14, 59, 61, 101
- Watson, *see* Whittaker and Watson
- Whittaker and Watson, 73–4
