Page numbers cited directly after the semicolon following a final subentry refer to minor, unrelated mentions in the text of the main entry.

- Absalom of Saint-Victor, 21
 absolute space, 197
 absolutely light, 134
 Abu'l Barakat: and *mail* theory, 95
 Abu Ma'shar, 31
 acceleration: Buridan on, 97–8, 141; *see also* motion
 Acropolites, George, 189
 Adalberon of Laon, 19, 20
 Adelard of Bath, 22, 23
 Ailly, Pierre d', 143
 air: as cause of motion, 62; and earth's rotation, 114, 116; as intermediate element, 59–60; violent motion of, 61; 134
 Albert of Saxony: and eternity of the world: 80–1; and fall of homogeneous bodies, 91; 129
 Albertus Magnus (Albert the Great): on Aristotle, 163–4, 174; attitude toward natural philosophy, 200; 31, 40, 175
 alchemy, 137, 169
 Alexander of Aphrodisias, 25, 28
 Alfred Sareshel, 24
 Algazali, 71
 Alhazen (Ibn al-Haytham), 45
 Ambrose, Saint: and Basil, 6; 5, 32, 108
 Anastasius, emperor, 7
 ancient way (*via antiqua*), 160
 angel(s): and place, 155; 109, 111
 anonymous treatise, 132
 Anselm of Laon, 109
 Appollonius of Perga, 11
 Archimedes, 11, 13, 14, 25
 Aristarchus of Samos, 113
 Aristotelian(s), 161–3
 Aristotelianism: 161–7; as body of knowledge, 166; broader than Aristotle's works, 27, 85, 126; and changing times, 174; and Church, 204; essence of, 162–3; in seventeenth century, 168–9; language of, 198; Neoplatonic, 177; not rigid, 163–6
 Aristotelians: image of, 203; 169, 202
 Aristotle: and absence of celestial change, 64; ban on his books at Paris, 70–1; and cause of natural fall, 97; and contrary qualities, 109; and cosmology, 104, 106–7; departures from, 93, 98–9, 121, 126, 132, 162, 165–6; dissemination of his thought, 27–32; and division of knowledge, 135; and extramundane existence, 124; intellectual inheritance from, 54–69; interpreting his intent, 164–5; and ladder of nature, 147; and logic, 32; misunderstandings of, 201; on mixed bodies, 89–90; and motion, 86–7, 96, 148, 164–5; natural books of, 47; on natural impossibilities, 78; and other worlds, 117, 119, 120–1; the Philosopher, 68–9, 73; and principle of simplicity, 146; and Ptolemy, 104, 105; and rational natural philosophy, 200; on resistance of medium, 88; role of air in violent motion, 94; and role of experiment, 159–60; and secondary causation, 179; and the study of medicine, 156; and system of concentric spheres, 65–6; and the three philosophies, 43, 47; translations of his works, 26–7; two explanations of celestial motion, 110–1; and understanding of natural philosophy, 135–6; violation of three principles of, 124–5; works: *Categories*, 20, 99, 149; *Metaphysics*, 66, 67; *Meteorology*, 24, 47, 135–6; *On Generation and Corruption*, 24, 47; *On the Heavens*, 24, 28, 47, 55, 63–4, 66, 74; *On the Senses*, 156; *On the Soul*, 28, 47; *On Youth and Old Age*, 156; *Physics*, 24, 28, 47, 66; *Posterior Analytics*, 43, 144; *Prior Analytics*, 43; *Sophistical Refutations*, 43; *The Small Works on Natural Things (Parva*

240

naturalia), 47; *Topics*, 43; works falsely attributed to, 30–1; 11, 12, 13, 24, 50, 53, 71, 91, 112, 190

arithmetic: debate with geometry, 46; in Islam, 179; as valued subject, 46; 15, 44–5, 172

arts, faculty of: and Aristotelian natural philosophy, 173; as corporation, 35; objectives of, 49–50; struggle with faculty of theology, 72–4; 199

arts masters: and theology, 175

astrology, 48, 137

astronomy: in Islam, 179; praised, 46–7; 5, 16, 44, 45, 172, 193

atomism, 123, 162, 179

Augustine, Saint: attitude toward liberal arts, 5; commentary on Genesis, 6; 4, 5, 15, 32, 45, 123, 183

aux, 106

Avempace, 87–8, 93, 177

Avendauth (Abraham ibn Daud), 29

Averroes (Ibn Rushd): and Avempace, 87–8; impact on Latin West, 30; and place of last sphere, 58; praised Aristotle, 68–9; on religion and science, 184–5; 28, 29, 40, 49, 71, 82, 177

Avicenna (Ibn Sina): contributions of, 29; and *mail* theory, 94–5; and use of natural philosophy, 157; works: *Sufficientia*, 29; *Canon of Medicine*, 29, 157; 25, 40, 49, 71, 85, 96, 177, 178, 180

Bacon, Roger: and astronomy, 46; and experience, 144; and music, 47; rejected impressed force, 95

Baghdad, 27

Bartholomew the Englishman, 133

Basil, Saint: commentary on Genesis, 5–6; critic of pagan Greeks, 3; and handmaiden concept, 4; 108

Bede, Venerable, 13, 14, 108

Benedetti, Giovanni Battista, 88, 93

Bernard of Chartres, 22, 161

Bernard Silvester, 22

Bessarion, Cardinal, 189

Bible: and impetus theory, 112; 139, 152, 185

biblical waters, 108

big picture, 133–5

Biruni, al-, 178

bishop of Paris, 176

Blasius of Parma: and mathematics, 143; and music, 158; on separation of surfaces in vacuum, 150–1

Blund, John, 112

Boethius, Ancius Manlius Severinus: and arithmetic, 44–5; and music, 44–5; 13, 14, 15, 16, 20, 50

Boethius of Dacia: on eternity of world, 75–6; 77, 78, 80

Index

Bologna, University of: as model, 37; 35, 36, 157, 172

Bonaventure, Saint: and creation of world, 117–8; on relations between arts and theology, 72; 71, 84, 140

Bonetus, Nicholas: and self-dissipating impetus, 93–4, 95, 96

Book of Causes (Liber de causis), 31

Bradwardine, Thomas: and application of mathematics to natural philosophy, 151; and extracosmic void, 122–4; and fall of homogeneous bodies, 91; and his mathematical representation of motion, 87, 148; works: *In Defense of God Against the Pelagians (De causa Dei contra Pelagium)*, 122; *Treatise on the Continuum (Tractatus de continuo)*, 151; *Treatise on Proportions*, 148, 149, 175

Brahe, Tycho, 202

Bruni, Leonardo, 4

Burgundio of Pisa, 25

Buridan, John: on Aristotle's explanations, 165; and earth's axial rotation, 113–4; and existence of other worlds, 128; God and natural certitude, 144–5; and impetus theory, 95–8, 165; and methodology, 195; and reaction to Aristotle, 201; on rest and motion, 147–8; and theologians, 81; works: *Questions on De caelo*, 165; *Questions on the Physics*, 165; 112, 115, 116, 129, 169

Burley, Walter, 40, 79, 149

Byzantine Empire: 186–91; and preservation of Greek science, 191; scholarship in, 190–1; wars of, 188; 185

Byzantium, 9, 176

calculators, 149–50

Callippus of Cyzicus, 65, 66

Campanus of Novara, 109

candle, 199

Cassiodorus, 13, 14, 15

cathedral schools, 19, 20

Catholic Church, 186–7, 203

causation, 179

cause(s): final, 56; four, 56, 136

celestial ether, 64–5, 109–10, 134

celestial motion, *see* motion

celestial region: and influence on terrestrial region, 67, 134–5, 140; described, 134; incorruptible, 63–9

celestial sphere(s): concentric, 65–6; last, 58; ninth, 108; tenth, 108; unrolling, 66; *see also* orb(s)

certitude, 144, 195

Cesalpino, Andreas, 163

Chalcidius, 13, 18

change(s): four kinds, 56–7

Charlemagne: and education, 19; 9

- China, 34, 168
 Choniades, Gregory, 189
 Christ, 153
 Christianity: and adjustment to Greek secular thought, 85; in Byzantine Empire, 186–91; dissemination of, 2, 182; and reception of pagan learning, 32; Western, and attitude toward natural philosophy, 184
 Christians: and acceptance of Greco-Arabic legacy, 173
 Chrysococces, George, 189
 Chumnus, Nicephorus, 189
 church and state, 7–8, 172, 173
 Cicero, 13
 Clarenbald of Arras, 19, 22
 Clarke, Samuel, 125, 197
 Clement of Alexandria: and handmaiden tradition, 3
 Clement VI, pope, 152
 clepsydra, 199
 Coimbra Jesuits, 112, 154
 coldness, quality of, 56, 57, 109–10
 Columbus, Christopher, 12, 167
 comets, 140
 commentary(–ies), 40
 commentators on Aristotle: Greek, 28–9; Islamic, 29–30
 common course of nature, *see* nature
 compendia, 132
 compounds, or mixed bodies: motion of, 89–90
 Condemnation of 1277: articles reflecting hostility toward theologians, 73; articles relevant to God’s absolute power, 78–80; background to, 70–2; and counterfactuals, 147–8; and eternity of world, 74–5; and possibility of other worlds, 120; and rectilinear motion of world, 197; and role of natural philosophers, 200; 77, 80, 81–2, 83, 85, 96, 117, 121, 124, 138, 142, 166, 173, 176, 196
 configuration of qualities, 155
 Constantine, emperor, 9
 Constantine the African, 23, 27
 Constantinople, 9, 188
 continuous re-creation: doctrine of, 179
 continuum, 155
 Copernicus, Nicolaus, xi, 112, 116, 146, 166, 169, 202
 corporation(s), 34–5
 corpuscular theory, 169
 corruption: and generation, 110
 cosmos: and natural philosophy, 133–5; as two-parted material sphere, 134
 Council of Ferrara–Florence, 189
 counterfactuals, 147–8, 151, 159, 196, 197
 Cracow, University of, 169
 Crates of Mallos, 11
 creation, 117, 119, 131
 crystalline sphere, 108, 109
 cupping glass, 199
 curriculum: in arts, 49–50; of medieval universities, 172–3
 Dante, 67, 69
 Darwinism, 167
 Dear, Peter, 202
 degrees: bachelor of arts, 41; master of arts, 38
 Democritus, 179
 density: and rarity, 110
 Descartes, René, xi, 141, 151, 169
 determination, 41
 Dickinson College, 193
 Diocletian, 9
 Diophantus, 10
 disputation(s), 39–40; ordinary, 41; quodlibetal, 42, 48
 dissection: human, 204–5
 double truth, doctrine of, 76–8
 dryness, quality of, 56, 57
 Duhem, Pierre: and medieval science, xi–xii; 83, 106
 Dumbleton, John, 100
 Duns Scotus, John: and God’s will, 123; 99, 142, 161
 dynamics, 198
 earth: Aristotle’s knowledge of, 167; and arrow, 114; axial rotation of, and principle of simplicity, 146; Basil on immobility of, 6; and daily axial rotation, 112–6; of different worlds, 120–1; eccentric, 163; questions on, 141; sphericity of, 57–8; 134, 169
 eccentric deferent, 106
 eccentric orb, *see* orb(s)
 eccentrics, 105
 Edict of Milan (Edict of Toleration), 2
 Egypt, ancient, 34, 168, 204, 205
 elements: four, 55, 63, 109, 134; derivation of, 55–6; natural place of, 59–60; questions on, 138, 140–1; in real bodies, 60; and vacuum, 91; 86
 empyrean heaven, 108–9, 134, 139
 epicycle, 106
 Eratosthenes of Cyrene, 11
 Erastriatus, 11
 Eratosthenes of Cyrene, 11
 Eriugena, John Scotus, 22
 eternity of world: and Albert of Saxony, 80–1; and al-Ghazali, 180; as reflected in Condemnation of 1277, 74–5; at University of Paris, 74–6; 5, 54, 77, 137, 163, 178, 201
 ether, *see* celestial ether
 Eucharist, 79, 153, 154, 183, 186

- Euclid: *Elements* of, 45, 103; 11, 13, 15, 25
 Eudoxus of Cnidus, 11, 65
 Eugene the Emir, 25
 Eustachi, Bartolomeo, 205
 exact sciences: and natural philosophy, 185–6; 44, 45–6, 177, 192
 experiments: and Aristotle, 159–60
 extracosmic void, 122–6
- fall: process of, 97–8
 Falloppio, Gabriele, 205
 Farabi, al-, 29, 177, 180
 fire: absolutely light, 59; lacks weight, 60; place of, 134; violent motion of, 61
 firmament, 108, 109, 139
 Fishacre, Richard, 124
 fixed stars, 134
 force, 98
 form(s): defined, 56; *see also* intension and remission of forms or qualities
 Fourth Crusade, 188
 Franciscus de Marchia: on impressed force, 95; 112
 Fulbert of Chartres, 19, 20
- Galen of Pergamum, 10, 25, 27, 49, 157
 Galileo: all bodies alike, 92; and attack on Aristotelianism, 168; condemnation of, 204; as critic of scholastics, 203–4; and definitions of motion, 100; and his indebtedness, 93; and instantaneous velocity, 101; and intension and remission of qualities, 149; and Joshua miracle, 116; and mean speed theorem, 103, 170; on natural fall, 91–2; originality of, 103; and self-dissipating impressed force, 98; and specific weight, 92–3; on uniform acceleration, 104; works: *Dialogue on the Two Chief World Systems*, 168, 203; *Discourses on Two New Sciences*, 103; *Letter to Madame Christina of Lorraine*, 116; *On Motion*, 98; xi, 88, 96, 141, 146, 151, 167, 169, 197, 198, 202
 Gassendi, Pierre, 196–7
 Gelasius, pope, 7, 8
 Geminus, 11
generans, 60
 generation and corruption, 57, 110
 Genesis, 5, 74, 76, 133
 geometry: and its applications, 45; contest about, 20; in curriculum, 45; debate with arithmetic, 46; and Isidore of Seville, 15–16; uses of, 46; 44, 172
 Gerard of Cremona: greatest translator from Arabic to Latin, 24–5; 23, 26, 31
 Gerbert of Aurillac (Pope Sylvester II), 19–20, 23
 Ghazali, al-: attitude toward mathematics, 179–80; distrusted philosophers, 181; on natural philosophy and philosophy in Islam, 179–81; works: *Deliverance from Error*, 179; *The Incoherence of the Philosophers*, 180; 29, 71
 Gilbert and Sullivan, 67
 Giles of Rome (Aegidius Romanus), 71, 163
 Gillispie, Charles, 167
 Giordano of Pisa, 160
 God: and actual infinite, 154–5; and annihilation of matter, 196–7; as causal agent in Islamic thought, 178; as celestial mover, 111; and complex world, 146; as direct cause, 21; and earth's axial rotation, 115; and impetus, 112; and infinite attributes, 155; and infinite extracosmic void space, 122–6; location of, 109, 122–3; and nature in Islam, 179; and other worlds, 121; questions on, 138; and rectilinear motion of world, 124; and secondary causes, 142; and space, 169; and “whole-in-every-part” doctrine, 124
 God's absolute power: and Aristotelian claims, 78–80; and theologian natural-philosophers, 84; and vacuum, 82–3; 81–2, 119, 124, 142, 146, 166, 175, 196
 grammar, 14
 gravity (*gravitas*), 97
 Greco-Arabic-Latin science, 206
 Greco-Arabic science and learning, xiii, 22, 84, 170, 171, 175, 205
 Greco-Roman learning, 183
 Greek Orthodox Church: attitude toward natural philosophy, 189; 186–7
 Greek science, 11
 Gregory IX, pope, 70, 73–4
 Gregory of Nyssa, 2, 3
 Gregory of Rimini, 82
 Grosseteste, Robert: and astronomy, 46–7; and *compositus*, 45; 26, 46, 143–4, 175
 Guericke, Otto von, 125
 guilds, *see* corporation(s)
 Gundissalinus, Dominicus, 23, 29
- handbook tradition: Greek, 12
 handmaiden to theology: in Christianity, 3–5; in Islam, 179; 84
 Hansen, Bert, 145
 heavens: are they animate, 139; questions on, 139
 heaviness: absence of, 64; absolute, 60, 92; “accidental,” 97; 91
 heliocentric system, 112, 116, 163, 204
 Henricus Aristippus, 25, 26
 Henry of Langenstein, 175
 Hermann of Carinthia, 23
 Hermann the German, 24
 Hermeticism, 162
 Hero of Alexandria, 10
