Introduction and the example of the Nile	1
 PART I PRINCIPLES	
1 Floodplain evolution	17
1.1 Floodplain evolution: an introduction	17
1.2 River channel change and floodplains	25
1.3 Aggradation and degradation	33
1.4 Terraces	34
1.5 Floodplain evolution and archaeological sites	37
1.6 Sites and rates of sedimentation	39
1.7 Alluvial geoprospecting and site conservation	41
2 Alluvial environments over time	45
2.1 Dating and alluvial chronologies	45
2.2 Chronometric dating methods	48
2.3 Incremental and calibrated relative techniques	55
2.4 Archaeological dating: structures and pots in alluvium	58
2.5 Stability and change	60
3 Interpreting floodplain sediments and soils	63
3.1 River morphology and sedimentation	63
3.2 Floodplain sediments	70
3.3 Palaeohydrology	81
3.4 The fluvial transport of archaeological materials	91
3.5 Floodplain soils	96
3.6 Archaeology and floodplain palaeosols	100

x	<i>Contents</i>	
4	Floodplain ecology, archaeobotany and archaeozoology	104
4.1	Floodplain productivity	104
4.2	Hydrological controls on floodplain vegetation	104
4.3	Vegetation and sedimentary environments	108
4.4	Colonisation and succession	115
4.5	The floodplain and river continuum	117
4.6	Ecological studies of floodplains in different environments	118
4.7	Floodplain palaeoecology	128
4.8	Dendroclimatology	145
	PART II APPLICATION	
5	Artifacts from floodplains and rivers	149
5.1	Palaeolithic terrace sites and floodplain use	149
5.2	Geoarchaeological studies of terrace gravels in southern England	150
5.3	North American alluvial geoarchaeology	167
5.4	Australasian alluvial geoarchaeology	184
5.5	Geoarchaeological studies and archaeological inference	189
5.6	Interpreting artifacts from rivers	190
6	The rise and fall of forested floodplains in North-West Europe	192
6.1	Lateglacial fluvial change and the Upper Palaeolithic	193
6.2	Early Holocene fluvial environments and the Mesolithic	199
6.3	Mid-Holocene floodplain forests and human impact	210
6.4	Floodplain deforestation	215
7	Buried sites	219
7.1	Late Bronze Age and Iron Age alluviation in the British Isles	219
7.2	Roman and medieval alluviation and channel change in the British Isles	225
7.3	Historical channel change and alluviation in mainland Europe	235
7.4	The Mediterranean record	237
7.5	The North American experience	248
7.6	The role of climatic change	251
8	Managed floodplains	254
8.1	Flood farming and irrigation	254
8.2	Temperate flood-meadows	256
8.3	River management: from early obstructions to well-behaved rivers	257

<i>Contents</i>	xi
8.4 Land drainage	268
8.5 The reconstruction of historical flood magnitude and frequency	270
9 The cultural archaeology of floodplains	279
9.1 Locational data and alluvial environments	279
9.2 Positive factors	281
9.3 Negative factors	291
9.4 Locational synthesis	300
10 People, floodplains and environmental change	304
10.1 Palaeohydrology, climate and resources	304
10.2 Floodplain settlement and environmental change: past and future	313
APPENDICES	
Notation	318
1 River flow and sediment transport	320
1.1 Flow	320
1.2 Sediment transport	322
1.3 Grain size analysis and palaeohydraulics	327
2 Flood frequency analysis	331
2.1 Standard flood frequency analysis	331
2.2 Historical flood frequency analysis	332
3 Documentary evidence and wetland perceptions	333
3.1 Place- and river-name evidence	333
3.2 Literary evidence and the human perception of wetlands	335
<i>References</i>	338
<i>Subject Index</i>	372
<i>Index of rivers and sites</i>	375
