Contents

- List of figures* page ix
List of tables xii
Preface xiii
Acknowledgements xiv
Chronology xviii
List of abbreviations xix
- 1 Introduction 1
A local study • The postwar era • The making of a new science •
Histories of molecular biology • Too early, too late? • Preview
- PART I • POSTWAR RECONSTRUCTION AND
BIOPHYSICS 17
- 2 World War II and the mobilisation of British scientists 20
Active mobilisation • Postwar planning • The place of
science in postwar Britain • Science and public display • New
departures
- 3 Reconstructing life 50
The need for biophysics • The 'Randall incident' • Molecular
structure • War, mother of all things? • Physics of life versus physics of
death • War recruits • Biophysicists and the transformation of
biology
- 4 Proteins, crystals and computers 98
Mad pursuit • The Cambridge Mathematical Laboratory • From
punched card machines to electronic computers • Managing data •
Assessing efficiency • Setting the limits • A new pace of
research
- 5 Televisual language 136
Models as research tools • Publishing models • The shape of life •
A new science

viii CONTENTS

PART II • BUILDING MOLECULAR BIOLOGY 161

6 Locating the double helix 164

The debate on the 'origins' • *Annus mirabilis* at Cambridge •
A cuckoo's egg • After the double helix • Codes, maps and sequences •
Phages in the Cavendish

7 Disciplinary moves 199

Forging links • A new name • The case for a laboratory of
molecular biology • Council decision • Using the media • University
politics • Negotiations over site • The biologists' protest • Molecular
biology in Cambridge

8 The origins of molecular biology revisited 236

Constructing a discovery • Local strategy or general trend? •
Biophysics at King's College London • *Action concertée* and molecular
biology in France

PART III • BENCHMARK AND POLITICS 261

9 Laboratory cultures 264

Federative constitution • Molecular mechanism • Boundary objects •
New technologies • In and out of the laboratory • Expansion • A new
laboratory tool • Exporting the worm • Renegotiating molecular biology

10 On the governmental agenda 300

Brain drain • A political role • Biology census • Biology and Cold
War politics • 'Modern biology' • A Europe of biology

11 The end of an era 336

'The party is over' • From basic to applied? • The monoclonal
antibody scandal

12 Conclusions 363

Bibliography 367
