
INDEX

- absorbing, 48
- accessible, 47
- adjacency matrix, 209
- Alexandroff inequality, 92, 188, 189, 195, 196, 203, 236, 238
- Alexandroff inequality for mixed discriminant, 203
- algebraic multiplicity, 5, 215
- analytic function, 24
- aperiodic, 48
- arithmetic mean-geometric mean inequality, 80, 127, 137, 156, 268
- assignment game, 96
- associated with a matrix, 4, 236
- average weight, 220

- balancing algorithm, 262
- base, 207
- basic class of an isolated block, 38
- Bernstein's Theorem, 176
- binomial distribution, 185
- Birkhoff von-Neumann Theorem, 59, 63, 64, 67, 71, 76, 82, 97, 106, 107, 111, 126
- bisubmodularity, 112
- Bondareva-Shapley Theorem, 95
- boolean algebra, 225
- boolean matrix, 225
- Brouwer's fixed point theorem, 5, 53, 184, 272
- budget allocation problem, 239

- c.n.d. matrix, 161
- c.p.d. matrix, 161
- Carathéodory's Theorem, 56, 64, 111
- Cartan matrix, 214
- Cauchy-Binet formula, 235
- Cauchy-Schwarz Inequality, 147, 180, 235
- chainable entries, 67
- characteristic function, 94

- circuit, 220
- circuit geometric mean, 130
- circuit matrix, 124
- circuit mean, 220
- circuit product, 130
- class, 38
- closed system, 287
- coalition, 94
- coefficients of production, 278
- Cohen's Theorem, 134
- communicating states, 47
- complementary slackness, 32, 250, 281, 282, 289, 310
- completely mixed game, 10
- completely mixed strategy, 10
- completely monotonic function, 176
- completely reducible matrix, 125
- conditionally negative definite matrix, 161
- conditionally positive definite function, 186
- conditionally positive definite matrix, 161
- cone, 4, 51, 58
- constant returns to scale, 278
- contingency table, 243
- contracting model, 288
- contraction mapping Theorem, 259
- contraction ratio of Birkhoff, 255
- convex, 4
- convex cone, 251
- convex function, 165
- convex set, 4, 5, 53, 59, 60, 98, 165, 166, 193, 293
- cooperative game, 94
- core, 94
- coxeter graph, 213
- coxeter group, 213
- cyclic matrix, 40

- D_1AD_2 Theorem, 118
- dependent set, 197
- Descarte's rule of signs, 194

- deviation balancing algorithm, 263
 deviation reduction algorithm, 262
 diagonal product, 61, 80, 87
 diagonalizable, 215
 diagonally dominant matrix, 296
 diameter, 255
 direct sum of matroids, 209
 directed graph, 4, 56, 220, 223
 discrete distributions, 185
 distance matrix, 164
 doubly stochastic matrix, 59, 63–65, 69, 75,
 83, 87, 88, 96, 106, 111, 124, 127, 149,
 152, 158, 159, 180, 187, 202, 244, 261,
 263, 273
 doubly stochastic pattern, 57, 82, 118, 244,
 261
 dual, 51, 285
 duality theorem, 22, 30, 32, 33, 74, 89, 95,
 238, 250

 economic expansion rate, 288, 289
 eigenpair, 221
 eigenvalue over max algebra, 220
 electrical networks, 153
 elementary symmetric function, 156
 entropy, 185
 expanding model, 288
 exponent, 218
 extreme point, 60

 factor of production, 277
 factor price equalization, 290
 fair division problem, 108
 Farkas' Lemma, 22
 feasible solution, 22
 Fibonacci sequence, 116
 Fiedler's Inequality, 137, 142
 final class of an isolated block, 38
 finite vector, 220
 Fischer Inequality, 137
 for positive definite matrices, 156
 Frobenius norm, 111
 Frobenius Normal form, 38, 47, 237, 238
 Frobenius–König Theorem, 62, 108, 199,
 201
 fully indecomposable matrix, 66
 fundamental theorem of natural selection,
 121

 Gale–Nikaido Theorem, 305, 312
 Gaussian elimination, 30, 241
 generalized inverse, 229
 generalized log-concave function, 186
 generic matrix, 70
 geometric multiplicity, 5, 215
 globally univalent map, 292
 golden ratio, 116

 graph, 197, 209, 219, 236
 graphic, 197
 gravity model, 245

 Hadamard Inequality, 134, 136, 144
 Hadamard product, 41
 Hadamard–Fischer Inequality, 140
 Hall's Theorem, 199
 Hardy–Littlewood–Polya Theorem, 149
 Hicksian stable, 307
 hide-and-seek problem, 75
 Hilbert's projective metric, 254
 Hoffman–Wielandt Theorem, 111
 Hungarian method, 75
 hypergeometric distribution, 195

 idempotent matrix, 229
 immanant, 148
 imperfectly stable market, 306
 incidence matrix, 198
 income effect, 306
 independent set, 197
 index of, 41
 index of a graph, 210
 index of primitivity, 41
 infinite vector, 220
 information Inequality, 80, 118, 268
 interpolation problem, 173
 inventory model, 45
 inversion, 189
 irreducible, 46
 irreducible matrix, 2
 isolated block, 38
 iterative methods, 28

 Jacobi formula, 140
 Jacobian conjecture, 304, 311, 312
 Jacobian matrix, 302

 Kaplansky's Theorem, 11
 Kingman's Inequality, 123
 Kirchhoff's Theorem, 209
 Kolmogorov–Chapman equations, 46
 König's Theorem, 70
 König–Egervary Theorem, 70
 Kronecker Index Theorem, 84, 118, 158,
 247
 Kronecker product, 58, 145, 159
 Kuhn–Tucker Theorem, 273

 Löwner ordering, 134
 Lagrange's Theorem, 21
 Laplace expansion, 62
 Latin rectangle, 111
 least element, 30
 left Perron eigenvector, 21
 Leontief input–output model, 242

- Leontief matrix, 32
 Leontief model of production, 279
 Lvinger's Inequality, 122, 123
 Lewin's Theorem, 67
 Lexicographic center, 98
 line of a matrix, 69
 linear programming problem, 22
 linear slave economies, 279
 linear Statistical model, 156
 Lipschitz continuous function, 15
 local univalence theorem, 302
 locally univalent, 292
 log-concave sequence, 184
 logarithmic convexity, 159
 loop, 220
 Lorentz, 51
 Lorentz transformation, 52
- M*-matrix, 24, 215
 majorization, 149
 Markov chain, 45
 Marxian system, 285
 Mason's conjecture, 209
 matrix game, 7, 76
 matrix over the max algebra, 219
 matrix-tree theorem, 209
 matroid, 196
 max algebra, 219
 maximum likelihood principle, 265
 merely positive subdefinite, 167
 minimax theorem, 9
 minus partial order, 156
 mixed discriminant, 200
 mixed volume, 209
 Moore–Penrose inverse, 229
 multinomial distribution, 186, 195, 265
 multiparameter, 186
 multivariate, 187
- N*-matrix, 298
N-matrix of the first category, 298
N-matrix of the second category, 298
 negative hypergeometric distribution, 195
 nonnegative matrix, 1
 nonsingular *M*-matrix, 216
 nucleolus of the game, 99
 null space, 10
- open shop scheduling, 105
 operators leaving a cone invariant, 54
 Oppenheim's Inequality, 137, 143, 144, 153
 optimal assignment problem, 72, 73
 optimal intensity vector, 288
 optimal price vector, 288, 289
 optimal solution, 22
- optimal strategy, 8, 76
 oscillation ratio of Hopf, 255
 over max algebra, 219, 220, 238
- P*-matrix, 294
*P*₀-matrix, 294
p-norm distance, 177
 parallel sum, 153
 partly decomposable matrix, 66
 partly infinite vector, 220
 path, 4, 38, 56, 65, 68, 210, 213, 218, 220
 path-positivity, 218
 pattern, 67, 225, 301
 perfectly stable market, 306
 permanent, 61, 62, 68, 88, 89, 93, 148, 185, 190, 200, 202, 236
 permanent-on-top conjecture, 148
 permanent dominance conjecture, 148
 permanent minimizer, 89
 permutation game, 103
 permutation matrix, 1
 Perron eigenvalue, 21, 284
 Perron eigenvector, 21, 284–286
 Perron matrix, 44
 Perron root, 21, 286
 Perron's Theorem, 5
 Perron–Frobenius Theorem, 17, 24, 44, 54, 115, 216, 219, 236, 251, 260, 278, 285
 pointed, 51
 pointed cone, 251
 pole, 24
 polyhedron, 31
 polynomially positive matrix, 44
 positive definite function, 190
 positive definite matrix, 25, 134, 197, 201, 204, 216
 positive diagonal, 61
 positive matrix, 1
 positive semidefinite matrix, 58, 134, 162, 171, 174, 197, 200
 positive subdefinite matrix, 167
 power positive matrix, 44
 power series, 24
 preemptive schedule, 105
 primary good, 277, 279, 283
 primitive matrix, 40
 probabilistic algorithm, 78
 probability density function, 185
 productive economy, 280
 pseudo-convex function, 166
 pure exchange economy, 276
- q*-permanent, 190
 quasi-positive definite matrix, 193
 quasi-concave function, 165
 quasi-convex function, 165

- radius of convergence, 24
- Rado's Theorem, 198
- random walk, 45
- rank additivity, 156
- rank function of a matroid, 198
- rank k truncation, 209
- real estate game, 96
- recurrent, 47
- reduced, 198
- reducible matrix, 2
- regular splitting, 25
- Ricardean system, 285
- right Perron eigenvector, 21
- Rook polynomial, 236

- saddle point, 55, 56
- satisfaction, 98
- scaling theorem, 87, 247
- Schur complement, 138
- Schur-concave function, 187
- Schur power, 145, 190
