Preface	
<i>William T. Ziemba</i>	xiii

PART I. INTRODUCTION

1. Asset and liability management systems for long-term investors: discussion of the issues	
<i>John M. Mulvey and William T. Ziemba</i>	3

PART II. STATIC PORTFOLIO ANALYSIS FOR ASSET ALLOCATION

2. The importance of the asset allocation decision	
<i>Chris R. Hensel, D. Don Ezra and John H. Ilkiw</i>	41
3. The effect of errors in means, variances, and covariances on optimal portfolio choice	
<i>Vijay K. Chopra and William T. Ziemba</i>	53
4. Making superior asset allocation decisions: a practitioner's guide	
<i>Chris R. Hensel and Andrew L. Turner</i>	62

PART III. PERFORMANCE MEASUREMENT MODELS

5. Attribution of performance and holdings	
<i>Richard C. Grinold and Kelly A. Easton</i>	87
6. National versus global influences on equity returns	
<i>Stan Beckers, Gregory Connor and Ross Curds</i>	114
7. A global stock and bond model	
<i>Lucie Chaumeton, Gregory Connor and Ross Curds</i>	129

PART IV. DYNAMIC PORTFOLIO MODELS FOR ASSET ALLOCATION

8. On timing the market: the empirical probability assessment approach with an inflation adapter	
<i>Robert R. Grauer and Nils Hakansson</i>	149

9. Multiperiod asset allocation with derivative assets
David R. Cariño and Andrew L. Turner 182

10. The use of Treasury bill futures in strategic asset allocation programs
Michael J. Brennan and Edwardo S. Schwartz 205

PART V. SCENARIO GENERATION PROCEDURES

11. Barycentric approximation of stochastic interest rate processes
Karl Frauendorfer and Michael Schürle 231

12. Postoptimality for scenario based financial planning models with an application to bond portfolio management
Jitka Dupačová, Marida Bertocchi and Vittorio Moriggia 263

13. The Towers Perrin global capital market scenario generation system
John M. Mulvey and A. Eric Thorlacius 286

PART VI. CURRENCY HEDGING AND MODELING TECHNIQUES

14. An algorithm for international portfolio selection and optimal currency hedging
Markus Rudolf and Heinz Zimmerman 315

15. Optimal insurance asset allocation in a multi-currency environment
John C. Sweeney, Stephen M. Sonkin, Salvatore Correnti and Amy P. Williams 341

PART VII. DYNAMIC PORTFOLIO ANALYSIS WITH ASSETS AND LIABILITIES

16. Optimal investment strategies for university endowment funds
Robert C. Merton 371

17. Optimal consumption-investment decisions allowing for bankruptcy: a survey
Suresh Sethi 397

18. Solving stochastic programming models for asset/liability management using iterative disaggregation
Pieter Klaassen 427

19. The CALM stochastic programming model for dynamic asset-liability management
Giorgio Consigli and Michael A.H. Dempster 464

Contents vii

20. A dynamic model for asset liability management for defined benefit pension funds <i>Cees Dert</i>	501
21. Asset and liability management under uncertainty for fixed income securities <i>Stavros A. Zenios</i>	537

PART VIII. CASE STUDIES OF IMPLEMENTED ASSET-LIABILITY
MANAGEMENT MODELS

22. Modelling and management of assets and liabilities of pension plans in the Netherlands <i>Guus C. E. Boender, Paul van Aalst and Fred Heemskerk</i>	561
23. Integrated asset-liability management: an implementation case study <i>Martin Holmer</i>	581

PART IX. TOTAL INTEGRATIVE RISK MANAGEMENT MODELS

24. The Russell–Yasuda Kasai model: an asset/liability model for a Japanese insurance company using multistage stochastic programming <i>David R. Cariño, Terry Kent, David H. Myers, Celine Stacy, Michael Sylvanus, Andrew Turner, Kanji Watanabe and William T. Ziemba</i> ...	609
25. The Home Account Advisor TM : asset and liability management for individual investors <i>Adam J. Berger and John M. Mulvey</i>	634
