INDEX

- Abano, Pietro d', 141, 544–5
- Abel, Niels Henrik, 709n23
- Abū Ma'shar (Albumasar), 578
- Accademia Naturae Curiosorum (Schweinfurt), 167, 269, 301, 394
- Académie Royale d'Arles, 196
- Académie Royale des Sciences (Paris): and acoustics, 609; and Cartesianism, 399; and experimental philosophy, 127, 130–1, 172; and laboratories, 301; and man of science, 185; and mathematics, 699; and mechanical philosophy, 46; and museum, 288–9; and natural history, 467; and natural philosophy, 394, 403–5; and patronage, 269, 270; and popular culture, 221–2; publications of, 170, 171, 325; and selection of members, 405n178; and travel, 356n62; and women, 195–6, 197–8
- Académie Royale des Sciences et Belles-Lettres, 198
- academies, scientific: and courts, 267–71; and experimental investigations, 130–1; and family model, 231; and laboratories, 301–2; and man of science, 185, 186; and mathematics, 723; and mechanics, 659–64; and museums, 288–9; and natural philosophy, 394; and printing houses, 325–6; rise of in early modern period and issues of proof and persuasion, 169–74; and social conventions, 403–5; and women, 195–8. *See also* Académie Royale des Sciences; Royal Society of London
- Accademia del Cimento (Florence), 127, 170, 172–3, 268, 301, 303, 325, 393–4, 609
- Accademia dei Lincei (Rome), 268, 269, 393, 452, 467
- Accademia dei Secreti (Naples), 170, 301, 325, 393
- Accademia Secretorum Naturae (Naples), 269
- Accademia Segreta (Naples), 301
- accidental causes, and scientific explanation, 92–3
- Acontius, Jacopo, 139
- Acosta, Cristobal, 453
- Acosta, José de, 351n40, 450, 836–8
- acoustics: development of in seventeenth century, 604–11; and harmonics, 630; and music theory, 597–8; optics compared to, 597; Pythagorean and Aristoxenian traditions in, 598–604; and study of sound in sixteenth and seventeenth centuries, 596
- Acta eruditorum* (journal), 167, 200, 331, 394, 671
- active principles, and scientific explanation, 93–105
- Adelard of Bath, 710
- ad vivum*, and naturalism in art, 794–5, 796
- agriculture, and natural knowledge, 218
- Agricola, Georgius, 187, 213, 515
- Agrippa von Nettesheim, Henricus Cornelius, 379, 500, 501–2, 514, 519–26, 734, 803–4
- Aguilon, François d', 122
- Ailly, Pierre d', 478
- Alberti, Leon Battista, 295n14, 315, 499
- Albert of Saxony, 83, 371n28
- Albertus Magnus, 72, 82, 83, 295n13, 543–4, 546, 548n27
- Albrecht V, Duke of Bavaria, 264
- alchemy: and astrology, 555n61; and classification of knowledge, 4; and courts, 261–2; and experimentation, 516; and gunpowder, 308; and laboratories, 294–5, 299; and medicine, 421, 423, 498; modern distinction between chemistry and, 497–8; and Newton, 94n60; and Paracelsus, 502–10; status of in early sixteenth century, 499–502. *See also* chymistry

- Aldrovandi, Ulisse: and botanical gardens, 116, 281; and correspondence, 349; and magic, 526; and medicine, 459–60; and museums, 246, 287, 448; and natural history, 437, 444n29, 451, 455, 458, 462, 463; and patronage, 266; and study of fish, 193, 210
- Alembert, Jean Le Rond d', 23n7, 672
- Aleotti, Giambattista, 315
- Alexander of Aphrodisias, 368
- Alfonsine Tables, 343, 565
- Alfonso V, King of Portugal, 472
- Alfonso the Wise, King of Castile, 343
- algebra, 705–6, 708–10, 714–18
- Alhazen. *See* al-Haytham
- alkahest, and alchemy, 513
- Almazém de Guiné e India (Lisbon), 471, 483
- Alpers, Svetlana, 794
- Alpetragius. *See* al-Bitrūjī
- Alsted, Johann Heinrich, 405–6
- Amico, Giovanni Battista, 567
- analysis and synthesis: and mathematics, 703–6, 722; Newton's method of, 94n60, 99–100, 101, 102–3
- anatomy: and development of medicine, 415, 430; and executions of criminals, 216; and experience, 111–15; and illustration, 782–6; and optics, 615–18; and theaters, 273–80, 285–6, 415. *See also* ear; eye
- Andrade, Antonio de, 359
- Andreae, Johann Valentin, 301
- Anguillara, Luigi, 445
- Anna of Denmark, Queen of England, 254
- Annae litterae* (Annual Letters), 351, 353
- anthropology, and travel literature, 766–70
- antipodes, and cosmography, 470, 474, 477, 479
- antivivisectionism, 797
- Antwerp, and cosmography, 486–7
- aphorisms, as genre of early printed book, 167
- Apian, Peter (Petrus Apianus), 470, 485–6, 635, 682, 693
- Apian, Philip, 486
- Apollonius of Perga, 705, 707, 712–13
- apothecaries: and global trade, 210–11; and gunpowder, 312; and practice of medicine, 419
- Aquinas, Thomas, 8, 27n17, 72, 75n14, 93, 371, 381–2, 523, 732
- Archimedes, 634–5, 639, 644, 651, 705–6, 712–14
- architecture: of homes and households, 226; and mechanical arts, 677–8; and military science, 315
- Aretino, Pietro, 762
- Argoli, Andrea, 553
- aristocracy: and French salons, 198; and man of science, 189. *See also* class
- Aristotelianism: and anti-Aristotelianism in physics, 29–43; and concept of body, 51; critics of and changes in scientific explanation, 71, 72–7, 82–6; definition of, 368n15; historiography of, 70n1; and knowledge of nature, 106–7; and Leibniz, 52; and natural philosophy, 370–95; and physical sciences, 21–8; and rhetoric, 136; and scientific demonstration, 142
- Aristotle: and anatomy, 113; and astrology, 546; and classification of sciences, 120; and concept of causal explanation, 73–5, 105; and experience, 106, 108–11; on household and social order, 229; on manual crafts, 293; and mechanics, 634, 636, 637; and medicine, 407; and natural history, 438, 439; and natural philosophy, 366; on sex and gender difference, 801–2, 803–4; on space and the body, 27, 52. *See also* Aristotelianism
- Aristoxenus and Aristoxenian tradition, in acoustics, 598–604
- armor, and military science, 313–17
- Arnaud, Pierre, 366n3
- Arnauld, Antoine, 163, 398
- art: and artist as scientist, 786–91; and interest in depicting nature, 773–4; and mechanical arts, 693–5; and naturalism, 775–9, 785, 791–6; and natural objects, 529; and optics, 763n20. *See also* illustration
- artisans: and development of new epistemology in natural philosophy, 296; and distillation of drugs, 211; and elitism of scientific academies, 222n78; and women in sciences, 199–201. *See also* craft tradition; guilds
- Ascoli, Cecco d', 528, 529
- Aselli, Gasparo, 429
- Ashmole, Elias, 246, 287, 560n82
- Ashworth, William, 361–2
- astrolabe, 684, 687
- astrology: and astronomy, 577–81; continued popularity of, 558–61; and courts, 258–9; history of and transition from Renaissance to Enlightenment science, 541–2; and intellectual and institutional structures in 1500, 542–7; loss of intellectual legitimacy during eighteenth century, 552–8; and medicine, 579; and public performances in piazzas, 215–16; and reforms in sixteenth and seventeenth centuries, 547–52; and universities, 541, 542, 545–6, 553
- astronomy: and Aristotelian natural philosophy, 386–7; and astrology, 577–81; celestial physics and heavenly bodies, 28; and changes in scientific explanation, 71; and changes in structure of learning, 569–73; and concept of

- Scientific Revolution, 13–14, 16–17; and courts, 255; and Descartes, 586–90, 657–8; and education in early sixteenth century, 564–5; evolution of in sixteenth and seventeenth centuries, 594–5; families involved in, 232, 235; and geography, 491; and Jesuits in China, 833–4; Kepler and revolution in, 581–4, 587–90; and literature, 764–6; and mapping, 344; and mathematics, 41, 119, 120, 121–2, 401–2, 707; and navigation, 686–7; and Newton, 592–4, 664–5, 667–8; and optics, 614; and religion, 573–7, 589–90, 645, 727, 740–8; and Renaissance humanism, 565–9; status of in late Middle Ages, 562–3; and universities, 563; and women, 200–1, 235. *See also* comets; Copernicus; Earth; Galileo; heliocentrism; planetary motion; stars
- Athenian Society (London), 335–6
- atlases. *See* maps and atlases
- atomism: and chymistry, 512; and mechanical philosophy, 47, 53; and natural philosophy in Renaissance, 375–6; and scientific explanation, 87–8
- Aubrey, John, 220
- Augsburg Confession, 736
- Augurelli, Giovanni, 501
- August of Braunschweig-Lüneburg, 264
- Augustine of Hippo, 78, 294, 730–1
- August of Saxony, 264
- Austen, Ralph, 218
- authority: challenges to traditional sources of, 802–3; and influence of religion on astronomy, 740–8; patterns of in family, 230; proof and argument from, 161; and science, religion, and politics in seventeenth century, 748–53
- Auzout, Adrien, 356n62
- Avempace. *See* Bajjā, Ibn
- Averlino, Antonio Francesco (Filarete), 297, 315
- Averroes (Ibn Rushd), 75n14, 83, 368, 637, 641
- Avicenna (Ibn Sinā), 72, 83, 408–9, 499n8, 523
- Bachmann, Augustus, 117
- backstaff, and navigation, 687
- Bacon, Francis: and acoustics, 604–5; and alchemy, 516; and aphorism as genre, 167; and art, 776–7, 787, 796; and astrology, 542, 550–2; and cosmography, 495–6; description of ideal research facility, 272–4, 289, 345, 750; education of, 194; on empiricism in workshop, 212–13, 221; and experience, 106, 110–11, 115, 127, 130; and feminist critiques of science, 798–9; on gender and nature, 810–11; and gunpowder, 307, 308; and history of early modern science, 8; influence of Italian naturalists on, 36; and laboratory, 295, 301; and laws of nature, 45n75; on libraries, 244, 249; and literature, 771; and magic, 532; on man of science, 180, 185, 189; and mechanical arts, 676; and natural history, 116, 458, 463; and natural philosophy, 379, 400; and optics, 612; and physics, 64n144; and religion, 730, 749–51; and scale of practice, 345; and scientific explanation, 83, 84–5; and study of law, 461; and theories of proof and persuasion, 145, 148, 149, 151–2, 158; on travel and exploration, 839
- Badiano, Juan, 826
- Baer, Nicholas Reymers (Ursus), 258
- Baglivi, Giorgio, 431, 432
- Bajjā, Ibn (Avempace), 637
- Baldwin, William, 370
- Baliani, Gianbattista, 651, 653
- Barbaro, Ermolao, 441, 499
- Barozzi, Francesco, 155
- Barrow, Isaac, 121n58, 125–6, 129, 155, 183, 623–4, 718, 720
- Bartholin, Erasmus, 701–2
- Bartholin, Thomas, 429
- Basso, Sebastian, 47, 395
- Bauhin, Caspar, 277, 458n83, 459, 464
- Bauhin, Jean, 455
- Bauhin family, 232, 460n89
- Bautista, Juan, 822
- Bayern, Ernst von, 506
- Bayle, Pierre, 144–5, 331
- Becher, Johann Joachim, 217, 261, 302, 304
- Bede, Venerable, 474
- Beeckman, Isaac, 45, 183, 428, 587n65, 596, 608n25, 654
- Beguín, Jean, 304, 508–9, 511
- Behn, Aphra, 761, 769
- Belgium. *See* Antwerp
- belief, and rhetorical account of proof and persuasion, 147–8
- Bellarmino, Robert, 377, 746
- Belleval, Pierre Richer de, 283
- Bellini, Lorenzo, 430
- Belon, Pierre, 446, 526
- Ben-David, Joseph, 180n4
- Benedetti, Alessandro, 275, 441
- Benedetti, Giovanni Battista, 596, 603, 604, 606, 634, 638–9
- Benedict of Nursia, St., 294
- Berengario of Carpi, Jacopo, 236
- Berkeley, George, 68, 624n60
- Bernoulli, Jakob, 163, 650, 670, 671, 672, 721
- Bernoulli, Johann, 672, 721
- Bernoulli, Niklaus, 670, 672
- Berry, Jean, Duc de, 252
- Bérulle, Cardinal Pierre de, 395

Index

- Bessarion, Cardinal Basilius, 566
 Besson, Jacques, 317
 Biancani, Giuseppe, 155, 375n46
 Bianchini, Francesco, 589
 Bible: and natural philosophy, 371n26, 745–6, 750; and printing houses, 326; sex and gender difference in, 801, 803, 804
 Biringuccio, Vannoccio, 210
 al-Bitrūjī (Alpetragius), 566–7
 Blaeu, Joan, Jr., 492
 Blaeu, Joan, Sr., 353, 492
 Blaeu, Willem, 591
 Blake, William, 772
 Blancanus, Josephus, 739
 Blondel, François, 650
 blood, circulation of, 425–6, 429
 Blotius, Hugo, 256
 Bodenstein, Adam von, 262, 506
 Boderie, Guy Lefèvre de la, 770
 Bodin, Jean, 137, 166, 210, 387
 Bodley, Thomas, 245
 body: and alchemy, 504; Aristotle on space and, 27, 52; and concept of nature, 813; Descartes on extension and, 89n49; and Leibniz's physics, 52n103, 62; mechanist corpuscularianism and Aristotelian concept of, 51; observational account of, 769–70; theories of matter and concepts of, 49–50
 Boehme, Jakob, 374
 Boerhaave, Hermann, 305, 432
 Boethius, 599
 Bombelli, Rafael, 709–10
 books: in Chinese language, 831; dedication of to courtly patrons, 258; and Galileo, 645; and magic, 529–31; and natural history, 439; printing houses and character of, 323; proof and persuasion in, 164–8. *See also* libraries; literature; printing and printing houses; textbooks
 Bordelon, Laurent, 771
 Borel, Pierre, 226
 Borelli, Giovanni Alfonso, 431, 588, 659, 660
 Borough, Stephen, 487
 Borough, William, 492, 688
 Borro, Girolamo, 641
 Bošcović, Rudjer, 68
 Bosschaert, Ambrosius, 793
 botanical gardens: and collection of specimens, 116; colonialism and plants in, 201–2; and courts, 256–7; and curiosity cabinets, 283, 285; emergence and development of, 273–4, 280–3; and natural history, 444, 468
 botany: global trade and interest in, 207–8; and illustrations, 116–17, 235n39, 773, 780–2; and medicine, 442, 444–5, 446, 460n89; and natural history, 442–3. *See also* botanical gardens; herbals and herbalists
 Botero, Giovanni, 838
 Bouchereau, Jacques, 370
 Bouillau, Ismael, 588, 591
 Boujou, Théophraste, 370n21, 390
 Bourne, William, 318
 Bouver, Joachim, 834
 Boyle, Robert: and acoustics, 609–10; and astrology, 552; and concept of nature, 812–14; and corpuscular theory, 512, 537–8; and discovery of chemical color indicators, 210; and essay as genre, 167; and experience, 129–30, 131, 400–1, 402, 466n114; and foundations of physics, 58; and interest in chymistry, 32; and laboratory, 295, 303; and man of science, 182, 189, 194; and mechanical arts, 694; and mechanical philosophy, 43–4, 47, 49, 64; and medicine, 418; and natural history, 466n114; and natural philosophy, 365, 400–1, 402; and proof or persuasion, 138, 152, 157; and religion, 751, 752–3; and Royal Society, 289; and scale of practice, 345; and scientific explanation, 77, 78–81, 91; and theories of colors, 626n69; and transmutation, 511; and workshops in home, 227
 Bracciolini, Poggio, 146, 375
 Bradley, James, 590, 672
 Bradwardine, Thomas, 637
 Brahe, Sophie, 236n41
 Brahe, Tycho: and alchemy, 571; and astrology, 548–9; and courts, 257; and design of Uraniborg, 229; and history of astronomy, 574–7, 590n73, 687, 702; and Kepler, 42, 402, 578n40, 582, 613; and natural philosophy, 386; and scientific explanation, 71; and scientific household, 236n41
 Brasavola, Antonio Musa, 443n24
 Braudel, Fernand, 343
 Brazil: and cosmography, 478; natural history of, 453
 Breidenbach, Bernhard von, 474
 Brendel, Zacharias, 510
 Breyne, Jakob, 202
 Breyne, Johann Philip, 235
 Brisson, Pierre, 412–13
 Browne, Thomas, 221, 771
 Brueghel, Jan, the Elder, 793
 Brunelleschi, Filippo, 677, 692, 787
 Brunfels, Otto, 116, 442, 457, 780, 794n68
 Bruni, Leonardo, 373, 472
 Bruno, Giordano, 33, 35, 36, 375, 377–8, 518, 570, 571–2, 734, 757

- Chavez, Alonso de, 484
 chemistry: and alchemy, 29n27; 497–8; and medicine, 422–3, 430–1. *See also* alchemy; chymistry
 China, and Jesuits, 827–35
 Chladni, Ernst, 630
 Choppin, René, 217
 chorography, 470
 Chouet, Robert, 398
 Christina, Queen of Sweden, 194, 254
 Christine de Pizan, 195n8
Chronicles of the Indies, 351
 chronology, and cosmography, 490–1
 chronometer, and cosmography, 492
 Church of England, and Royal Society, 752
 chymistry: definition of, 509–10; and foundations of physics, 29–33; schools of thought in, 513–17; transmutations and matter theory, 510–13; and universities, 498, 508–9, 510. *See also* alchemy; chemistry
ciarlatani, and performance in town squares, 214, 215, 216
 Cicero, 522
 Cigoli (Ludovico Cardì), 787
 circumferentor, and surveying, 690
 Clairaut, Alexis, 672
 Clarke, Samuel, 56–7, 556–7, 669
 class: and coffeehouses, 333; and concept of man of science, 184–5, 188–91; and cultural performances in piazza, 214; and early modern discourse on femininity, 806; and military science, 317, 318, 319; and participation in natural inquiry, 192–3; and physicians, 416–17; and Royal Society of London, 197. *See also* aristocracy; artisans; elites
 classification: and natural history, 467–8; of science in Arabic tradition, 294
 Claturbank, Waltho Van, 214
 Clauberg, Johann, 61, 399
 Clavius, Christoph: and astrology, 553; and astronomy, 577, 585n57; and cosmography, 483; and Euclid's *Elements*, 771; and Galileo, 641n30; and "Jesuit science," 739, 831; and Jesuit universities, 183; libraries and works of, 352; and natural philosophy, 388; on scientific status of mathematics, 120–1, 125, 155
 Clement VIII, Pope, 377
 clocks: and mechanical arts, 662, 664, 679–83; metaphor of nature as, 748–9
 Clusius, Carolus (Charles de l'Écluse), 204–5, 283, 445, 446–7, 453–4, 456, 458n83, 459, 463, 826
 coffeehouses, discussion and demonstration of sciences in, 320–2, 332–40
 Coigner, Michael, 679
 Colbert, Jean-Baptiste, 222, 399, 404, 493
 Colden, Jane, 235
 Colegio de San Francisco (Mexico City), 821
 Colegio de Santa Cruz de Tlatelolco, 822, 825
 Collegio Romano, 488, 577, 641
 Collegium Experimentale, 394
 Collenuccio, Pandolfo, 441, 499
 Collins, John, 699
 Colombo, Realdo, 112
 colonialism: and cosmography, 482–3; and European expansion and self-definition, 818–39; and natural history, 466–7; and travel literature, 768–9; and women in sciences, 201–5. *See also* New World; postcolonialism; Spain
 Colonna, Fabio, 461–2
 colors, and theory of light, 626–9
 Columbus, Christopher, 351, 448–9, 477–8, 819
 Comenius, John Amos, 240, 301, 751
 comets, and astronomy, 71, 386, 575–6, 591, 592
 Commandino, Federico, 633, 635, 639, 699, 711, 712n27, 738
 commerce. *See* trade
 communication: and fundamental changes in early modern period, 347–55; geography and expansion of scientific, 361. *See also* language; letters; printing and printing houses
 Commynes, Philippe de, 309
 compass, and mechanical arts, 686, 687–8
 confessionalization, and religious identities, 735–6
 conic sections, Apollonian theory of, 716–17
 consonances, theory of, 605–7
 continuity, Galileo's views about motion and, 652–3
 Cook, Harold, 193, 355
 Copernicanism: and Aristotelian natural philosophy, 375, 385–6; and Church, 746; and Galileo, 223, 645; Wittenberg interpretation of, 738
 Copernicus, Nicolas: and astrology, 541; and cosmography, 479–80, 496; and history of astronomy, 14, 567–8, 573, 740–3, 747–8; and man of science, 181; printing of works of, 328; travel and distribution of ideas of, 352. *See also* Copernicanism
 Cordemoy, Gérauld de, 61
 Cordus, Valerius, 445, 446
 corn, and natural history, 449–50
 Coronel, Luis, 373
 corpuscular philosophy: and Aristotelian concept of body, 51; and chymistry, 512, 517;

- and occult theory of medicine, 537–8; rise of mechanical philosophy and, 43–7; and scientific explanation, 87–93; and theories of matter, 49, 85. *See also* mechanical philosophy
- correspondence. *See* letters
- Cosimo I, Grand Duke of Tuscany. *See* Medici, Cosimo I de'
- cosmography: and emergence of geography, 494–6; new discoveries and reorganization of, 469–72, 476–80; and science of description and measurement, 491–3; status of before 1490, 472–6; status of in early sixteenth century, 469, 480–91
- cosmology: and Cartesianism, 564; and Copernicanism, 41–3, 375, 385–6, 567–9, 738, 740–2, 747–8; and Descartes, 397, 586–7, 590–1, 747–8, 753; and Galileo, 590–1, 743–7, 753, 755; and homocentric theories, 566–7; and Kepler, 41–3, 580–1, 742–3; and music, 600n7; and telescopes, 685–6. *See also* astronomy; heliocentrism
- Cotes, Roger, 67n156, 671, 672
- Coto, Francisco, 484
- Cotton, Charles, 763
- Counter-Reformation: and astronomy, 582; and natural philosophy, 395
- courts: and astrology, 549–50; and curiosity cabinets, 263–7; and laboratories, 300; and patronage of science, 253–63; and scientific academies, 267–71; and sociopolitical character of early modern Europe, 251–3. *See also* patronage; state
- Cowper, William, 430
- craft tradition, and practice of astronomy, 200. *See also* artisans; guilds
- Craig, John, 163
- Cremonini, Cesare, 381, 424
- Croll (Crollius), Oswald, 32, 262, 299
- Cromberger, Juan, 822
- cross-staff, and navigation, 687
- Cruz, Juana Inés de la, 825
- Cruz, Martín de la, 826
- Cudworth, Ralph, 36, 60n134, 104, 374, 813
- culture: and art, 773–96; and European colonialism and self-definition, 818–39; and gender, 797–817; and literature, 756–72; and man of science, 191n24; and religion, 727–55. *See also* etiquette; popular culture
- Cunningham, William, 487
- curiosity cabinets: and anatomy theaters, 278; and botanical gardens, 283, 285; and courts, 263–7; emergence and development of, 273–4, 286–9; and expansion of travel, 351; and global trade, 209
- cycloid, and mechanics, 662–3, 671, 681
- Cyrano de Bergerac, Savinien, 762
- Dalgarno, George, 761
- Daneau, Lambert, 382
- Danfrie, Philippe, 679
- Danti, Egnatio, 485, 683, 693
- Darwin, Charles, 760, 797
